

# DURABLE, DEPENDABLE FLOOR MACHINES

## MLEE®shaiba® Classic Floor Machines

Item# 170F - Item# 200F, Assembled in China

Item# 170F  
Item# 200F

### Cleaning power and versatility for any hard floor job...

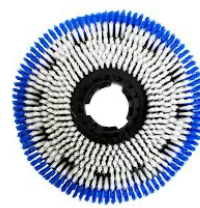

- Patented rotationally-molded, one-piece housing reduces noise and vibration
- Powerful 1.5 hp, 175 RPM, motors can handle any job with ease
- All-steel triple planetary gear box
- Thumb-activated safety interlock switch prevents accidental start ups
- Each machine is assembled and tested by skilled American workers

### Complete every hard floor task!

BONNET CLEANING

SHAMPOOING

SCRUBBING/STRIPPING

#### CLASSIC LINE

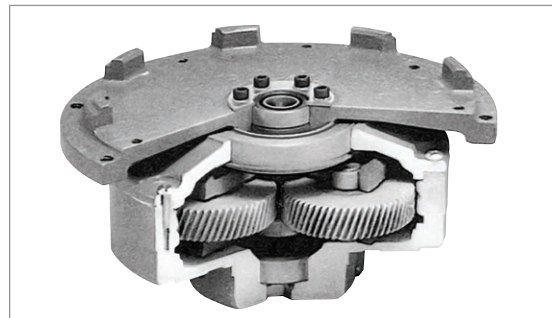

Item# 170F  
Item# 200F

The best just got better! To make our floor machines even better, we've added improvements that increase the power and add longer lasting durability for an even stronger machine. The popular **Mlee Classic** floor machines feature our patented one-piece, rotationally-molded housing that is more durable and resilient than steel. It absorbs the shock and torque normally associated with operating a floor machine while putting the power on the floor, not on the operator's hands. The updated **Mlee Classic** floor machines provide the necessary strength and toughness for the most challenging floor jobs.

New and improved handle damp eliminates overtightening and damaging the handle tube

Triple planetary, all-steel gears for smooth power transfer on all models!
