

vKeyXE Solution Overview

The vKeyXE desktop application allows users to boot vKey OS with one click from their native desktop.

vKeyXE Benefits:

- ✓ No software installation needed
- ✓ No need for BIOS configuration
- ✓ Built-in system reports to facilitate support
- ✓ Built-in user guide for seamless access
- ✓ Built-in compatibility test to validate device hardware

vKeyXE Desktop Shortcut Allows for One Click boot into vKey OS

vKeyXE Features

Simplifies Deployment and Support - One Click Launch into vKey

System Compatibility Test

Integrated endpoint system compatibility test that easily confirms that the endpoint device has the minimum technical specifications needed to support vKey.

System Report

System Information can be gathered and sent to vDM (management console) where your corporate network administrators can access it for future reference as part of your deployment process and support services.

User Guide and Launch Instructions

Integrated User Manual and Launch Instructions ensures that every user can quickly access information related to launching vKey regardless of their endpoint device, including Linux, Windows and Mac devices.

About DLS Technology Corporation

DLS Technology Corporation, one of Canada's Top 500 Growing and Growth 400 companies, is a leading Solutions Integrator and technology innovations firm providing advanced Cybersecurity, Cloud Computing, Data Analytics and Digital Transformation services nationwide.
