

An alternative way to administer your **ERLEADA**®

If you are having trouble swallowing tablets whole, try this method using applesauce.

STEP
1

Mix

Start by placing your dose of ERLEADA® tablets in a container that contains 4 ounces (120 mL) of applesauce. **The tablets should be whole, not crushed.** Mix the applesauce and tablets together.

STEP
2

Stir

Wait **15 minutes**, then stir the mixture again. After waiting **another 15 minutes**, you should stir the mixture until the tablets are well mixed and you can no longer see any chunks.

STEP
3

Swallow

When you can no longer see any chunks, swallow the mixture right away using a spoon.

STEP
4

Rinse and Drink

To make sure you take your full dose, **rinse the container** with 2 ounces (60 mL) of water and drink the water mixture. **Repeat** one more time.

REMEMBER:

- Swallow all the applesauce and medicine mixture.
- **Make sure you swallow the mixture within one hour of preparation.**
- **Do not store ERLEADA® that has been mixed in applesauce.**

If you have any questions about how to take ERLEADA®, please refer to the package insert or speak with your doctor.
