(824) 20" "Whisper Wash"

For fast streak free cleaning of parking lots.

822

823

824

The Power of Nature

Nature has many ways to produce ozone O₃, a natural sanitizer. For example, we've all taken a walk after a thunderstorm and experienced the clean, fresh smell in the air. That's ozone, or activated oxygen, at work.

O₃ attacks microorganisms and breaks down odors and other pollutants at their source. Normal oxygen O₂ is converted to O₃, which is commonly called ozone. O₃ will break down odors and other contaminants.

The LightningAir employs a special O₃ generator to achieve this natural process.

Normal oxygen (O₂) molecules with two atoms of oxygen.

The electrical current of lightning transforms oxygen (O₂) molecules into ozone (O₃).

Ozone (O₃) breaks back down into oxygen (O₂), as extra atom attaches to pollution molecules.

Extra oxygen atom causes breakdown of pollution molecules.

Lightning is one way that nature creates O₃, ozone.
