

# ABOUT US

ArmourZones has developed a proprietary training system that incorporates social distancing and helps kids to train, exercise, learn, play games and have fun - all while keeping them safer in play.

ArmourZones' high-performance system helps coaches and teachers to demonstrate and improve spatial awareness, body movement, speed and agility and over all active and learning engagement with the kids.

It's a must have. We want our kids safe and active - "Who are you protecting?"

The Covid pandemic has changed the world – how we learn, how we play and how we exercise. Social distancing is now a phrase the entire world knows – but what does it look like? We at ArmourZones have created tools to learn, play and exercise socially distanced - apart but also together.

ArmourZones has created a unique exclusive system that includes our proprietary halos, distancing straps, curriculum playbook and "fitness zone" framework – all designed to help keep people safe, fit, engaged and active.

With our focus on challenging fun and fitness training, ArmourZones' users gain spatial awareness and learn social distancing skills – this learning legacy translates into lifelong skills that can be applied beyond the playing field. At our core, ArmourZones' halo-based systems provides any group, of any size, a platform to get out, be socially active without the worry of social distancing because ArmourZones has taken care of that for you.

**ArmourZones is where people train safe, play safe, learn safe ... and so much more.  
Who are you protecting?**
