The Ultimate

EVO Aluminium Bifolding Doors

The Ultimate EVO Aluminium Bifolding Doors offer exceptional performance and is the product of cutting-edge British hardware innovation.

Hardware is a crucial element in bifold door design, determining not only how secure your new door will be, but also how easy it is to use. In short, it's hardware that does the hard work.

We have looked at each and every aspect, the function of every individual hardware component used in the Ultimate EVO's fabrication. We have designed door rollers, hinges, gears and running tracks from the ground up, to optimise the performance of each.

Manufactured in the UK using the best materials and to the highest standards, it means that the Ultimate EVO delivers effortless operation, enhanced security, and exceptional weather sealing.

Combined with a slim aluminium profile, the core integrity of our hardware means that we can also offer incredible design flexibility, accommodating heavier individual sash weights and openings of up to 8400mm.

Choose your configuration

With inward and outward opening options, the Ultimate EVO offers exceptional design flexibility with 32 different configurations and up to a maximum seven individual sashes.

3-1-2

- 3 - The total number of sashes
- 1 - The number of sashes opening to the left
- 2 - The number of sashes opening to the right

Reverse configurations also available, eg. 3-2-1 and 3-1-2

The Ultimate EVO Aluminium Entrance Door originates from our bifold door system. The same EVO slim sash and frame create these secure and contemporary residential doors.

The single entrance door can be up to 1200mm wide and 3000mm tall, and is able to house either double or triple glazing.

Complement your entrance door with either clear or textured glass, or from the 25 panel designs below. Choose a sleek smooth finish, a traditional groove or from our assortment of satin glass and stainless steel trim options. Whichever style appeals to you, an Ultimate EVO Aluminium Entrance Door will be an impressive statement to your home.

The Ultimate Door Panels use 1.5mm aluminium sheets, that is nearly double the amount used by many of the UK's leading aluminium panel suppliers!

The polyfoam laminating insulation is a rigid extruded polystyrene board, is lightweight, has excellent structural strength and is resistant to moisture absorption.

The Ultimate Aluminium Panel contains a 4.5mm fibre cement board. This fire-resistant sheathing board is extremely durable, improves product security, is impact-resistant, repels rot and fungus and will withstand extreme climates. No timber or MDF are used within the Ultimate Aluminium Panels Doors.

The enclosed edges situated on all sides of the panel (grooved panels do not have enclosed edges due to the nature of the manufacturing process), increases the panels stability and provides additional ease at installation when 'toe and heeling' the 28mm panel.

The Ultimate

EVO Aluminium French Doors

The Ultimate EVO Aluminium French Doors originates from our bifold door system. The same EVO slim sash and frame create these secure and contemporary residential doors.

The double entrance doors can be up to 2400mm wide and 3000mm tall, and is able to house either double or triple glazing.

The cutting-edge aluminium system delivers a contemporary design which provides practical access to your home. These double doors also allow you to develop a consistent style throughout your property when using multiple door options within the EVO suite.

The Ultimate

SLIM25 Aluminium Sliding Doors

The Ultimate SLIM25 Aluminium slider is not only a visually stunning addition to your home, it can also add huge value to the property.

Excellent thermal performance and strong, super-slim profile sections to minimise the visible framework are key to the aluminium sliding door's design.

Engineering-grade hardware allows for silky smooth opening and closing operation. Designed with bottom rails of 42mm and 34mm wide, the slider provides stunning unobstructed views.

What's more, all our doors are rigorously tested to European safety standards and powder coated to Qualicoat's specifications, for complete peace of mind.

The Ultimate SLIM25 Sliding Doors perfectly frame and enhance an outdoor view while creating a light and bright indoor space in your home. Transform an entire wall into a glass door, with the added freedom of accessibility, creating a seamless connection between the indoors and outdoors.

The system is designed for large opening sizes, with market-leading sash sizes achievable of up to 2.5m x 2.7m per pane. With interlocking of just 25mm, these super-slim sliders allow for maximum views, excellent thermal performance, noise reduction, high security, and weatherproofing.

Designed for large spaces, double and triple track options are available, allowing for a variety of opening configurations.

The Ultimate PVC Sliding Doors

The Ultimate PVC Sliding Doors deliver supreme thermal performance, highly secure locking mechanism options, and slim sightlines to allow maximum natural light indoors.

Available in two, three and four pane options, the Ultimate Inline Sliding Door delivers exceptional performance. Each offering provides smooth operation, quiet running and durable performance. With a choice of designs and guaranteed high-quality performance, they bring you the space, comfort and low-maintenance luxury of modern living. Imagine wide open spaces allowing air and light to flood into your home, instantly creating a contemporary look and feel.

The Ultimate PVC Sliding Doors help to maintain a year-round comfortable, ambient temperature in your home, whilst providing style and security.

In addition to classical white, you can choose from our Renolit laminate colour options that are applied to the outside (white inside) or both sides. The Ultimate PVC Sliding Doors offer a wide range of colours to suit every home perfectly.

Choosing the right patio door is vitally important. You want a design that will blend easily into your existing building whilst still making a strong visual statement. The Ultimate PVC Sliding Doors provides all this and more.
