Welcome to Synergy XIX Sale

and the $15,000 Synergy Showcase

SYNERGY SHOWCASE

The Synergy Showcase is an annual event sponsored by Synergy members. Show calves purchased from a Synergy member are eligible for Synergy Showcase XIX to be held September 27. Contact any Synergy member for details and rules of the unique, one-of-a kind showcase. Entry card and class breaks are on page 4. Heifers purchased in the sale can show in the Showcase, September 27.

BROADCAST VIDEO, MAIL OR PHONE BIDS

If you are unable to attend the sale in person, please feel free to contact Terry Reagan or any Synergy member (see cover for cell numbers) to place your bid which will be handled with the utmost confidence. We thank you for all bids and feel confident that our cattle will assist you in accomplishing your genetic goals.
Sale day phones 512-587-7896 or 956-207-1447.
Sale will be broadcast live on www.dvauction.com

AUCTIONEER

Terry Reagan 210-414-4411

SALES STAFF

Representatives from the *Gulf Coast Cattleman*, *Weekly Livestock Reporter*, *Southern Livestock Standard* and American Simmental Association will be at the sale.

EPDS

EPDs current August 20, 2026.

GLOSSARY

All-Purpose Index (API): Evaluates sires for use on the entire cow herd (bred to both Angus first–calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.
Terminal Index (TI): Evaluates sire for use on mature Angus cows with all offspring put on feed and sold grade and yield.
Using API and TI: First, determine which index to use; if you're keeping replacements use API, if not, TI. Then just as with EPDs zero in on the unit difference between the bulls. The difference can be used to determine how much a bull is worth compared to another. Or, put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra $6,000 over a +50 bull if both are exposed to 30 cows over 4 years ($50 diff. x 30 hd. X 4 yr.=$6,000). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and $ indexes visit www.simmental.org.

PARTNERSHIP LOTS

In the case of bull partnership lots, the new partner will have first choice to decide what 60 days they will be able to breed the bull. All decisions relating to the possession, showing, promotion, collecting of semen, and marketing will be mutually agreed upon prior to the transaction with both parties dividing all future expenses and net revenue.
Female partnership lots will be owned 50/50 with all future production being co-owned. The partner with possession will receive $375 per year for maintenance from the other partner. A partner that is selling their interest must give the other partner the right to match any bona fide guaranteed offer prior to selling their interest to a third party. Contract on these lots will be available on sale day.

SALE TERMS AND CONDITIONS

All cattle sell under the ASA terms and conditions. Copies will be available on sale day.

CATTLE TRANSPORTATION

Professional haulers will be on hand to assist you with the delivery of your cattle. We will assist you in making the most economical trucking arrangements.

HEALTH

All sale cattle of age will be brucellosis and tuberculosis tested and will have the necessary health papers to travel to other states. Any export health papers will be provided at the seller's expense.

Syn-er-gy *n.* **The action of two or more to achieve an effect of which each is individually incapable.**

Participants in Synergy have committed to marketing their best genetics and making this event more by working together rather than as individuals. Synergy was developed to be a showcase for the breed. Please come join us.

SEMEN OFFER ON FEMALES

Buyers will receive two units of semen with each female purchased from any of the bulls owned and collected by that particular consigning Synergy member of that lot. This semen is solely for use on your purchased female. Your choice of semen must be made prior to May 1, 2027.

SEMEN POLICY ON BULLS IN SALE

Synergy consignors reserve the right to collect 300 units of semen from any of our bulls in this sale at our expense and at the buyer's convenience.

RANCH LOCATION

Directions From Giddings- Hwy 290 leads to Giddings, at the intersection of Hwy 290 and Hwy 77, go South on Hwy 77 approximately 2 miles and turn left on Road #223 (just past the large beige water tower), go about ½ mile and turn left on gravel road #2231. Stay on Road #2231 until you cross the cattle guard and follow trailer and parking signs.
Directions From LaGrange- From LaGrange go North on Hwy 77 approximately 16 miles and watch for sign to County Rd. #223 and turn right on Rd. #223 (just before the large beige water tower) go about ½ mile and turn left on gravel road #2231. Stay on Road #2231 until you cross the cattle guard and follow trailer and parking signs.
Physical address: 1316 Private Road 2231, Giddings, Texas 78942

AIR TRANSPORTATION

We are 60 minutes from Austin Bergstrom Airport which is serviced by most airlines including Southwest and American.

CATTLE LOAD OUT

We will not load any of the sale cattle until after the sale.

SYNERGY XIX

Sale Participants

HENSGENS BROTHERS CATTLE

Our entire family is once again proud to support the Synergy Sale and Showcase. We appreciate Tim and everyone that plays a part in this great event as it takes a lot of time and effort to pull off.

The Simbrah breed can grow especially in the commercial sector. We all must work together to convey the truth of how these cattle will work in the real-world environment. An older mentor told me when I was young, "It cost more to change your environment than to adapt." This is the reason we have Simbrah and utilize all Sim-genetics. They thrive in so many different environments across the world to produce quality beef.

It is great time to be in the cattle industry with markets hitting all-time highs both for our commercial and seedstock producers. We are in South Central Louisiana and welcome everyone to visit to see some great Simbrah and Brahman cattle!

TMP LIVESTOCK

Welcome to Synergy XIX!

First things, first. We are so excited to be adding to our family as Kailyn Capps joins us via her engagement to Kaleb! She's been a fixture with us for a while, but now it's official! Welcome aboard, Kailyn!

Now to the other stuff.

Our ranch is in East Texas, just outside of Henderson, where we focus on quality Simbrah cattle. We are pleased to add Smith Juliet Ashley Rene 215M to our donor pen, Jacob's outstanding Simbrah show heifer from this past season. We have also put two 321B daughters into production in our herd, Smith TMP Bibi Bella and Smith TMP Let the Bella Shine. It will be fun to see what these three cattle produce.

We are offering six lots in the sale this year, perhaps our best all-around set of heifers to date. We are highlighting the progeny of Smith Can't Stop Being Good 50L, a Simbrah bull that we own with Smith Genetics and a son of Follow My Lead. These five calves are offered as breeding prospects and have excellent calving ease, birthweight, and docility EPDs. We also have one show or breeding prospect sired by Smith TMP Cast No Doubt, who is out of our Priceless Gem 377A donor. This calf is out of Jacob's show heifer from 2 seasons ago and is fully halter broken and has been shown. All six heifers have been exposed to Smith Head Shakin 14L, a purebred Simmental bull. We expect some very nice percentage Simbrah calves from this breeding. Breeding status will be updated at sale time.

These 50L daughters are uniform and balanced, with a calm disposition, clearly patterned by 50L. Even the 377J heifer matches the pattern. Buy one, buy two, or buy the whole set. They'll make an excellent starter package for someone just beginning to build a herd or someone wanting to quickly expand! All our sale cattle have had tissue samples taken and submitted for DNA verification. You can read more about each of these calves in our sale lot notes.

Our show heifer comes with the benefits of our junior program - support at every major stock show, guidance for feeding and showmanship, answers to any questions from our junior showmen and their parents, and access to any of our bulls for breeding. We also welcome scramble certificates! Ask us about the services we can provide.

FRALISE FARM AND RANCH, LLC/TRIPLE J RANCH

At Fralise Farm and Ranch, we are dedicated to raising cattle that are gentle, hardy, and structurally sound, capable of thriving on our forage-based, intensive rotational grazing program. Our goal is to produce cattle that perform well in the show ring and excel as breeding adults on pasture. We've developed a comprehensive heifer development program focused on replacement females and continue to enhance our herd by introducing superior Simbrah genetics. With the power of proven sires and cow families, we're capitalizing on the best Simbrah has to offer. Special thanks to Tim Smith for his guidance and for inviting us to participate in Synergy.

BURCH CATTLE

Welcome to Burch Cattle, as we grow our herd, the quality of our cattle improves, thanks to our exceptional sires, Smith Born to Dare and Smith Intrigue. This year, we're especially proud of our best-ever calf crop. We've also ventured into selling meat through private treaty, and the response to Simbrah beef has been overwhelmingly positive. Emily exhibited the reserve grand champion Simbrah female at the Austin Show and we are very enthused about this year's potential in our herd. We are excited about the future of our program and look forward to what's to come, both with Synergy and the future of the Simbrah breed.

NIESCHWIETZ 7N RANCH

We warmly welcome everyone to Synergy XIX and extend our deep gratitude to Tim for his unwavering support. We'd also like to thank the juniors, parents, 4-H and FFA advisors, fellow breeders, and everyone who contributes to the success of this event. Without your involvement, Synergy wouldn't be the success it is today. We are constantly working to enhance our cowherd by integrating superior genetics and proven cow families. Our bull battery has been refreshed with new names like Pay It Forward, Royal, Zuko and Harry, alongside our trusted sires like Accelerator, Frosty, Patron, Potential and Powerman. We've made some adjustments in our percentages, incorporating more Brahman genetics and then using new Simmental genetics to return to purebred Simbrah. These cattle are performing exceptionally well in the warmer, drier conditions we frequently experience.. We hope you enjoy Synergy XIX.

REAVIS FARMS

As we enter our 39th year as Simbrah breeders, we are as enthusiastic as ever about the limitless potential of the breed. Over the past few years, we've introduced new genetics into our program, using top Simmental sires to enhance our EPDs and carcass traits. Our bulls continue to excel in the Rio Grande Valley Beef Improvement Gain Test and we've sold more bulls this year than ever before. As our herd continues to improve, our focus remains on producing cattle that thrive in diverse environments, from rugged range conditions to the show ring.

In addition to our cattle operation, we run a diversified family farm growing grain, corn, cotton, sunflowers, and watermelons, with a particular emphasis on producing sweet 1015 onions. We invite you to visit our farm and see our cattle—we believe they would be valuable additions to your program. A special thank you to Tim Smith for his long-standing dedication to the Simbrah breed.

We look forward to seeing everyone at Synergy XIX.

MCCRARY FARMS

This year marks our 39th year as Simbrah and Simmental breeders, and we're thrilled about the high-quality cattle we're bringing to Synergy XIX. Mark and I are continuously refining our herd by leveraging the best sire power these breeds have to offer. If you take a closer look at our herd's pedigrees, you'll see the influence of many of the breed's greats. We are strong supporters of Simbrah youth development programs and actively sponsor numerous FFA and 4-H events. Located in the northeast corner of Texas, just south of DeKalb and near the Oklahoma, Arkansas, and Louisiana borders, we invite you to visit our farm anytime. We are proud members of the Synergy group and extend our heartfelt thanks to Tim Smith and the Smith Genetics Team for making Synergy the event of the year!

SMITH GENETICS

As we celebrate 19 years of Synergy, we are reminded of just how blessed we have been to build this event, this program and these relationships within the Simbrah industry. Smith Genetics remains steadfast in our commitment to excellence, and we are grateful for the breeders, exhibitors, juniors, families and friends who have helped make Synergy what it is today.

This event continues to grow and thrive because of the elite genetics and proven cow families that form the foundation of our program. We are especially proud of the remarkable success those genetics have achieved in the show ring. A major milestone was reached this spring as females bred in the Smith Genetics program captured every open and female championship at Cattlemen's Congress, Fort Worth Open and Junior, the San Antonio National Show, San Antonio Junior Show, Simbrah Superbowl, the International Show at Houston, Houston Junior Show, Austin, TJSSA Futurity, Simbrah Roundup and the AJSA National Classic.

That accomplishment is a tremendous testament to the generations of breeding decisions behind these cattle and to the strength of the cow families that continue to produce at the highest level. Just as important, we want to recognize the hardworking junior families who selected Smith Genetics. They not only claimed these championships, but also numerous division titles throughout the season. We are proud to play a part in their success and grateful for the confidence they place in our genetics.

At Smith Genetics, we remain committed to progressive breeding practices, incorporating genomic data alongside visual evaluation to make informed, long-term breeding decisions. Our goal is not simply to produce cattle that succeed in the show ring, but to develop genetics that can make a lasting impact in the breed.

Beyond the show ring, our dedication to youth development continues through the Smith Genetics Cow Camp, which has become a cornerstone opportunity for junior exhibitors and new breeders. We believe strongly in sharing knowledge, developing young cattlemen and women, and helping the next generation build a foundation for success.

Our operations span Texas and Kentucky, with an expanding registered horse division in Kentucky and growing Simmental numbers at our Giddings location. Each represents another opportunity to build on the foundation established over decades of hard work, faith and commitment to the livestock industry.

This year's Synergy sale lineup features genetics from some of our most influential cow families, including Bella Bella, Diva, She Moves, Juliet, Pop Star, Dream Girl, Nuanced. P770P-R770, and our new cow families Pop Star and Penny. Featured sires include Smith Steppin' Up Your Game, Smith Follow My Lead, Smith Like Never Before 328G and Something In Red (SIR), along with proven leaders such as Satisfies, Practical 42D, Smith Have No Fear, Smith Made Solid, Lubbock and Crockett.

As we look back on 19 years of Synergy, we are humbled by the many blessings that have made this journey possible. We are deeply grateful for your continued support, friendship and confidence in Smith Genetics. It is a privilege to once again host Synergy and bring together breeders, juniors and cattlemen who share our passion for the Simbrah breed.

We are proud of where Smith Genetics stands today, excited about where we are headed and confident that the cattle—and the program behind them—rank among the very best in the industry. Most of all, we are thankful for the opportunity to continue building, improving and sharing these genetics with you.

Welcome to Synergy XIX. We are glad you are here.

Thank you for your interest and support.

SEPTEMBER 26-27 • SMITH GENETICS, GIDDINGS, TEXAS

Cattle purchased Saturday PM can show on Sunday AM.

Showmanship is Saturday, Show is Sunday in this order: % Simmental, Purebred Simmental, % Simbrah and Purebred Simbrah.

SMITH BELLA BELLA 326R

Bella Bella-Ciao Bella-Mi Bella Cara-Bella Notte

Cow Family

SMITH CIAO BELLA-BELLA BELLA GRANDDAUGHTER.

SMITH MI BELLA CARA 312J-BELLA BELLA GRANDDAUGHTER.

THE COW THAT BECAME A LEGACY

Some great cows leave behind a champion. The truly exceptional ones build a family that keeps producing champions, donors, herd sires and sale features long after they are gone. Smith Bella Bella 326R did exactly that.

Bella Bella first established her place in breed history as the 2007 International Houston Champion. Four years later, her daughter Smith Ciao Bella captured the same prestigious title. Then, in 2013, Smith Charming Moves, a daughter of Bella Bella's influential son Smith Evan, became the first Simbrah ever named Supreme American Breed Champion at the Houston International. Three generations, three landmark victories and the beginning of a maternal dynasty whose greatest achievement has been its ability to keep delivering.

The Bella family wrote another impressive chapter in 2026. Sansom Smith Bella Ima Lil Sis was named AJSA National Grand Champion Percentage Female for Jakob Sansom. Smith TMP Bella Paula Teresa carried Gavin Hinckley to Grand Champion honors at the San Antonio Junior Show, while Smith Bella Miss Vienna 231M earned Superbowl Reserve Grand Champion Percentage Female honors for Morgan Crane. Three young exhibitors, three major victories and even more evidence that the Bella family continues to generate the kind capable of competing at the highest level.

Today, the Bella influence reaches far beyond the backdrop. Smith Ciao Bella, Smith Mi Bella Cara, Smith The Next Bella, Smith Isgrig Bella Notte, Smith CRC Bella Vive, Smith Bella Amelia, Smith Bella's Milestone, Smith TMP Bella Paula Marie and many more have carried the family forward as champions, donors and foundation females. The Bella sons have been equally important, with herd sires such as Smith Evan, Smith Rhett, Smith CRC Lubbock, Smith Detonator, Smith Emmitt, Smith Possibilities and Smith Like Never Before extending this genetic power into programs across the breed.

What began with one extraordinary female has grown into more than $1 million in sales—and that figure tells only part of the story. The Bellas have earned their reputation through longevity, fertility, maternal strength and the ability to produce the kind buyers recognize and want. They have generated cattle for the show ring, the donor pen and the front pasture, proving their value through different generations, blood percentages and matings.

Bella Bella and Ciao Bella may no longer walk the pastures of Smith Genetics, but their influence has never been more visible. Look through this offering and you will see their legacy written in the pedigrees, expressed in the phenotype and backed by generations of market demand.

This is not simply a cow family remembered for what it accomplished, it is a cow family still shaping what comes next.

SMITH THE NEXT BELLA 321B-BELLA BELLA GRANDDAUGHTER.

LOT 1

Smith Bella Bella Baby 333L is an easy-keeping, high-volume female with plenty of substance and brood cow power. A member of the renowned Bella Bella cow family, she traces to the International Champion Smith Ciao Bella and she brings generations of proven maternal strength and marketability. She ranks in the top 25% for API, supported by top 5% birth weight and top 10% calving ease rankings. Those figures, combined with her capacity and fleshing ability, make her the kind designed to produce efficiently and maintain herself while doing it.
AI'd to Smith Follow My Lead, ASA #3997767 on 8/19/26.

SHOW HER NOW, BUILD AROUND HER FOR GENERATIONS! Powerful over her top, bold through her center and still ladylike through her front, this outstanding young female is structurally correct and truly covers her tracks on the move. Smith Tulip Paige Lil Ann 765M is an own daughter of Smith No Better Than This, is halter broke and remains eligible for another year in the show ring. She qualifies for the Synergy Showcase on Sunday and the Superbowl this spring. Her maternal pedigree offers a rare connection to Smith Tulipe 765L, the dam of the legendary Smith Bella Bella and a remarkable cow that remained in production through 19 years of age. As a granddaughter of Tulipe, 765M carries built-in longevity from one of the most proven maternal lines in the breed. Bred to Smith Follow My Lead, she offers an exciting mating backed by tremendous cow-family strength and immediate marketability. We are retaining half interest because this unique connection to Tulipe is one we want working in our program for generations to come.

DAM: SMITH NU WAVE / SMITH BELLA BELLA / SMITH TULIPE 765L

Opportunities to own a direct daughter of the legendary Smith Bella Bella are extremely limited, making 853N an especially valuable breeding piece. Appropriately named Smith Because Ima Bella, this embryo female is sired by Smith Just Because, whose maternal pedigree traces through Smith SWFS Just A Diva to the celebrated Diva cow family. The result unites two of the breed's most recognized and marketable maternal lines in one powerful genetic package. Her data adds another layer of confidence, with rankings in the top 4% for calving ease, top 3% for maternal calving ease, and top 10% for birth weight and docility. She also ranks in the top 30% for API and top 35% for TI. Selling open and ready to mate to the sire of your choice, 853N offers the rare opportunity to build the next generation around genetics that have remained relevant and profitable for decades.
Open.

SMITH JUST BECAUSE-LOT 8 SIRE.

Fresh genetics backed by proven cow power make 100N an intriguing breeding piece. Her sire, Smith Can't Stop Being Good, is a promising young bull in the Smith Genetics and TMP Cattle Company programs. He is a son of Smith Follow My Lead and out of Smith Hagan Finesse 50A, a proven donor for Smith Genetics. On the maternal side, her dam, Smith Sweet Bella 100A, is sired by the proven, old-time Simmental bull STF Dominique R170 and traces directly to Bella Bella through Smith Sweet Bella. Her balanced data profile includes a top 20% Terminal Index and top 20% rankings for mature weight and carcass weight. She sells open and ready to breed to the bull of your choice, and every herd sire in the Smith Genetics program is available for use on this heifer. We recommend mating her to our red Simmental-influence sire, Rojo Vivo, whose cutting-edge genetics would add a fresh and highly unique dimension to this pedigree while creating even greater value in the resulting progeny. **Bred to Smith Grabs Matter of Fact, ASA #4719160 on 8/23/26.**

SMITH BELLA BELISSIMA-LOT 11 MATERNAL GRANDDAM.

Put plenty of circles and marks around 362P in your catalog! This red female is royally bred, but it is her power, presence and competitive edge that truly set her apart. A daughter of Smith Steppin' Up Your Game and out of the Bella Lila cow we own with the Sansoms, her pedigree unites the Bella Bella, Juliet and Diva cow families. She should be an easy-feeding project for a junior exhibitor, as she is naturally bold sprung and deep sided with the brood cow shape to stay fresh throughout a campaign. Just as importantly, she maintains the femininity, balance and eye appeal needed to separate herself in a competitive class. Her numbers support her long-term value, highlighted by a top 2% ranking for heifer pregnancy and top 15% TI. She is an exciting female, ready to show in the Showcase and eligible for both the Superbowl and Synergy Showcase for two years. This is the right kind to lead into the champion backdrop picture -- and trust me, when her show career is complete, she has the quality to make her way into the donor pen.

SMITH POP STAR 840F-
DAM OF LOT 14 EMBRYOS.

Pop Star
Cow Family

Last year, we introduced Smith Pop Star 840F as the foundation of an exciting new cow family. Today, her influence is no longer a prediction - it is being proven. A powerful daughter of Smith Detonator, Pop Star earned her place in the Smith Genetics donor lineup through the traits that matter most: fertility, maternal strength, a beautiful udder, heavy-milking ability and the easy-keeping design required of a productive beef cow.

Her daughter, Smith Fabled Farmer's Daughter 048M, campaigned by the Hill family, has carried that promise into the spotlight with multiple National and International Championship honors. Her success demonstrates this family's ability to produce elite show-ring cattle without sacrificing the functional qualities needed for long-term production.

With exciting daughters entering the program and fresh matings expanding its genetic reach, the Pop Star cow family is quickly becoming one of the most valuable and closely watched maternal lines at Smith Genetics. The debut created excitement—the next generation is turning that excitement into lasting influence.

Her full sister has collected the banners, but the greatest promise in this female may be the cow she is destined to become. Smith Like A Pop Star 840N is a full sister to multiple-time National and International Champion Smith Fabled Farmer's Daughter 048M and a direct daughter of Smith Pop Star 840F. Deep ribbed, capacious and easy keeping, she possesses the substance, structural integrity and maternal design needed to become a productive, long lasting brood cow that enters the donor line up quickly. Her data strengthens that outlook, with rankings in the top 2% for birth weight, top 4% for calving ease, top 10% for maternal calving ease and docility and top 20% for heifer pregnancy and TI. She is also red and homozygous polled, adding further breeding flexibility. The championship credentials establish the predictability of this mating, but 840N's future will be measured by the valuable progeny she produces. Think of the bulls in our program that are available for future matings and it gets real exciting. This is a NO BRAINER purchase if you truly want to make great ones, her picture alone gets me excited about her potential greatness!

Open. Selling ½ interest and ½ possession. Buyer can double the bid.

The Power of the *Cow*

Synergy has long been a collection of the most influential and powerful Simbrah genetics available. Smith Genetics and friends have procured, raised and invested in cutting-edge cow families that have produced in both the pasture and show ring, all because of the POWER of the COW. Most of the participants' lots, beginning on page 84, are built on the same solid cow foundation as the Smith Genetics lots are. The top and bottom sides of the pedigrees are loaded with the best cow families in the Simbrah breed, as well as the service sires. Invest with confidence in the POWER of the COW.

ONE PROVEN MATING. TWO DISTINCTIVE FEMALES. UNLIMITED DONOR COW POTENTIAL! Smith Diva's Dancin The 2 Step 020N and Smith You're My Diva 937N are full sisters to Smith Take Me 2 The Dance, the 2025 National Champion, Supreme Simbrah at the 2024 State Futurity, 2025 Fort Worth Grand Champion and 2024 AJSA National Classic Reserve Grand Champion. Sired by Smith Follow My Lead and out of the influential Smith Diva's Dancing Queen, these sisters offer the proven predictability of one of the most successful combinations within the Oprah-Diva Cow Family. Lot 19 is a striking black female with a feminine, balanced look; she is halter broke and ready to compete. Lot 20 presents an eye-catching red, blaze-faced and homozygous-polled package with added body, dimension and brood-cow shape. Their shared data adds another level of confidence, including rankings in the top 5% for calving ease and top 10% for birth weight, maternal calving ease and TI. The CHALLENGE is deciding which one best fits your program because both possess breed-changing potential. You will not find a more consistent mating than Smith Follow My Lead × Smith Diva's Dancing Queen—DON'T MISS OUT!

RED, WHITE AND READY FOR THE SPOTLIGHT! This beautiful red baldy has the baby-doll look and show-ring presence to be highly competitive. Smith Red Diva Diamond 20P is sired by National Champion Smith Easy Like 21J and out of the influential Smith Diva's Dancing Queen, giving her a proven foundation within the Oprah-Diva cow family. Two full sisters sold as half-interest offerings in the 2025 Synergy Sale and averaged more than $25,000, further demonstrating the consistency and marketability of this mating. Her eye-catching color and feminine presence will get her noticed, but her pedigree supports an even greater contribution after her show career. The BANNERS CAN COME FIRST, then expect this young female to earn her way into the donor pen!

Open.

LMC OPRAH 5P/50-LOT 21 GREAT GRANDDAM.

LMC BETM BARBIE 5Y/8-
SHE MOVES DAUGHTER.

The Power of the *Cow*

Some cow families make history once. The great ones keep rewriting it and continue paying their way in the pasture. At Smith Genetics, the She Moves cow family has developed into a dependable source of cattle that combine show-ring presence with the practical production traits required to improve a beef herd. Six generations deep, this line continues to deliver structural soundness, fleshing ability, maternal efficiency, performance and the kind of visual quality that commands attention.

Smith Charming Moves was a many-times champion, but her most prestigious victory came when she was selected Supreme Champion at Houston, the first time a Simbrah had ever claimed that distinguished honor. Her historic win placed the She Moves family in the national spotlight and demonstrated that Simbrah cattle could compete successfully at the highest level. Smith Paul Smiling Times proved that success was repeatable when she claimed the 2019 National and International Grand Champion Female titles. Smith 7N Sheza Barbie added major junior show victories before advancing into the donor program, where her ability to produce became even more important than the banners she collected.

The family's influence is equally powerful through its sons. TMP Smith Big Easy 614L swept the Grand Champion Bull titles at Fort Worth, the San Antonio National Show and the Houston International Show in 2025. His success demonstrates the ability of this maternal line to produce herd-sire prospects with the power, substance and structural integrity needed to influence future calf crops.

The championships earn recognition, but the production behind them creates lasting value. She Moves females are designed to maintain themselves, raise high-quality calves and remain productive while transmitting body, soundness and maternal strength to the next generation. Adding this family to a program is not simply an investment in a famous pedigree -- it is an opportunity to improve the quality, consistency and marketability of an entire cow herd. The She Moves family brings the look to win, the function to produce and the genetic strength to MOVE A PROGRAM FORWARD!

THE PROOF IS AT HER SIDE! A daughter of 2018 National Reserve Grand Champion Percentage Bull Smith Just Because, Smith Because I'm Movin 011H demonstrates why the She Moves Cow family is valued for far more than show-ring appeal. She has matured into a productive cow capable of raising the kind that can compete and advance a breeding program- just look at the BABY DOLL she is raising! Her red, polled heifer calf, Smith Mover & Shaker 011P, is an exciting daughter of Smith Follow My Lead with show ring written all over her. In addition to her striking design, 011P presents a strong data profile, ranking in the top 3% for birth weight and top 10% for calving ease, and maternal calving ease. Here is an opportunity to acquire a proven young cow from the She Moves family and a genetically valuable heifer in one package. Remember, the buyer receives two units of semen from any available bull in the Smith Genetics herd-sire battery to plan 011H's next mating. This calf qualifies for all Smith Genetics junior benefits including future Showcase and Superbowls. These two females are designed to improve a cow herd and MOVE A PROGRAM FORWARD!

BIG MOMMA. BIG OPPORTUNITY! Her name tells you what the picture confirms. Barbie is bold ribbed, deep bodied and capacious, with the substance and maternal shape needed to raise high-quality beef cattle. Sired by the champion-producing Smith Follow My Lead and backed by the Barbie branch of the She Moves Cow Family, she combines an attention-getting look with generations of dependable cow power. Her balanced data profile adds another layer of value, ranking in the top 10% for birth weight, top 15% for docility, top 20% for calving ease and maternal calving ease and TI. She sells bred to Smith TMP Cast No Doubt 337J, who has the backing of the Priceless Cow Family. If the buyer retains the partnership, the entire Smith Genetics herd-sire lineup will be available when planning her future matings. Study the picture, study the data and then get ready to bid—this female is built to produce VALUE!

Bred to SMITH TMP CAST NO DOUBT 377J, ASA #3967846, on 8/21/26. Selling ½ interest and ½ possession with the option to double the bid and own 100%.

A strong maternal foundation and a well-planned mating make this red, polled female an appealing breeding piece. Check out the sire power in 602M's extended pedigree because it combines three sires that all have produced National Champions: Follow My Lead, No Better Than This, and McCrary Smith Inspired. Her data strengthens the package, ranking in the top 2% for birth weight, top 10% for calving ease, maternal calving ease, docility and TI, and top 15% for heifer pregnancy. She sells safe in calf to Smith Steppin' Up Your Game, creating an exciting combination of balanced data, maternal strength and marketable Smith Genetics bloodlines.

MATERNAL STRENGTH IS BRED INTO EVERY GENERATION! Smith Angelic Barbie 58N is a black, polled granddaughter of the influential 5Y/8 cow and represents the Barbie branch of the She Moves Family. Her pedigree stacks Smith Follow My Lead, Smith Steppin' Up Your Game and Johnnie Walker - three sires whose daughters are recognized for maternal strength of fertility and milking ability. Her genetic profile supports that maternal foundation while adding valuable performance, with rankings in the top 10% for birth weight, carcass weight and TI, top 15% for calving ease and maternal calving ease, and top 25% for API. Selling open, 58N offers the flexibility to plan the mating of your choice around a pedigree loaded with built-in cow power. Remember two straws of semen from any of our bulls is available for use on this female. This is the kind of replacement female designed to strengthen a program for generations!
Open.

TRIPLE P JULIET

Great cow families are not defined by one champion or one exceptional calf. They establish their value by producing the right kind, generation after generation. The Juliet cow family has done exactly that, developing into one of the most dependable sources of maternal strength, performance and championship quality within Smith Genetics.

The family first stepped into the national spotlight through Houston Junior Show Champion-Wentz Smith Superior Y18 in 2012 and Houston International Champion Female-Smith Wentz CRC Keepsake in 2014. Their influence continued through daughters that became cornerstone donors and through Smith Steppin' Up Your Game, the Superior son whose ability to sire competitive, marketable cattle has made him an important part of the Smith Genetics herd-sire lineup. Smith Juliet Homecoming Queen 315L added more major honors including being crowned the 2025 Houston Junior Show Reserve Grand Champion Female, proving the winning tradition remained firmly in place.

Then came Smith Juliet Ashley Rene 215M. Her remarkable 2026 campaign included Grand Champion Female honors at the Cattlemen's Congress Open Show, Fort Worth Junior Show, Superbowl, Houston Junior Show and Houston International Show, along with National Reserve Grand Champion honors. She later earned Third Overall Cow-Calf Pair at the 2026 AJSA National Classic. That win is powerful evidence that the qualities making Juliet females successful in the show ring also allow them to excel as productive cows. Smith Juliet's Ashley Dawn 15N continued the family's momentum as the 2026 AJSA Fifth Overall Heifer.

The banners command attention, but the females working in the pasture give this family its lasting value. Juliet descendants combine femininity, performance and maternal function with the ability to raise calves possessing greater quality and marketability. They produce daughters capable of becoming donors and sons with the substance and structural integrity to become influential herd sires. Although Juliet passed in 2026, her influence is secure and will be carried forward through generations of daughters, sons, donors and champions. GENETIC POWER. GENETIC POWER. GENETIC POWER!

Open.

SMITH JULIET'S ASHLEY DAWN 15N-FULL SISTER TO LOT 32 AND SHOWED VERY COMPETITIVELY FOR JENNA TYLER.

SMITH RFI NUANCED 325W

The Power of the *Cow*

The Nuance cow family has built its reputation the way lasting maternal lines should - by producing females that look impressive, work efficiently and consistently add value to the next generation. Smith RFI Nuanced 325W established the foundation as a capacious, heavy-milking donor with tremendous body, a powerful hip and the ability to repeatedly raise high-quality cattle. Her progeny proved that attractive design, performance and practical cow-herd value could be combined in one dependable genetic package.

Smith RFI MC Clever 325D carried that influence forward and created another important link in the family's progression through her daughter, DMM Smith Sassy Cheyenne 325J, who not only won National Champion honors but proved her true value in production. Today, 325J is proving that the Nuance family's greatest strength is its ability to keep improving with each generation. The proof is in the progeny. Smith DMM Sassy Kiwi earned 2024 Houston Reserve Champion honors, while her full sister, Smith DMM Sassy Nuance 325M, combined the same striking look with an impressive data profile ranking in the top 15% for API and top 5% for TI. These females demonstrate that 325J can generate cattle with the presence to compete in the show ring and the genetic balance to become profitable producers after the banners are won.

From Nuanced 325W to 325D and now 325J, this family continues to deliver the traits progressive cattlemen demand: maternal strength, fleshing ability, soundness, performance and marketable eye appeal.
The Nuance family may be SUBTLE IN NAME, BUT ITS IMPACT IS UNMISTAKABLE!

Smith Nuanced Decisions 55N is a powerful black female with exceptional depth, capacity and brood cow substance, yet she remains balanced and attractive enough to return to the show ring. She retains another year of show eligibility, including the Showcase and Synergy events, before beginning what should be an exciting production career. Sired by Smith Follow My Lead and out of Smith RFI McCrary Nikki, a direct daughter of foundation donor Smith RFI Nuanced 325W, she represents a proven branch of the Nuance cow family known for generating maternal, easy-keeping and marketable cattle. Her data strengthens the package with rankings in the top 2% for birth weight, top 3% for calving ease, top 10% for docility, top 15% for heifer pregnancy and ribeye area, and top 25% for TI. Bred to the champion producing Smith Steppin' Up Your Game, 55N combines show ring opportunity, and PROVEN COW POWER!

AI'd to Smith Steppin' Up Your Game, ASA #3624619 on 8/20/26. Selling ½ interest and ½ possession with the option to double the bid and own 100%.

SMITH SWEET BELLA 232Y-
MATERNAL GRANDDAM OF PENNY.

The Power of the *Cow*

A cow family debut should arrive with more than potential, it should arrive with proof. The Penny cow family does exactly that. Its roots trace to Smith Sweet Bella 232Y, a direct daughter of the legendary Smith Bella Bella whose balance, structural quality and maternal influence helped establish another valuable branch of this celebrated lineage. Those Bella roots now flow through Smith BEEC Penny Can't Say No, the young donor owned jointly by Smith Genetics and the Pilat family who is quickly creating an identity all her own.

The defining quality of Penny's production has been consistency. Her daughter Smith Pilat Penny's Outtaline, campaigned by Kaden Pilat, has developed into one of the most decorated females of her generation. Her 2026 victories include Grand Champion Purebred honors at the American Junior Simbrah Roundup, Grand Champion Female at Austin and Reserve Grand Champion Female at the San Antonio and Houston Junior Shows. Outtaline has carried the Penny name into champion backdrops across Texas and proved that this family belongs in the spotlight. The family's momentum continues through two additional Penny daughters. Smith Pilat Penny's Clover 82N earned Reserve Calf Division honors at the Fort Worth Junior Show and Reserve Division honors at the Superbowl for Parker Pilat, while Smith Pilat Penny Hopeful Dawn has also collected purple for Zadie Kaye Bates and Smith Pilat Penny's Bet On Vegas has been competitive for Brynn Pilat. Different sires and different exhibitors are achieving the same result—powerful proof of Penny's ability to transmit quality with consistency.

The banners create excitement, but the production behind them gives this family lasting value. Penny descendants combine the attractive design and competitive presence expected from their Bella heritage with body, soundness, maternal function and balanced data capable of improving a progressive beef herd. They are built to compete, designed to produce and backed by genetics customers already recognize and want.

This family is positioned to become one of the next important maternal forces in the Smith Genetics and Pilat family joint program. THE PENNY FAMILY IS READY TO PAY DIVIDENDS!

Smith Pilat Penny's 4 Dollars 82N is a full sister to the highly decorated Smith Pilat Penny's Outtaline, making her another direct result of the proven Smith Follow My Lead × Smith BEEC Penny Can't Say No mating. This black, homozygous polled female combines a feminine, balanced profile with ample body, substance and the brood cow shape needed to remain valuable long after her show career. Her balanced data further supports her future, ranking in the top 15% for API and top 10% for TI. SHE IS MORE THAN OUTTALINE'S FULL SISTER, SHE IS A CHAMPION IN HER OWN RIGHT!
Open.

KADEN WITH HIS CHAMPION HEIFER, OUTTALLINE, A PENNY DAUGHTER.

Dream Girl 113S is the foundation of a maternal line that has developed into one of the promising cow families at Smith Genetics. Sired by the legendary CNS Dream On and out of TSC Breathless, Dream Girl combines proven maternal genetics with the fertility, longevity and production expected from a cornerstone donor. Her greatest claim to fame is her daughter, Smith CRC Breathtaker 113A, but

Dream Girl's influence continues through our new donor, Smith Dream Girl 915M.
Breathtaker is the female who moved this family from promise to proven performance. Sired by the legendary Smith Satisfies, she first established her reputation in the show ring while being campaigned by Carlye Rodenbeck. A many time champion during 2015, Breathtaker was named Grand Champion Cow/Calf Pair at the TJSSA Futurity and an AJSR Division Champion with her son, Smith CRC Reckoning, at her side.

Her lasting contribution has been made in production. Breathtaker earned her place in the Smith Genetics donor program after producing Reckoning, a powerfully constructed herd sire whose muscle, shape and moderate design brought additional recognition to the family. Her other sons have found success as competitive show steers, further demonstrating her ability to consistently transmit thickness, muscle and marketable quality.

Dream Girl also produced Smith Achieve 113F, a full sister to Breathtaker, and now adds another important chapter through Smith Dream Girl 915M. As 915M enters the Smith Genetics donor program, she represents the next generation of a family built on proven maternal genetics, championship success and dependable production.

With Dream Girl as its foundation, Breathtaker as its proof and 915M carrying the family forward, the Dream Girl-Breathtaker Cow Family is positioned to make an even greater impact on the future of the Smith Genetics program.

Her genetic profile strengthens the package with a top 20% ranking for TI, supported by top 5% birth weight and top 10% calving ease and maternal calving ease. Bred to Smith Steppin' Up Your Game, she carries an exciting mating with the potential to produce a highly marketable calf. We are retaining half interest because 50N is a female we intend to build the 50 cow family around. This is not simply an opportunity to purchase a donor-quality female it is an invitation to help DEVELOP THE NEXT GREAT SMITH GENETICS COW FAMILY!
AI'd to Smith Steppin' Up Your Game, ASA #3624619 on 7/26/26. Selling ½ interest and ½ possession with the option to double the bid and own 100%.

BUILT TO STAY. BRED TO PAY! Moderate, soft-made and efficient in her design, Smith Simply Snazzy 339N has the practical cow look that becomes more valuable with every calf. She is an own daughter of McCrary Smith Inspired, whose daughters have proven themselves as easy-keeping, fertile females with the maternal power and longevity to remain productive for years. Her maternal pedigree adds another level of predictability through the Schnazzie Cow Family. Foundation donor Smith NPCC Schnazzie remained productive to 17 years of age and was admired for maintaining exceptional udder quality late in life. Her balanced data ranks in the top 35% for API and top 30% for TI. Bred to Smith Follow My Lead, 339N offers a highly marketable mating backed by generations of maternal dependability. This is not a short-term investment, she is designed to BREED BACK, RAISE A GOOD ONE AND KEEP DOING IT!

SWEET GENETICS WITH LASTING VALUE! Smith Candy Kisses 428N is especially impressive through her front end, displaying the extension, refinement and added angularity we desire in our most productive cows. She carries forward the Candy family, which originated from one of the leading red Simmental lines developed within Smith Genetics through Smith KaraCandyRed. This family traces to the Kandi genetics acquired in 1995 and has remained relevant through generations of productive females.
Her pedigree combines 2023 National Grand Champion Percentage Bull Smith Isgrig Something In Red with Smith Steppin' Up Your Game, Smith Satisfies and KaraCandyRed, a lineup offering visual quality and maternal strength. Her balanced data ranks in the top 30% for API and top 15% for TI. Selling open and ready to breed to the sire of your choice, 428N offers a proven foundation with the flexibility to create the next successful generation. ADD A LITTLE CANDY TO YOUR PROGRAM - THE RESULTS COULD BE VERY SWEET!

THE VIEW FROM BEHIND TELLS THE STORY! Smith Pure Emerald 648N is exceptionally thick, wide based and stout made, carrying added dimension through her hip and quarter. From the side, she complements that power with length of body, a bold center and the practical brood-cow design that makes her a tremendous replacement female. At Smith Genetics, we value breeding from ¾ Simbrah cows because that extra touch of Simmental influence is often expressed visually through added muscle, shape and performance. Her maternal grandsire, Smith Emmitt 58G, is a son of International Champion Smith Ciao Bella, while the bottom side of her pedigree reaches through Smith RFI SWFS In Touch to the influential Topanga lineage. Her data brings measurable performance to the package, ranking in the top 5% for TI, top 10% for weaning weight, top 15% for yearling weight, docility and marbling, and top 20% for API. Bred to Smith Follow My Lead, this mating is designed to produce an exciting multigeneration ¾ Simbrah calf backed by power, maternal strength and proven marketability. POWER IN THE PASTURE. PERFORMANCE IN THE DATA. VALUE IN THE NEXT GENERATION!

AI'd to Smith Follow My Lead, ASA #3997767 on 7/13/26. Safe in calf.

STOUT COW POWER WITH NUMBERS TO MATCH! This black, polled ¾ Simbrah female is bold through her rib, capacious in her design and square over her hip, presenting the substance and maternal shape needed in a productive replacement. Her data supports that promise with rankings in the top 10% for weaning weight and TI, top 15% for marbling, top 20% for yearling weight, and top 25% for maternal weaning weight and API. These performance numbers are no surprise when you realize her sire, Revolution, was a top gaining Simmental bull at the Rio Grande Valley Bull Test. Bred to Smith TMP Cast No Doubt 377J, a son of Smith No Better Than This and donor Smith Priceless Gem 377A, she carries an exciting mating that adds the influence of the Priceless family and Smith Satisfies. Here is a female built to raise calves with added pounds, substance and marketability. COW LOOK. GROWTH DATA. A MATING WITH NO DOUBT!

SVF GOLD DUST R770

The Power of the *Cow*

Some cow families add a recognizable name to a pedigree. The great ones change the direction of entire breeding programs. Full sisters Shawnee Miss 770P and SVF Gold Dust R770 did exactly that. These influential ¾ SimAngus females combined performance, maternal strength and genetic versatility in a package capable of improving Simmental, Simbrah and SimAngus cattle for generations.

The production record of 770P is difficult to duplicate. She generated more than 36 registered progeny from numerous sires and repeatedly produced cattle that rose to the top. During one North American show, four of her progeny captured Heifer Calf Champion, Bull Calf Champion, Reserve Grand Champion Bull and Senior Champion Heifer honors. Her sons include WLE Uno Mas, WLE Twang and WLE Revolution, while her $42,000 daughter U409 further demonstrated the marketability built into this family. The Uno Mas branch continues to expand through WLE Big Iron E205 and his influential sons, including Smith Follow My Lead and WLE Smith Big Wig H39.

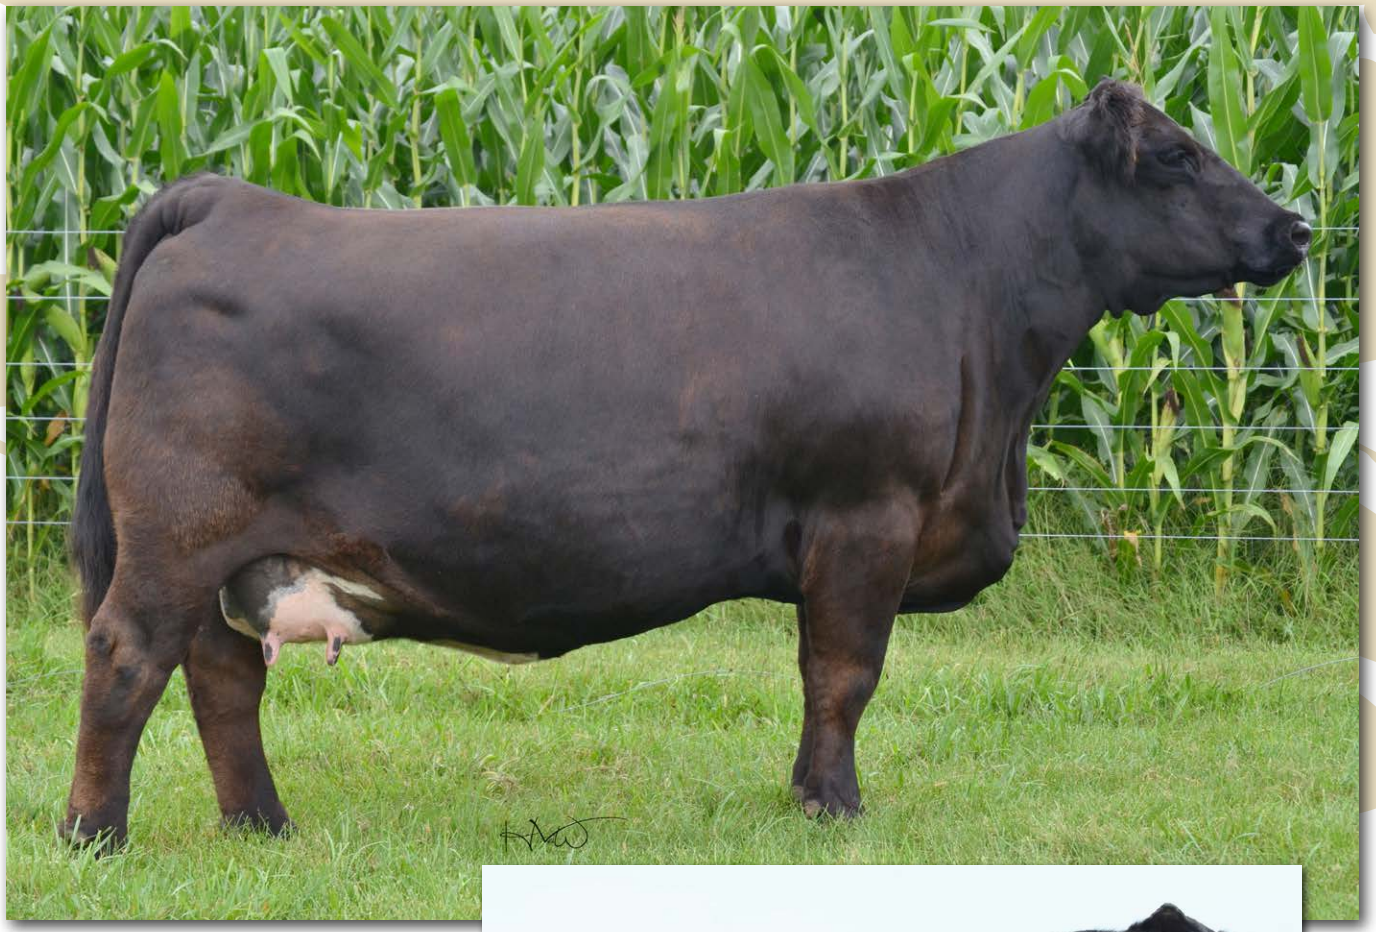

R770 created an equally valuable legacy at Smith Genetics. Her progeny include Smith William N Black, Smith Dream Carson and Smith Dusty N Black - sires that helped establish productive cow families and generate marketable genetics across multiple breeding programs. More than 15 daughters and granddaughters from the 770P–R770 lineage have anchored the Smith Genetics donor lineup, proving these sisters could produce far more than a single outstanding calf. They built females capable of breeding back, raising high-performing progeny and transmitting added muscle, substance and maternal quality.

That influence is still moving forward in this year's offering. Smith RFI Revolution 103J, a grandson of 770P, sired Lots 59 and 60. His daughters demonstrate the family's continuing ability to add visual power and measurable performance: Smith Pure Emerald 648N ranks in the top 5% for TI, while Smith Stacy Haley 168N ranks in the top 10% for both weaning weight and TI. These are not simply historical genetics—the proof remains visible in today's pasture and today's data.

The banners established their reputation, but production, predictability and profitability secured their legacy. The 770P–R770 family produces the kind that adds pounds to a calf crop, maternal value to a replacement pen and marketability to an entire program.

TWO SISTERS STARTED THE STORY - GENERATIONS OF GREAT CATTLE CONTINUE WRITING IT!

TWO SISTERS. ONE STANDARD. GENERATIONS OF PROFITABLE POWER.

SHAWNEE MISS 770P

WLE UNO MAS-SON OF SHAWNEE MISS 770P.

A MATERNAL LEGACY WORTH BUILDING ACROSS THREE BREEDS! Purdue Miss N523 was the heifer calf at the side of Shawnee Miss L612 when we purchased her dam from Purdue University to become another donor in our program. N523 is a powerful, homozygous-polled purebred Simmental female whose maternal line reaches through WLE Missy U409 directly to the influential Shawnee Miss 770P family. This is the kind of genetic flexibility we value because she can produce purebred Simmental, percentage Simbrah or SimAngus progeny while adding maternal strength, performance and marketability to each division. Our goal is to keep multiple generations of this family working throughout all three herds, which is why we purchased her dam. Now we are giving you the same opportunity with N523, a female possessing the substance, pedigree and long-term value to carry this maternal legacy forward. Quite simply—SHE IS THAT GOOD!

Open.

SHAWNEE MISS L612-DAM OF LOT 65.

She is an own daughter of MR NLC Upgrade U8676, one of the most respected performance and carcass sires in the Simmental breed. That influence is evident in her data, which ranks in the top 3% for yield grade and top 15% for weaning weight, numbers that indicate added muscle, performance and end-product value. Safe in calf following exposure to Smith Isgrig Something In Red and Smith TMP Cast No Doubt 377J, she is expected to deliver an exciting percentage Simbrah calf soon after the sale. FIVE YEARS OLD, IN HER PRIME AND READY TO CASH IN A COUPON!

ANGUS EFFICIENCY MEETS PROVEN SIMMENTAL COW POWER! Smith Lotsa Grace 107N is a homozygous polled SimAngus female sired by the famous Angus bull Circle M Tejas and backed by one of the most respected maternal lines in our program. Her dam, CMFM Gracie 107B, is a direct daughter of the original Gracie donor, WLE Gracie Babe Y854, making that influential female 107N's granddam. Y854 earned Grand Champion honors at San Antonio along with numerous major-show division and reserve division titles before establishing her lasting value in production. The practical, high-capacity design displayed by 107N is supported by maternal data ranking in the top 2% for heifer pregnancy and top 10% for dry matter intake. Here is a versatile breeding piece built to add fertility, efficiency and dependable cow power. SHE HAS LOTSA GRACE, AND EVEN MORE MATERNAL VALUE!

MEAT, MUSCLE AND MATERNAL CAPACITY! Smith Wiggle Worm 129N is packed with natural shape and dimension, combining a wide, powerful center with added substance through 1her hip and lower third. Her easy-fleshing design and tremendous middle provide the feeding capacity to utilize forage and the breeding capacity needed to maintain herself while raising a high-performing calf. Sired by WLE Smith Big Wig H39, her pedigree adds the influence of WLE Big Iron and MR NLC Upgrade. Her data reinforces the power displayed in her picture with rankings in the top 25% for $GN and top 30% for ribeye area. Bred to Smith Steppin' Up Your Game, she carries a percentage Simbrah mating designed to blend her Simmental muscle and fleshing ability with proven maternal strength and marketability. BUY THE CAPACITY. BREED THE POWER. MARKET THE RESULTS!

DAM: SMITH MADE SOLID / SMITH DIVA FRIENDLY FACE 220L / SMITH SWFS JUST A DIVA

If you're looking for a show heifer, stop right here! Smith TMP Diva Smiling Face is one you'll want to consider. She is show broke and ready to go on Sunday! Her name tells you all you need to know about her pedigree. She is from the Diva Cow Family, a great granddaughter of the Diva cow and a daughter of Smith Diva Friendly Face, Jacob's show heifer from two seasons ago. She is sired by Smith TMP Cast No Doubt 377J, one of our exciting new sires out of our Smith Priceless Gem 377A donor cow. She combines these two great cow families, Diva and Priceless. Also in her pedigree are Smith No Better Than This, Smith Satisfies, and Dream On. She is in the top 15% of the breed for birth weight and top 10% for docility. Smiling Face is a black, polled, full-bodied, well-balanced calf with an extended front end, level topline and square hip for the show ring look, plus the ability to have a successful career as a production cow with upside potential as a donor. This is one we hate to let go, but we felt we needed to offer a halter broke show prospect in the sale and we can't show them all. Study her carefully and mark her as a buy! Offered with Smith Genetics.

Pasture exposed to Smith Head Shakin 14L, ASA #4695521, from 7/25/26 to 9/17/26. Pregnancy information available on sale day.

SIRE: SMITH FOLLOW MY LEAD / SMITH CAN`T STOP BEING GOOD / SMITH HAGAN FINESSE 50A
DAM: SMITH PRACTICAL 42D / SMITH BRITE STARS / SMITH BURCH GO JANE 199Y

Twinkling Stars is a polled red purebred Simbrah female that we are offering as a breeding prospect. Probably the best way to describe her is balanced and complete. She is a long-bodied, square-hipped heifer with enough depth, muscle and volume to catch the cattleman's attention. She has straight lines and an extended front to balance her out. Her dimension screams maternal prospect. She is the daughter of Smith Brite Stars, a Smith Practical 42D daughter out of a Smith Isgrig Charismatic daughter. Practical traces back to WHF Devils Cut A245 and Smith Satisfies. Twinkling Stars is sired by Smith Can't Stop Being Good, one of our young Simbrah herd sires. He is a Follow My Lead son by Smith Hagan Finesse 50A. Twinkling Star's genetics earn her a place in the top 3% for calving ease, top 10% for birth weight, top 50% API, and top 35% for TI. She is exposed to Smith Head Shakin 14L, who is a purebred Simmental bull, a Copacetic son out of Smith R770's Dream n Black. The resulting offspring will be a percentage Simbrah. She is an extremely docile heifer, ready to place in your herd. Don't pass on this one!

Pasture exposed to Smith Head Shakin 14L, ASA #4695521, from 7/25/26 to 9/17/26. Pregnancy information available on sale day.

DAM: SMITH JUST BECAUSE / **SMITH FUTURE SITES** / TRIPLE P RHILEY

Fancy Sites is polled grey purebred Simbrah heifer that is being offered as a breeding prospect. Don't let the coat color fool you! To quote Dr. Ben Estes, "… my favorite color is GOOD!" And this calf is good. She is a deep bodied, full ribbed heifer with lots of maternal appeal. She is big boned and travels well, and is balanced, with straight lines and a big hip. Fancy Sites is sired by Smith Can't Stop Being Good, one of our young Simbrah herd sires and a Follow My Lead son by Smith Hagan Finesse 50A. Her dam is Smith Future Sites, a Just Because daughter out of an NF Smith Sargeant daughter. Just Because is from the Diva Cow Family and is sired by Smith Stout N Black. Fancy Sites EPDs place her in the top 10 for both calving ease and birth weight, top 50% for API, and top 45% for TI. She is exposed to Smith Head Shakin 14L, who is a purebred Simmental bull, a Copacetic son out of Smith R770's Dream n Black. The resulting offspring will be a percentage Simbrah. This is another docile heifer looking to take her place in your herd.

SIRE: SMITH FOLLOW MY LEAD / **SMITH CAN`T STOP BEING GOOD** / SMITH HAGAN FINESSE 50A
DAM: SMITH ADVENTURER 814F / **TMP NITE SITES 333K** / SMITH FUTURE SITES

Night Glow is a polled black purebred Simbrah heifer who is offered as a breeding prospect. We would love to keep this one, but we want to share our good ones. She is a balanced, full bodied, big ribbed maternal prospect with the extension and looks of a show heifer. She has enough muscle, enough bone and enough dimension to make a good production cow. Night Glow is sired by Smith Can't Stop Being Good, one of our young Simbrah herd sires and a Follow My Lead son by Smith Hagan Finesse 50A. Her dam is TMP Nite Sites 333K, a sister to TMP Fancy Sites 333N who is offered in this sale. Nite Sites is a Smith Adventurer daughter, with Just Because and Wentz Smith Superior in her pedigree. Nite Glow's EPDs place her in the top 5% for both calving ease and birth weight, top 50% for API, and top 35% for TI. She is exposed to Smith Head Shakin 14L, who is a purebred Simmental bull, a Copacetic son out of Smith R770's Dream n Black. The resulting offspring will be a percentage Simbrah. This is yet another docile heifer that you should be happy to take home.
Pasture exposed to Smith Head Shakin 14L, ASA #4695521, from 7/25/26 to 9/17/26. Pregnancy information available on sale day.

SMITH JULIET ASHLEY RENE 215M-INTERNATIONAL AND HOUSTON JUNIOR SHOW CHAMPION FOR OUR GRANDSON, JACOB.

JACOB AT HOUSTON JUNIOR SHOW.

Scented Rose is a polled red purebred Simbrah heifer that we offer as a breeding prospect. This is the youngest heifer we have in the sale, but just as balanced and complete as the rest and one of my personal favorites due to her disposition. She is another complete type of calf with plenty of rib, plenty of depth, and plenty of bone to give her a strong maternal look. Scented Rose is sired by Smith Can't Stop Being Good, one of our young Simbrah herd sires and a Follow My Lead son of Smith Hagan Finesse 50A. Her dam is Smith Fragrant Rose 9E, a Smith Satisfies daughter out of a Smith Tyson daughter. Her EPDs put her in the top 10% for both calving ease and birth weight, top 15% for docility, and top 45% for TI. She is exposed to Smith Head Shakin 14L, who is a purebred Simmental bull, a Copacetic son out of Smith R770's Dream n Black. The resulting offspring will be a percentage Simbrah. Scented Rose is a docile heifer that will fit right in wherever she ends up.

	SMITH OAKLEYS MOON	SMITH CRC PERFECT ROSE

Replacement females of this caliber and pedigree are not easy to find! She ranks in top 25% of the breed for TI and she is the easy keeping kind. Her dam stems from the Nu Perfection cow line that was campaigned successfully by the Rodenbeck family. Nice female bred to the Jammin' Jason bull representing the Diva Cow Family. These are the kind that raise a big calf each year and have built in longevity to breed for many years!

Pasture exposed to Smith Jammin' Jason, ASA #4559109 from 7/30/26 through 9/15/26.

Using Indexes to Advance Your Program

By Wade Shafer

Economic selection indexes were first introduced by Iowa State scientist, Lenoy Hazel, in 1943. Best described as "genetic accounting", economic indexes blend an animal's genetic levels along with commodity prices to predict the impact the animal will have on profit when used for breeding. Economic indexes have long been accepted by animal geneticists as the most effective means of making genetic progress for profit and, consequently, have been heavily utilized by the pig, poultry and dairy industries for years. Not surprisingly, the genetic progress made on those species through the use of indexes has been phenomenal--far eclipsing the progress made in beef cattle. By using ASA's All Purpose and Terminal Indexes, you too can leverage the power of the economic selection index - there is no better tool in the beef industry for making selection decisions!

THE CURRENT SIMBRAH AVERAGE FOR API 85.2

THE CURRENT SIMBRAH AVERAGE FOR TI 59.5

Tremendous pedigree on this young female that touts great performance with a top 10% ranking for both Calving Ease and Birth Weight and balancing into a top 45% for TI. Her dam is a donor at Smith Genetics and her sire Smith A.R.C. No Kidding is a son of the National Champion Smiling Cows donor. Great pedigree – Great numbers – built in breed notoriety for easy marketing of top calves. Buy with confidence!

Scholarship PROGRAM

GERTRUDE SMITH

MARILYN NIESCHWIETZ

RODRIGO DA SILVA

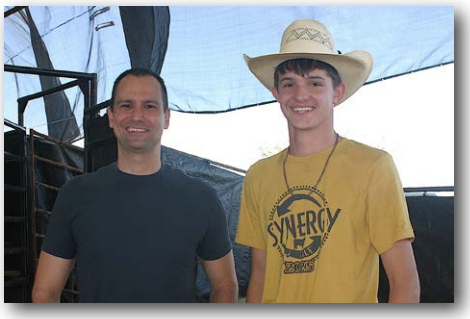

Now in its fifth year, the Synergy Scholarship Program awards $1,000 scholarships to outstanding youth, helping support their educational goals while honoring the legacies of the families who make the program possible.

The program was launched by the Smith Family of Smith Genetics and the Nieschwietz Family of 7N Ranch, with the Rodrigo Da Silva Family joining the effort in 2023. United by deep interests in agriculture, the families share a commitment to encouraging young people to pursue their education, remain connected to agriculture and become advocates for the industry, regardless of the career path they ultimately choose.

Each scholarship carries a special family legacy. The Smith Family Scholarship honors the lasting contributions of the late Paul and Gertrude Smith. The Nieschwietz Family Scholarship pays tribute to the memory of Pete St. Nieschwietz while recognizing the continuing dedication of Marilyn Nieschwietz.

The Rodrigo Da Silva Scholarship grew from Rodrigo's experience judging the program's first group of candidates. Impressed by their knowledge, confidence and communication skills, he was inspired to establish a scholarship in his family's name and continue the program's mission of investing in the next generation.
Together, these scholarships represent more than financial assistance. They reflect a shared belief in the potential of young people and the importance of encouraging the next generation to learn, lead and make a difference in agriculture and beyond.

The requirements for the scholarships can be found on the Synergy tab at www.smithgenetics.com.

Gavin Hinckley received the $1,000 2025 Da Silva Scholarship and he is pictured with Rodrigo Da Silva.

Savannah Daniels (l) received the Nieschwietz Family of 2025 7N Ranch $1,000 scholarship. She is pictured with Pete Nieschweitz.

Callie Heaton received the Smith Family of 2025 Smith Genetics $1,000 scholarship. Pictured (l to r) Tim Smith, Callie Heaton, Chris Baker, Jenny and Bill Smith, Haley Smith, and Margaret and Rock Boesch.
