

| Product | Wooden formwork H2O beams | | | | | | | | | | | | | | | |
|--|--|--|--------------------|------------------------------|-------------|---------------------------|--|--------------|-------|----------|-------------|-------|---------------------|---------------|-------|--------|
| Wood species | Spruce | | | | | | | | | | | | | | | |
| Wood moisture | 12 % +/- 2 % at delivery | | | | | | | | | | | | | | | |
| Weight | 4,5 kg/m | | | | | | | | | | | | | | | |
| Gilding | Melamine resin based adhesive, adhesive type I EN 301 - approved for use with load bearing timber components | | | | | | | | | | | | | | | |
| Surface protection | Water repellent colour glaze is used to ensure the beam is waterproof | | | | | | | | | | | | | | | |
| Chord | <ul style="list-style-type: none"> Made of carefully selected spruce wood Finger-jointed, solid wood cross-sections, dimensions 80 x 40 mm Web-milling on the opposing side of the core (left-sided chord surface) Planned and chamfered to app. 0,4 mm | | | | | | | | | | | | | | | |
| Web | 3-ply solid wood panel, laminated, vertical growth-ring orientation | | | | | | | | | | | | | | | |
| Surface protection | The entire beam is treated with a water-resistant colour stain | | | | | | | | | | | | | | | |
| Support | Due to the 3-ply solid wood webs, Extrabeam H2O and Extrabeam H2O+ can be cut into and supported at any length | | | | | | | | | | | | | | | |
| Dimensions and tolerances | <table border="1"> <thead> <tr> <th>Dimension</th> <th>Value^a</th> <th>Tolerance^b</th> </tr> </thead> <tbody> <tr> <td>Beam height</td> <td>200 mm</td> <td>± 2 mm</td> </tr> <tr> <td>Chord height</td> <td>40 mm</td> <td>± 0,5 mm</td> </tr> <tr> <td>Chord width</td> <td>80 mm</td> <td>+ 0,8 mm / - 1,2 mm</td> </tr> <tr> <td>Web thickness</td> <td>28 mm</td> <td>± 1 mm</td> </tr> </tbody> </table> <p>a) These values apply to a wood moisture content of 12 % ± 2% b) According to the standard SIS 7 EN 13377-2002</p> | Dimension | Value ^a | Tolerance ^b | Beam height | 200 mm | ± 2 mm | Chord height | 40 mm | ± 0,5 mm | Chord width | 80 mm | + 0,8 mm / - 1,2 mm | Web thickness | 28 mm | ± 1 mm |
| Dimension | Value ^a | Tolerance ^b | | | | | | | | | | | | | | |
| Beam height | 200 mm | ± 2 mm | | | | | | | | | | | | | | |
| Chord height | 40 mm | ± 0,5 mm | | | | | | | | | | | | | | |
| Chord width | 80 mm | + 0,8 mm / - 1,2 mm | | | | | | | | | | | | | | |
| Web thickness | 28 mm | ± 1 mm | | | | | | | | | | | | | | |
| Technical specifications | <table border="1"> <tr> <td>Qualities</td> <td>DIN1052-1:1988-04</td> <td>DIN1052:2008-12 / Eurocode 5</td> </tr> <tr> <td>Strains</td> <td>Permissible stress values</td> <td>Characteristic limits of load-bearing capacity</td> </tr> </table> | Qualities | DIN1052-1:1988-04 | DIN1052:2008-12 / Eurocode 5 | Strains | Permissible stress values | Characteristic limits of load-bearing capacity | | | | | | | | | |
| Qualities | DIN1052-1:1988-04 | DIN1052:2008-12 / Eurocode 5 | | | | | | | | | | | | | | |
| Strains | Permissible stress values | Characteristic limits of load-bearing capacity | | | | | | | | | | | | | | |
| Shearing force | ZUL Q = 11,0 kN | | | | | | | | | | | | | | | |
| Bending moment | ZUL M = 5,0 kNm | | | | | | | | | | | | | | | |
| Support | - | | | | | | | | | | | | | | | |
| Section modulus¹ | $W_s = 461 \text{ cm}^3$ | | | | | | | | | | | | | | | |
| Geometrical moment of inertia¹ | $I_g = 4,613 \text{ cm}^4$ | | | | | | | | | | | | | | | |
| Elasticity modulus | $E = 10.000 \text{ N / mm}^2$ | | | | | | | | | | | | | | | |
| Shearing modulus | $G = 600 \text{ N / mm}^2$ | | | | | | | | | | | | | | | |
| | <i>1) The values of the section modulus and the geometrical moment of inertia acc/ to new or used concrete formwork beams. An analogously increased factor of safety needs to be added for severely worn beams.</i> | | | | | | | | | | | | | | | |
| Standard lengths | 1,95 / 2,45 / 2,65 / 2,90 / 3,30 / 3,60 / 3,90 / 4,50 / 4,90 / 5,90 / max. 6 m | | | | | | | | | | | | | | | |
| Packaging | Standard packaging: 50 pcs package / Container packaging: 100 pcs package The formwork beams are packed in protective packaging. The packages can be easily lifted and moved with a forklift. They are ready for immediate use at the construction site | | | | | | | | | | | | | | | |

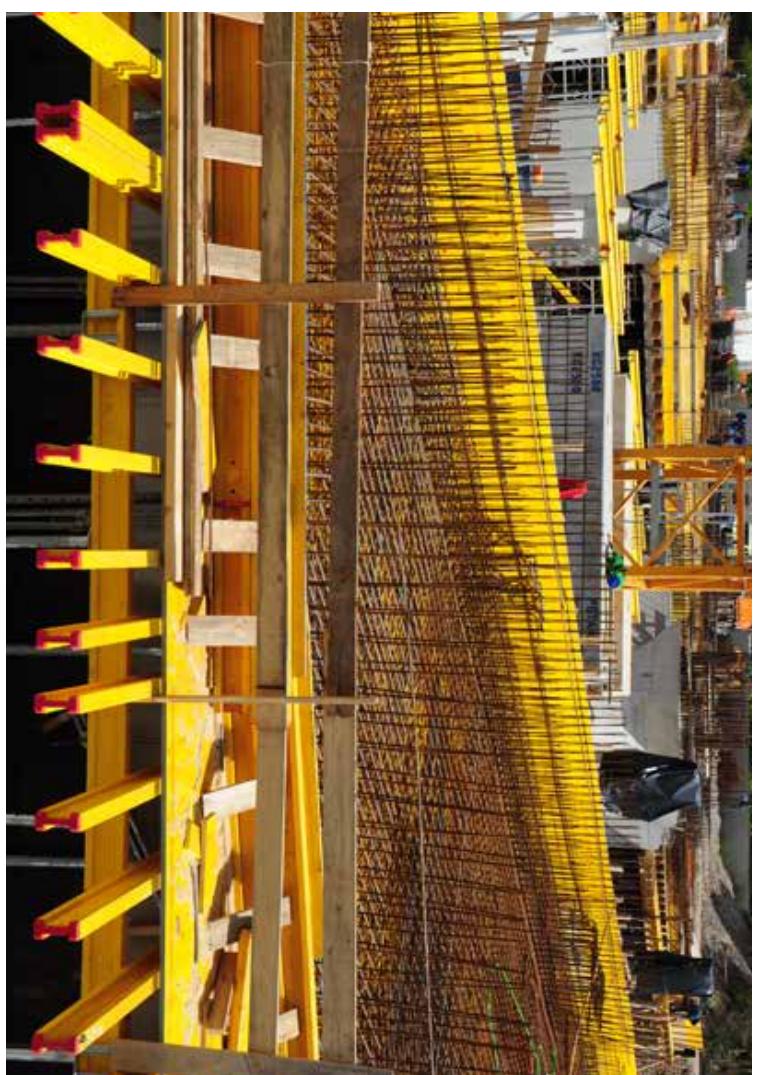

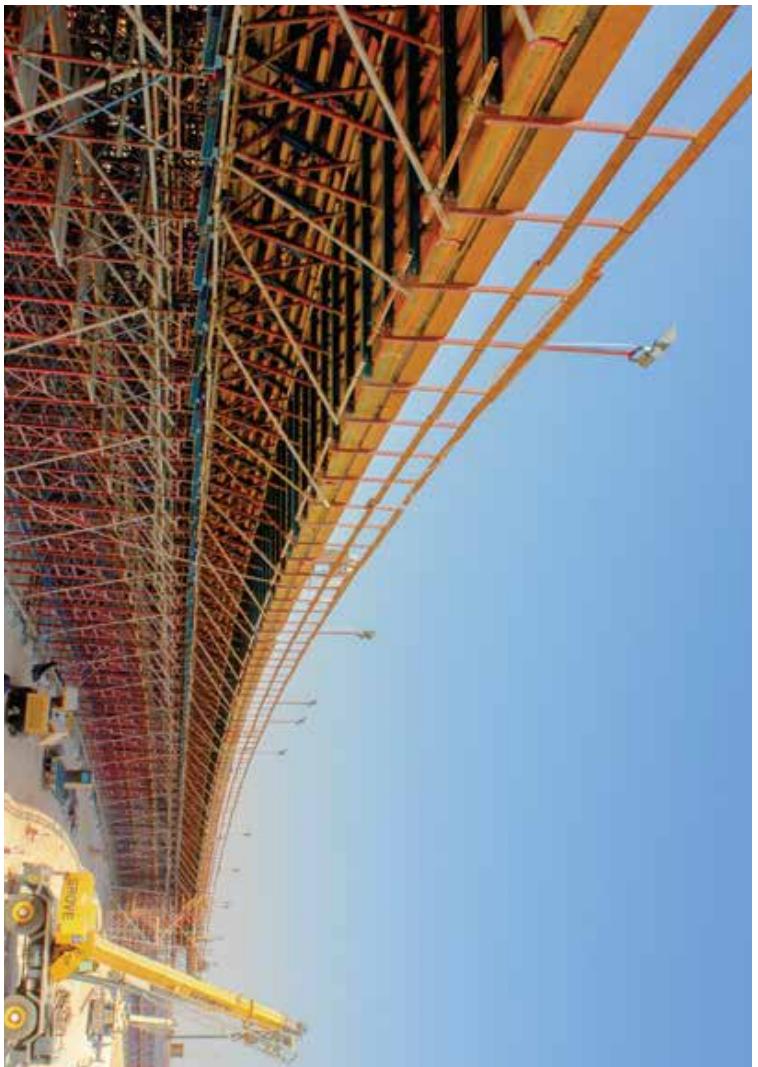

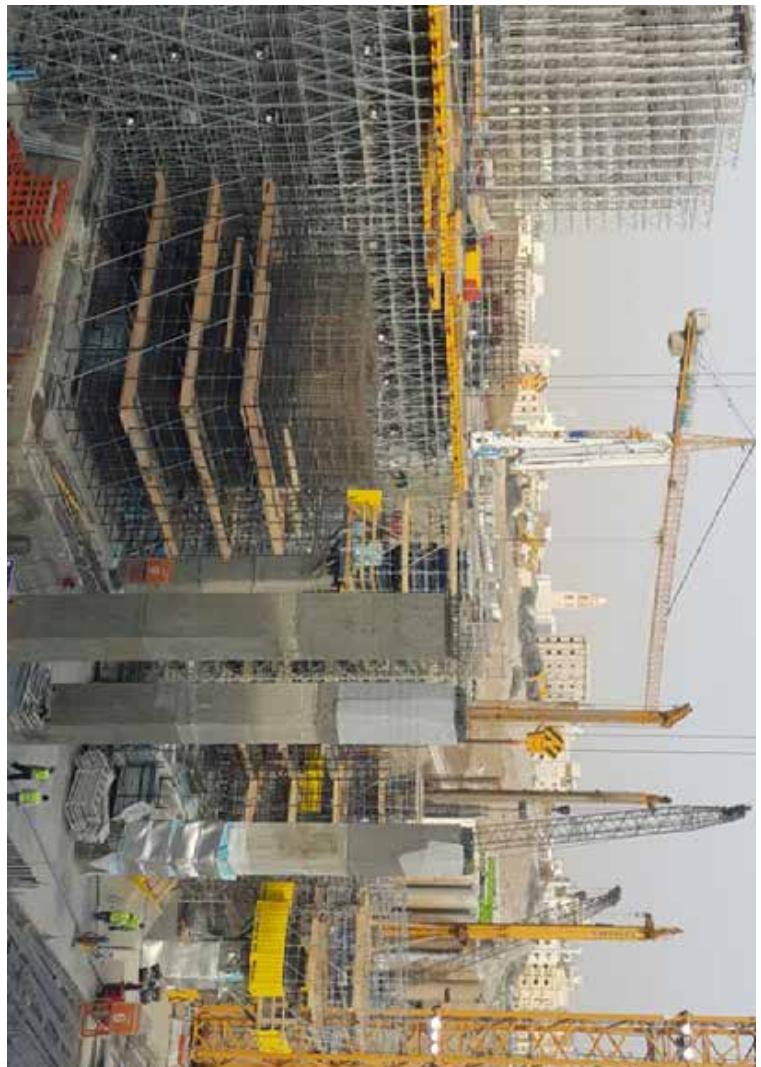

Chart of charge values

Max. permissible support width
= distance between supports (m)

| Floor thickness (cm) | Total load (kN/m ²) | Max. permissible support width of the crossbeam (m) = distance between main beams (m) | | | | | | | | | | | | |

Bending which occurs in formwork beams that are loaded by a particular force at different space intervals of support.

Single span beam

Multi span beam

An example of calculation: Floor thickness: 20 cm, distance between crossbeams: 0.75 m; we are looking for the distance between the main beams and the supports. The permissible distance between the main beams according to the **table 1 = 2.60 m**. The identical or the closest distance between the main beams in the **table 2 = 2.5 m**. Look for the permissible distance between supports in the **table 2**, read vertically down the column "2.50 m" and horizontally in the row "20 cm" of the column "floor thickness", the result is **1.28 m**. Caution: Examine the supports to ensure the corresponding carrying force.
