CORE COMPETENCIES

Commercial Product Supply & Distribution Regulated Cold-Chain & Clinical Services

- Sourcing and fulfillment of medical, laboratory, IT, furniture, and industrial commodities
- Authorized-distributor supply channels with direct-to-destination delivery • Rapid quote turnaround on micro-purchase and simplified acquisition requirements
- Specification review, product substitution analysis, and brand-name-or-equal responses
- Temperature-controlled transport of pharmaceuticals, specimens, and biologics
- Chain-of-custody documentation and continuous temperature monitoring • Clinical and supply chain consulting, medication therapy management support
- Pharmacy operations assessment, workflow design, and compliance review

DIFFERENTIATORS

- **Clinically credentialed ownership.** Led by a licensed Doctor of Pharmacy with more than 30 years of practice across retail, hospital, and federal environments — including the National Institutes of Health, Joint Base Andrews, and Walter Reed National Military Medical Center. Product specifications for clinical and laboratory requirements are reviewed by someone who has used them.
- **Regulated cold-chain capability in-house.** Temperature-sensitive and chain-of-custody requirements that most commodity resellers decline are a core service line, not a subcontract.
- **National Capital Region presence.** Located in Montgomery County, Maryland, with direct working familiarity with federal medical and research installations throughout the DC metropolitan area.
- **Low overhead, direct fulfillment.** Lean structure and authorized-distributor relationships allow competitive pricing and fast response on short-turnaround requirements.

COMPANY EXPERIENCE

Coker Enterprises LLC is a Maryland limited liability company providing supply, logistics, and clinical consulting services to commercial and government customers. Leadership experience includes pharmacy operations management, federal research pharmacy support, regulated medical transport, and supply chain consulting. The firm maintains active registration in the System for Award Management and is positioned for micro-purchase, simplified acquisition, and subcontract opportunities.
