quickly realized how difficult it is for teachers to help support children who are especially (difficulties or in difficulties!). In teaching and supporting the whole class. Trying to persuade reluctant children was a challenge for me, but I loved a feeling of fulfillment when I finally accepted them, that I helped them learn and understand different things and that I realized that the teaching may have done for me. On another occasion, I also helped in a primary school with a parasolar photo club. I really liked that I could combine what I liked to work with children in the school environment. Given that I am interested in different areas and courses such as religious studies, history and geography, I believe it will benefit me and students, because their teaching will be filled with passion and enthusiasm. Guys I think I have a lot of skills to be a good teacher' X'X2 X'X9 Copyright 2023 GTI Future Ltd. Recorded in England n. X'X2 X'X9 Copyright 2023 GTI Future Ltd. Recorded in England n. X'X0 X'X9Cflet X'X2 X'X0 X'X9S The teacher of the teacher, I x'e2 x'x0 x'x9ll becomes the Lily x'e2 x'x0 x'x9d wanted to be his primary school teacher, a primary school teacher. It was x'e2 x'x9Bmiss lily x'e2 x'x0 x'x9, because somehow there was no x'e2 x'x0 x'x9Bsumand x'e2 x'x0 x'x9, it looked too formal. During this time I worked with children to maintain 6 years and meet many different children.

Some children with whom I worked were very difficult and I asked to pull them out of the class and work with them in one in the library. I soon realized how difficult it is for teachers x'e2 x'x0 x'x9s, children who are particularly struggling (or annoying!) In addition to teaching and supporting the entire class, I said I tried to force them to do my job, but I loved a feeling of success when I finally came to them, helped them learn and understand and understand that I could teach. On an independent occasion, I also helped in a photo club after primary school. I thought it was great how I could combine something that I would like to do in a school environment with children. Since I am interested in a wide range of areas and thematic activities such as religious studies, history and geography, I believe that this would bring advantages and students because I will be passionate and passionateA positive personality and a happy being who can effectively engage children and maintain good relations with students.

At university I am studying Classical Civilisation, Modern History and Law for a BTEC. In addition, I decided to further improve the EPQ, which highlights my large staff. I am confident that all the skills I have gained during the EPQ will be of great help to me as I prepare to study at university. I've also been working with Factory Card Factory which has really boosted my confidence in recent months. It also improved my communication skills and gave me a sense of responsibility that I didn't have because I know people trust me and depend on my hard work and commitment to good customer service. I believe that I am incredibly well-suited to being a primary school teacher and I have many skills that will help me study and work. I think that my enthusiasm will shine through my classes and that my enthusiasm will shine through my classes and that my enthusiasm will shine through my classes. I think that my enthusiasm will shine through my classes and that my enthusiasm will shine through my classes.

school that you're a great fit for the job and expand your short interview options. The more you can demonstrate that your skills and interests align with the ethos and values of the school, the better. We spoke to several teachers to get their best tips for success. What experience will you take with you? Schools want to learn more about him as an intern with different subjects, backgrounds, types of schools and working with different students. Think about your teaching method to motivate students and how to interact with different types of people (children, staff, parents and carers). Make sure you bear witness to what you have enduredHow did you work with the given defensive advantage?

What are your skills and qualities?

[illegible]

On another occasion, I also helped in a primary school with a parasollar photo club. I really liked that I could combine what I liked to work with children in the school environment. Given that I am interested in different areas and courses such as religious studies, history and geography, I believe it will benefit me and students, because their teaching will be filled with passion and enthusiasm.

MATHEMATICS

Mathematics is a subject that I have thoroughly enjoyed throughout my primary and secondary education. I enjoy the challenge of thinking in a logical way and am always attracted to mathematical problems, however difficult and regardless of the form in which they come. Having studied A-level Mathematics for a year, I have been able to have a taste of many different topics. Pure mathematics is my favourite area, particularly sequences and functions, and I look forward to learning more about these and other topics in much more depth. A Mathematics degree will provide me with the challenge that I am ready for.

I always work hard at school and have a good level of concentration. I am efficient and make good use of the time from free periods to complete my homework. Deadlines are always met to the best of my ability and I make a real effort to present my work clearly. As a member of my school community, I believe that I have contributed greatly. Having been appointed to the position of Head Maths Prefect, I am now responsible for the Maths Department during lunchtimes and run a weekly maths club called Pythagoras. This club is for younger years and I set logic puzzles, help with homework and hold a quiz at the end of the session. Spending time with the younger pupils has made me realise that I might like to be a teacher. My enthusiasm for the subject resulted in me winning a maths prize, which was a great honour.

Out of school I am a keen musician and play trumpet in a brass band. I have been a member for almost four years and would like to continue this interest at university. I am due to take my grade 8 exam this winter and intend to start teaching afterwards as I think this would be a valuable skill. Another passion of mine is comic art. John McLusky, who was the original artist of the James Bond 007 Strip Cartoon Series in the *Daily Express*, is my hero, and I enjoy visiting his exhibitions whenever I can.

I am greatly looking forward to the transition from school to university because of the independence and opportunities that university life will offer. I will get involved in many different clubs and societies and try some new sports, like karate, that I am not able to do at school. I believe that the challenge of studying and developing my mathematical knowledge to a higher level is going to be one that I will thoroughly enjoy.

Strengths

- This student demonstrates real interest for the subject. Don't sell yourself short; if you are involved in clubs at school remember to talk about these.
- The student has given thought to the future: talking about hobbies they want to continue, others they would like to take up and a possible career as a teacher. It is always good to be forward-thinking in the personal statement.

Weaknesses

- More detail could have been given on the maths prize, as this award is relevant.
- The student does not mention any of his other A-level subjects. Although not essential, an interest in other studies beyond Maths could be useful, especially if they complement your Maths studies (eg Further Maths, Physics).

I worked mainly with the children individually and helped those who had more difficult tasks, I also listened to them to read the children of the KS1, helped to prepare equipment for activities, and help during the sports day. Some of the children I worked with were very challenging and asked me to get them from the class and work with them in the same library. I quickly realized how difficult it is for teachers to help support children who are especially in difficulties (or in difficulties!). In teaching and supporting the whole class. Trying to persuade reluctant children was a challenge for me, but I loved a feeling of fulfillment when I finally accepted them, that I helped them learn and understand different things and that I realized that the teaching may have done for me. On another occasion, I also helped in a primary school with a parasollar photo club.

PRIMARY TEACHING

Personal Statement Example

I am one of ten children in our family. Therefore, you may have got the idea why I love working with children. I was not exactly sure as to the specific profession that I want to pursue but during the last two years, everything just became clear to me. I really loved working with children. This was probably influenced by the newest addition to our family, my niece.

During the last year, I have helped him in developing his skills, encouraging him to learn more. I find happiness and sense of achievement in teaching skills to children. I would love to do so further. This is one of the primary reasons for being interested in enrolling in a teaching course for primary education.

By discovering the love for supporting and helping others, I got to widen out my knowledge in the teaching field by completing two placements as my work experience within a primary school environment. For two whole weeks, I have shadowed different teachers, observing their techniques, as well as the ways in which they provide support to the children.

I found that each day is a challenge as new personalities, new faces were emerging, bringing various obstacles to the profession. However, the moment such challenge is overcome, the sense of achievement surges in and complete satisfaction follows. During that experience I have also joined several activities, achieving my positive qualities that I have developed during the past few years. This includes organizing events and preparing exciting activities.

I look forward to expanding my theoretical and practical knowledge further by attending your University. By pursuing a teaching degree, I am interested in advancing my knowledge in educational studies, improving my overall personal skills, and therefore seeking for the opportunity to prove myself as I know that I have the commitment that you need.

Trying to persuade reluctant children was a challenge for me, but I loved a feeling of fulfillment when I finally accepted them, that I helped them learn and understand different things and that I realized that the teaching may have done for me. On another occasion, I also helped in a primary school with a parasollar photo club. I really liked that I could combine what I liked to work with children in the school environment. During this time I worked with children to maintain 6 years and meet many different children. I mainly worked with children on one and helped those who recognized more difficult work and also listened to reading children KS1, helped prepare class materials and help the sports day. Some children with whom I worked were very difficult and I was asked to pull them out of the class and work with them in one in the library. I soon realized how difficult it is for teachers's \xe2 \x80 \x99, children who are particularly struggling (or annoying!) In addition to teaching and supporting the entire class. I said I tried to force them to do my job, but I loved a feeling of success when I finally came to them, helped them learn and understand and understand that I could teach. On an independent occasion, I also helped in a photo club after primary school. I thought it was great how I could combine something that I would like to do in a school environment with children. Since I am interested in a wide range of areas and thematic activities such as religious studies, history and geography, I believe that this would bring advantages and students because I will be passionate and passionateA positive personality and a happy being who can effectively engage children and maintain good relations with students. At university I am studying Classical Civilisation, Modern History and Law for a BTEC. In addition, I decided to further improve the EPQ, which highlights my large staff. I am confident that all the skills I have gained during the EPQ will be of great help to me as I prepare to study at university.

I've also been working with Factory Card Factory which has really boosted my confidence in recent months. It also improved my communication skills and gave me a sense of responsibility that I didn't have because I know people trust me and depend on my hard work and commitment to good customer service. I believe that I am incredibly well-suited to being a primary school teacher and I have many important qualities that I am sure will be valuable and beneficial if I seriously question my career. I hope that studying Primary Education at university will give me the skills to be a successful teacher and that my enthusiasm will shine through and I can go on to become a qualified teacher.

Your personal statement is your first chance to show the school that you're a great fit for the job and expand your short interview options. The more you can demonstrate that your skills and interests align with the ethos and values of the school, the better. We spoke to several teachers to get their best tips for success. What experience will you take with you?

Schools want to learn more about him as an intern with different subjects, backgrounds, types of schools and working with different students. Think about your teaching method to motivate students and how to interact with different types of people (children, staff, parents and carers). Make sure you bear witness to what you have enduredHow did you work with the given defensive advantage? What are your skills and qualities?

Are you a well-organized, confident and motivated teacher? Tell us and give examples! Schools are looking for excellent communicators, team players and relationship builders. Be sure to explain how you create a positive learning environment and consider skills such as time management, organization and flexibility. Schools will also want to know how to meet the challenges. How can you contribute to the wider life of the school? Reach out to others to show how your hobbies and achievements can contribute to the broader school community. Could you run an afternoon club or organize road trips? Now look for a job.
