ARIESCOR® WATER
ENGINEERING WATER EVERYWHERE

Company Profile

About the Company

ID: 71-910-6668

Ariescor Water is an engineering firm dedicated to providing smart water management solutions. With experience across both private and public projects, we understand the ins and outs of small-scale projects to the never-ending standards and guidelines of large-scale government infrastructure. It is second nature to us—the Ariescor Water DNA.

We envision a Philippines where every region has access to clean, usable water, hence the words **Engineering Water Everywhere**. It is non-negotiable that we only take part in projects that value sustainability and make a positive environmental impact.

Mission

To bring sustainable water management in the Philippines by providing most economical technologies for the benefit of the people.

Create

We aim to be a leading smart advance technology that proposes the best environmental and cost-saving solutions to meet and comply all the required parameters for different industry and capacities.

Vision

To be recognized as the leading product developer and service provider of sustainable water and wastewater treatment technology in the Philippines.

Help

We focus to provide the best of the services to satisfy all the requirements of our key clients and customer in economical ways

GRANUA®

The Granua® (Formerly BioGraS®) is a ongoing patent featuring a compact and advanced high-rate biological system. It boasts minimal electricity usage and near-zero chemical dependency. Boasting a smaller footprint compared to the traditional STPs, it fits easily in limited places while also cutting capital and maintenance costs.

BioCar™

The BioCar™ is a ongoing patent featuring a modified and advanced Moving Bed Biofilm Reactor system. With a relatively small footprint compared to conventional systems. The mobility of the media helps in maintaining an active and diverse microbial population, enhancing the treatment's effectiveness.

ClariDenSR™

The ClariDenSR™ is a comprehensive approach to wastewater treatment, which takes into account factors such as cost-effectiveness, environmental sustainability, efficiency, and regulatory compliance. It's an ongoing patent that aims to enhance overall performance and optimize operations find it to be a compelling choice.
