Advancing Agrivoltaics for a Sustainable Future

Together, we can champion advancements in agrivoltaics
and pave the way for a sustainable future.

Sponsorship Opportunities

Agrivoltaics represents the future of food and energy in Canada — where innovation in clean power meets sustainable agriculture.

By sponsoring and participating in the **Agrivoltaics Canada Conference at the University of Waterloo on November 27, 2025**, your organization joins a national conversation shaping climate policy, research, and rural development.

This full-day event brings together leaders in energy, agriculture, and government to accelerate real-world solutions for sustainability and food security.

Sponsors gain direct access to decision-makers, researchers, and industry innovators — positioning your brand as a catalyst for progress.

Your support powers collaboration, innovation, and impact. It's an opportunity to lead the conversation, showcase your expertise, and help build a more resilient and sustainable Canada.
