Steps to certifyteacher.com

When you first open the product, you will take a baseline exam (diagnostic). This exam will determine your strengths and weaknesses and will determine a study plan based on that information.

When you click on Exam Mode the system will prompt you to turn on the Study Plan Tracker. We highly recommend that each candidate choose "Yes, I'm In" to turn on this feature.

After taking the baseline exam, you should go to Study Mode and build quizzes. For a thorough knowledge of the product, you should complete all the assignments for all competencies and domains. You should also go through the flashcards to make sure you are familiar with the vocabulary and concepts of the product.

Only after completing the recommended study plan and flashcards, should you take another exam.

Following this method of studying, then taking an exam, then studying again will ensure you get the best results.

1. Exam Mode - Baseline Exam
2. Study Mode - complete quizzes for all competencies and domains
3. Flashcards - review vocabulary
4. Exam Mode - 1st attempt after studying
5. Study Mode - complete quizzes again
6. Flashcards
7. Exam - 2nd attempt
8. Study Mode - complete quizzes again
9. Flashcards
10. Exam - 2nd attempt
