

# Agrivoltaics Canada Membership

# About Agrivoltaics

## Canada

Enhancing Food, Energy and Financial Security

To keep Canada's farmers farming, agrivoltaics offers a way to combine agricultural production with solar energy, creating new and reliable revenue opportunities while supporting crop productivity.

Agrivoltaics Canada advances farmer-led solar through advocacy, knowledge sharing and sector collaboration. As this emerging sector grows in Canada, we bring farmers, industry, researchers and other stakeholders together to advance best practices, new technologies, measurement approaches, and supportive environmental and electricity policy.

# Membership plans

# Available Tiers

## Student

Connect with Canada's growing agrivoltaics community, build industry knowledge, and develop relationships with researchers, producers and industry leaders.

## Supporter

Bring the individual, farmer, & producer voice into Canada's agrivoltaics conversation while connecting with industry, researchers and fellow producers shaping its future

## Association

Connect your organization and members to the agrivoltaics sector, contribute to shared advocacy, and build relationships across agriculture and renewable energy.

## Industry Levels 1 - 3

Build your organization's visibility and connections while contributing to industry advocacy and the conversations shaping the future of agrivoltaics in Canada.
