Enabling Secure Work from Anywhere at Anytime on Any Device

Prevent Illegal Downloads

Eliminate Threats

Stop Spyware

Stop Identity Theft

Prevent Ransomware

Ensure Network Security

Neutralize Viruses

Stop Malware

Transform any computer into a clean, highly secure, self-contained corporately managed work environment virtually impossible to compromise.

Secure Endpoint

vKey provides a clean, trusted, encrypted endpoint that allows organizations to manage their end users' endpoint devices, all while leaving zero footprint on the host device.

Maximum Security

vKey comes with NIST FIPS 140-2 compliant AES 256-bit encryption, with the option to upgrade to Quantum-safe encryption.

Ultimate Mobility

vKey securely connects to your corporate public or private cloud. This provides secure access to the end users desktop environment from anywhere (home or the office), and supports both online and offline work environments regardless of network connectivity.

Simple Authentication

vKey seamlessly integrates with any existing enterprise authentication and authorization solution ensuring a simple and smart user experience. This includes all forms of PKI, as well as hard and soft tokens from industry leading solution providers.
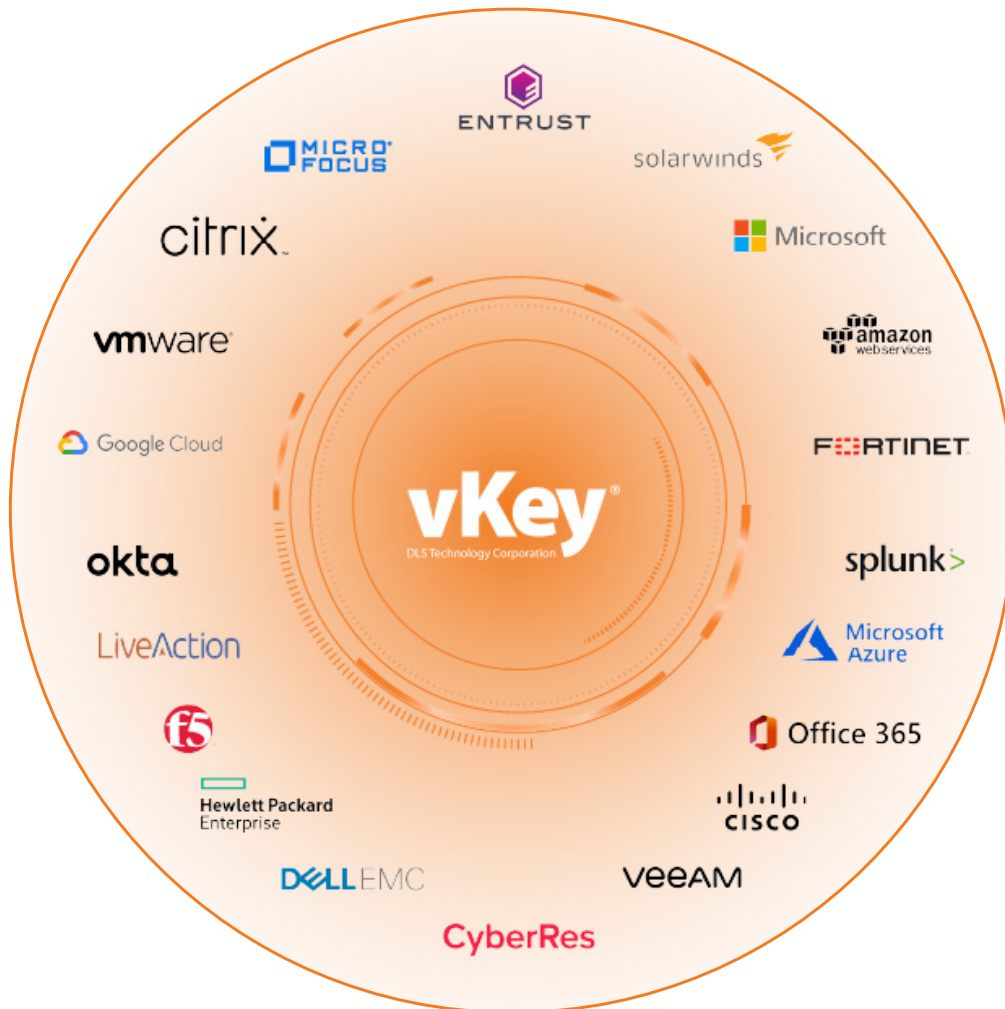

Enterprise Level Management

vKey's Device Manager (vDM) integrates with your corporate Active Directory, Security Solutions and Architecture (Anti-virus, SIEM, MFA, ZTA, SASE) to provide simplified management, deployment and enforcement of your corporate workgroup and security policies.

Deployable on Virtually any Platform
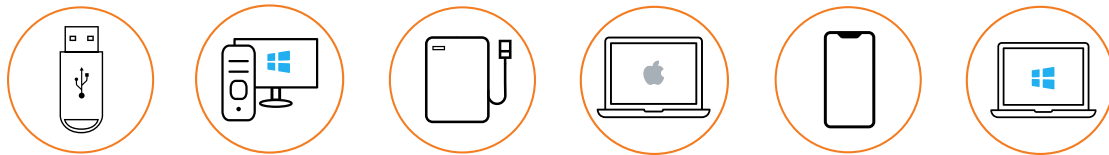

Turn Any User's Endpoint Device into a Corporately Managed and Secure Endpoint Without the Need to Install Software on their Personal Devices.

vKey Supported Technologies Include:

ENTRUST
MICRO FOCUS
solarwinds
citrix
Microsoft
vmware
amazon web services
Google Cloud
F::RTINET
vKey
DL5 Technology Corporation
okta
splunk>
LiveAction
Microsoft Azure
f5
Office 365
Hewlett Packard Enterprise
CISCO
DELL EMC
veeAM
CyberRes

Benefits of Deploying vKey

Turn any device into a corporately managed endpoint in seconds

Reduce user onboarding time and support by up to 90%

Streamline security policy enforcement

Increase ROI by reducing the costs associated with replacing corporate issued devices and laptops

Extend hardware life by over 200%

Assist with certifications such as: HIPPA, SOX, FIPS, etc.
