

What happens on online... matters.

Today's savvy buyers expect more than just property photos when searching online for the perfect home. **A Virtual Tour showcases your home at its best and truly speaks to a buyer!**

Your Agent has invested in VoicePad®, an Automated Property Marketing system that includes **a Narrated Virtual Tour and YouTube Video of your home!**

- **Virtual Tours** are automatically created from your listing information with narration in both **English & Spanish**.
- Potential buyers can **share** this tour with others, **save it**, or **request more info**.
- **The YouTube Video** can be searched for by your home's address.
- **Your Agent's contact info is shown** so buyers can get in touch right away.
