

# CONCRETE FLOOR REFINISHING

## FLOOR REFINISHING

Perfect for existing concrete floors. We deep clean, repair, remove stains, rebuffer, burnish & re-apply wax (if necessary).

**MODE CONCRETE offers free onsite appointments + written quotes. Email us to arrange your onsite quote from Gareth.**

## CRACK & CHIP REPAIR

We are experts at repairing cracked or damaged concrete. Our artisans take a color chart onsite to match the concrete color perfectly to each project. Price depends on each project.

**Every few years you should get your concrete floor deep cleaned, cracks addressed and any stains removed.**

### How do I properly care for my concrete floors?

Dry or wet mop (use warm water), sweep, or vacuum whenever necessary. Use PH-neutral, non-acidic natural cleaners to ensure nothing strips the concrete. Maintenance & refinishing, totally depends on wear and tear and the client's preference. Some customers like a pristine highly reflective concrete floors (re-wax required every few years), while others like a more worn down, industrial, high patina, raw surface look. We can help maintain or give advice on all concrete floors!

Highly trusted long time pros. **Owner Operator** onsite every project! MODE CONCRETE is the best in the Valley. We are a highly recommended & highly rated. We specialize in artisan concrete floors and surface treatments. **Family owned and operated, located in Kelowna BC since 2008.**
