Switch to
beauty

Striking beauty

Looking to make a statement in your home with switches?

With Niko's interchangeable push buttons and flush surround plates, you'll inject colour into your home in a flash. All the devices and flush surround plates in the Niko range are compatible and perfectly interchangeable.

It's all in the
details

Turn switches, thermostats and numerous other Niko applications into bold eye-catchers.

With our entire range of pure lines and shapes, nothing could be easier.

And our carefully selected materials offer elegant solutions for every interior style.

But you will find that the other
switches blend into your interior with
just as little effort.

From white to white, or black to black,
or one of the many other matching
colour tones you can pair.

Our
wide range

The actual colours may vary from the colours shown in this brochure.

Switch to
intelligent living

Your home works better with
Niko Home Control

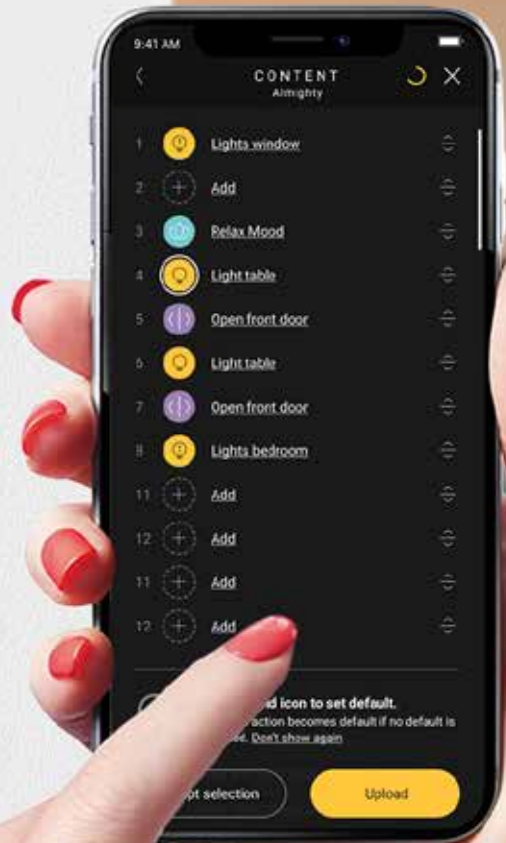

Home automation for every home

You want to make your home a comfortable, energy-efficient and safe place. And perhaps even prepare for old age. Choosing a smart home doesn't have to be difficult. Even if you have a renovation project where you don't want to modify the cabling in any way. One thing is certain: with Niko Home Control, you're in safe hands. Because you can make any home smart, at any time.

A finger on the pulse of your home

Intelligent safety

Rest assured. Niko keeps an eye on your property while you are out enjoying life. But if something does seem suspicious, you can simply push the panic button and the lights and music will come on. A deterrent effect guaranteed. No one at home? No one will know. Simulate your presence with lighting and roll-down shutter control. That's how you can turn worry into peace with Niko.

Reduce your consumption

Intelligent consumption

Managing and adjusting your electricity, water and gas consumption effortlessly? With Niko Home Control, you know exactly how much energy you consume. Not only does it help you consume responsibly, it will also encourage your family to consume less. And the all-off button is your first step towards a greener direction. Niko and eco have been going hand in hand for many years. Offering solutions that benefit you, your family and the entire world.

Intelligent comfort

Niko Home Control is the heart of your home. Using the central display at home or your mobile device, you can control your entire property in the blink of an eye.

Making sure your living room is nice and warm by the time you get home? Lowering the roll-down shutters and dimming the lights with a few clicks? You can do it all with Niko. Because Niko Home Control works precisely according to the way you think: practically, intuitively and effectively.

Switch to
smart solutions

Choose a smart dimmer

Strong in light. That is the least you can say about Niko dimmers.

With a simple turn or press of the button, you can perfectly match the light in every room with the current mood. At Niko, you will find a dimmer for every type of lamp.

Playing with colour

Red for a romantic evening. Or perhaps blue, for a relaxing afternoon of games? With the Niko LED strips, the possibilities are endless. And with the wireless wall control, you can create moods at the touch of a button.

Light when you need it

Going down the cellar stairs with a heavy box in your hands. If only there was someone around to turn on the light... Niko motion detectors placed in strategic locations will save the day. The light switches itself on and then off again.

A permanent charging point

The USB charger for mounting in a flush-mounting box puts an end to the piles of chargers lying about your home. All devices that can be charged via USB can now be charged quickly and efficiently from one single charging point. You can choose between a dual USB-A charger or a USB-A and USB-C charger.

Multimedia in every room

Digital or analogue television, audio, data, ...

These days, a home needs so much more than simply electricity. Everything you need, you will find at Niko. This means you'll be connected with the world in every room.

An eye for safety

Safety, always and everywhere

Play it safe with Niko. Because you need 100% reliable products to turn your home into a carefree and warm nest for yourself and your family.

One push of the button is enough to find out who is at the door thanks to the Niko intercoms and videophones. Not only do the motion detectors shine a light on your path the minute you get home, they will be the first to tell you when someone else approaches your house. Orientation lamps inside will also provide you with the optimal light conditions for nightly visits to the toilet.

A need for electricity in a damp environment? With the Niko Hydro splashproof socket outlets, you can rest assured. Water your patio plants and clean your car with a pressure washer, without worry.

Switch to
ecology

Niko, best friends with the environment

Niko equals eco design. From the early product design stages, we limit our environmental impact.

For instance, we work only with low environmental impact materials. And all plastic waste is ground and 100% recycled. That is part of Niko's commitment to reduce its ecological footprint day after day.

At Niko, we put energy into low energy consumption

Choosing Niko means choosing conscientious energy use. All of our products are developed to help you consume less and use your own solar energy as much as possible.

With Niko's motion sensors, LED strips and eco display, you have everything you need to make sure your energy bill keeps falling.

Switch to Belgian quality

Designed in Belgium according to the strictest standards

Pure Belgian quality: that is what you get with Niko. Switching material, access control, lighting control and home automation are thoroughly tested during and after the production process, re-tested and... tested again, just to be on the safe side. Enough to give you a guaranteed life span of minimum 30 years for all switches and 2 years of extra warranty on top of the legal warranty period.

Because it's hard to beat '**Designed in Belgium**', the label we are proud of.

Niko designs electr(on)ic solutions to enhance buildings to better suit the needs of the people who live and work in them. This is achieved by using less energy, improving lighting comfort and safety and making sure all applications work together seamlessly. Buildings with Niko solutions are more efficient, controllable from a distance, and interact within larger ecosystems. Niko is a Belgian family business based in Sint-Niklaas, with 600 employees and 11 European branches.

At Niko we ask ourselves just one question every day: "How can we enhance buildings to better suit your needs?"
