70% of the students in a school play football, 75% play cricket, 80% play basketball and 85% play carrom.

The minimum percentage of students who play all four games is :

A	66.66
B	10
C	20
D	15
E	33.33

Correct Option:

10

Candidate Response:

66.66

5

Logical Reasoning

There is a lot of interest in the first five ranks for Class XI students. One student guessed the rank order as Ankita, Bhagyashree, Chanchal, Devroopa and Esha. Later upon announcement of the results, it was found that not only did he get each student out off her true position, none of the students in his ranking correctly followed her immediate predecessor. Another student guessed Devroopa, Ankita, Esha, Chanchal and Bhagyashree. Even his guess was wrong. It was found that he had got two positions correct, and two students in his ranking correctly followed their immediate predecessors.

Which of the following is true about the correct rank order ?

A	Bhagyashree got the fourth position
B	Devroopa got the first position
C	Esha got the fourth position
D	Chanchal got the second position

The cars are yellow, green, purple, red, and blue, and the executives names are Alice, Bert, Cheryl, David, and Enid.

- * The car in the first space is red.
- * A blue car is parked between the red car and the green car.
- * The car in the last space is purple.
- * The secretary drives a yellow car.
- * Alice's car is parked next to David's.
- * Enid drives a green car.
- * Bert's car is parked between Cheryl's and Enid's.
- * David's car is parked in the last space.

Who amongst the following is the CEO ?

A	Alice
B	Enid
C	Cheryl
D	Bert
E	David

Correct Option:

Cheryl

Candidate Response:

Enid

Read the following Scenario carefully and answer the questions that follow :

Churna is a peaceful village, surrounded by thickly forested high hills that isolate it from the rest of the world. Agriculture is the main occupation of the Churna villagers. Moreover, the forests provide seasonal fruits, tubers, medicinal herbs, and other forest produce in abundance. For all material needs not produced locally, the Churna villagers depend on Tendua, a faraway town.

Once a month, the Churna women would arduously trek with the surplus produce to Tendua. In the Tendua market, they convey the virtues of their produce through a beautiful song and dance routine. Reputed for their hard-bargaining skills, they always manage to extract a premium barter from the traders, more than fulfilling all their other material needs.

A few months after granting exclusive access to Damu, the village council of Churna meets to discuss the progress. After much debate and heated discussions, the Village Council decides to terminate the contract with Damu. The Council feels that if the contract continues, then:

1. Over time, Churna's produce will lose its association with Churna.
2. Churna's people will be ignorant of new developments in the market.
3. Churna's dance and song will lose their identity.
4. Churna's people will lose social interaction with the outer world.
5. Churna's people will lose their hard bargaining skills.

Which of the above concerns, when arranged in descending order of significance, will correctly support the decision to terminate the contractual relationship with Damu :

A	1, 2, 3, 4, 5
B	1, 2, 5, 4, 3
C	1, 2, 5, 3, 4
D	2, 1, 5, 3, 4
E	5, 1, 2, 4, 3

Correct Option:

1, 2, 5, 3, 4

Candidate Response:

1, 2, 5, 4, 3

39

Logical Reasoning

For all material needs not produced locally, the Churna villagers depend on Tendua, a faraway town.

Once a month, the Churna women would arduously trek with the surplus produce to Tendua. In the Tendua market, they convey the virtues of their produce through a beautiful song and dance routine. Reputed for their hard-bargaining skills, they always manage to extract a premium barter from the traders, more than fulfilling all their other material needs.

Damu, an ambitious trader of Tendua, wants to have exclusive access to all the surplus produce from Churna.

Which of the following offers to the Churna village will help Damu achieve her objective most successfully ?

A	Damu should offer to educate the Churna villagers about cash transactions.
B	Damu should offer to set up a shop in Churna, which will barter all the material requirements of the village.
C	Damu should offer to provide colourful sarees that the women of Churna fancy.
D	Damu should offer novel products, unseen by the Churna villagers.
E	Damu should offer to transport the villagers' monthly material purchases from Tendua to Churna for free.

Correct Option:

Damu should offer to set up a shop in Churna, which will barter all the material requirements of the village.

Read the following scenario and answer the Questions that follow :

A company awards incentives to its employees for successful project performances. It rates successful project performance in categories A*, A, B, and C. Employees, in solo projects rated A*, A, B, and C, are awarded incentives ₹6 lakh, ₹5 lakh, ₹3 lakh, and ₹1 lakh respectively. When a project has multiple team members, the following scheme is used to award the incentives :

No. of team-members	Team lead gets	Other members get
1	100%	
2	90%	70%
3	80%	50% each
4	70%	40% each
More than 4	Every member gets $(200/n)\%$, where n = number of team members.	

For example, for a project rated A, with three members, the team lead gets ₹4 lakh, and the other team members get ₹2.5 lakh each. A project always has a single team lead.

Six employees: Altaf, Bose, Chakrabarathi, Dipa, Ernie, and Fatima receive a total of ₹45 lakh in incentives by participating in a total of eight different projects that does not involve any other person. Not all six employees are involved in all eight projects.

The following are additionally known about these eight projects:

1. One project involves all six employees. Four projects involve three each, and the rest, two each.
2. Exactly three projects are rated C, for which a total of ₹4.8 lakh is paid.
3. Only one project is rated A*.

What is known correctly about the team composition for the projects rated A* :

A	It comprises of a three-member team.
B	It comprises of either a two-member team or a three-member team.
C	It comprises of a two-member team.
D	It comprises of either a three-member team or a six-member team.
E	It comprises of a six-member team.

Correct Option:

It comprises of a three-member team.

Candidate Response:

It comprises of either a two-member team or a three-member team.

In a certain board examination, students were to appear for examination in five subjects: English, Hindi, Mathematics, Science and Social Science. Due to a certain emergency situation, a few of the examinations could not be conducted for some students. Hence, some students missed one examination and some others missed two examinations. Nobody missed more than two examinations.

The board adopted the following policy for awarding marks to students. If a student appeared in all five examinations, then the marks awarded in each of the examinations were on the basis of the scores obtained by them in those examinations.

If a student missed only one examination, then the marks awarded in that examination was the average of the best three among the four scores in the examinations they appeared for.

If a student missed two examinations, then the marks awarded in each of these examinations was the average of the best two among the three scores in the examinations they appeared for.

The marks obtained by six students in the examination are given in the table below. Each of them missed either one or two examinations.

	ENGLISH	HINDI	MATHS	GENERAL SCIENCES	SOCIAL SCIENCES
ALVA	80	75	70	75	60
BAL	90	80	55	85	85
CARDY	75	80	90	100	90
DEEPALI	70	90	100	90	80
ELGAR	80	85	95	60	55
FOXXY	83	72	78	88	83

The following facts are also known :

- I. Four of these students appeared in each of the English, Hindi, Science, and Social Science examinations.
- II. The student who missed the Mathematics examination did not miss any other examination.
- III. One of the students who missed the Hindi examination did not miss any other examination. The other student who missed the Hindi examination also missed the Science examination.

Who among the following did not appear for the Maths examination ?

A	DEEPALI
B	FOXXY
C	ELGAR
D

Read the contents of the passage carefully and answer the questions that follow :

There are only four neighbourhoods in a city - Levmosto, Tyhmisto, Pesmisto and Kitmisto. During the onset of a pandemic, the number of new cases of a disease in each of these neighbourhoods was recorded over a period of five days. On each day, the number of new cases recorded in any of the neighbourhoods was either 0, 1, 2 or 3.

The following facts are also known:

1. There was at least one new case in every neighbourhood on Day 1.
2. On each of the five days, there were more new cases in Kitmisto than in Pesmisto.
3. The number of new cases in the city in a day kept increasing during the five-day period. The number of new cases on Day 3 was exactly one more than that on Day 2.
4. The maximum number of new cases in a day in Pesmisto was 2, and this happened only once during the five-day period.
5. Kitmisto is the only place to have 3 new cases on Day 2.
6. The total numbers of new cases in Levmosto, Tyhmisto, Pesmisto and Kitmisto over the five-day period were 12, 12, 5 and 14 respectively.

Which of the following can be correctly concluded about the number of new cases in Levmosto on Day 3 ?

A	There have been exactly 7 cases in Levmosto on Day 3
B	There have been exactly 1 case in Levmosto on Day 3
C	There have been exactly 3 cases in Levmosto on Day 3
D	There have been exactly 4 cases in Levmosto on Day 3

Arnav has to go to the country of Ten to work on a series of tasks for which he must get a permit from the Government of Ten. Once the permit is issued, Arnav can enter the country within ten days of the date of issuance of the permit. Once Arnav enters Ten, he can stay for a maximum of ten days. Each of the tasks has a priority, and takes a certain number of days to complete. Arnav cannot work on more than one task at a time.

The following table gives the details of the priority and the number of days required for each task.

TASK	PRIORITY	NUMBER OF DAYS NEEDED
T1	1	3
T2	2	5
T3	5	3
T4	3	4
T5	4	2

Arnav's first priority is to complete as many tasks as possible, and then try to complete the higher priority tasks. His last priority is to go back as soon as possible.

Which of the following tasks should Arnav complete earliest :

A	T1 and T2
B	T3, T4 and T5
C	T1 and T3
D	T1, T2 and T5
E	T2, T3 and T5

Correct Option:

T1, T2 and T5

In a square layout of size $5m \times 5m$, 25 equal sized square platforms of different heights are built. The heights (in metres) of individual platforms are :

6	1	2	4	3
9	5	3	2	8
7	8	4	6	5
3	9	5	1	2
1	7	6	3	9

Individuals (all of same height) are seated on these platforms. We say an individual A can reach an individual B if all the three following conditions are met:

- i.) A and B are in the same row or column
- ii.) A is at a lower height than B
- iii.) If there is/are any individual(s) between A and B, such individual(s) must be at a height lower than that of A.

Thus in the table given above, consider the individual seated at height 8 on 3rd row and 2nd column. He can be reached by four individuals. He can be reached by the individual on his left at height 7, by the two individuals on his right at heights of 4 and 6 and by the individual above at height 5. Rows in the layout are numbered from top to bottom and columns are numbered from left to right.

How many individuals in this layout can be reached by just one individual ?

A	3
B	6
C	4
D	7
E	8

Correct Option:

7

In a square layout of size 5m × 5m, 25 equal sized square platforms of different heights are built. The heights (in metres) of individual platforms are :

6	1	2	4	3
9	5	3	2	8
7	8	4	6	5
3	9	5	1	2
1	7	6	3	9

Individuals (all of same height) are seated on these platforms. We say an individual A can reach an individual B if all the three following conditions are met:

- i.) A and B are In the same row or column
- ii.) A is at a lower height than B
- iii.) If there is/are any individual(s) between A and B, such individual(s) must be at a height lower than that of A.

Thus in the table given above, consider the Individual seated at height 8 on 3rd row and 2nd column. He can be reached by four individuals. He can be reached by the individual on his left at height 7, by the two individuals on his right at heights of 4 and 6 and by the individual above at height 5. Rows in the layout are numbered from top to bottom and columns are numbered from left to right.

Which of the following is true for any individual at a platform of height 1m in this layout ?

A	They can be reached by at least one individual.
B	They can be reached by all the individuals in their own row and column.
C	They can be reached by a maximum of two individuals
D	

	They cannot be reached by anyone.
E	They can be reached by at least four individuals.

Correct Option:

They cannot be reached by anyone.

Candidate Response:

They can be reached by all the individuals in their own row and column.

Logical Reasoning

Read the information given below carefully and answer the questions that follow :

An old woman had the following assets :

- (a) Rs. 70 lakh in Bank deposits
- (b) 1 house worth Rs. 50 lakh
- (c) 3 flats, each worth Rs. 30 lakh
- (d) Certain number of gold coins, each worth Rs. 1 lakh

She wanted to distribute her assets among her three children; Neeta, Seeta and Geeta.

The house, any of the flats or any of the coins were not to be split. That is, the house went entirely to one child; a flat went to one child and similarly, gold coins went to one child.

Among the three, Neeta received the least amount in bank deposits, while Geeta received the highest.

The value of the assets was distributed equally among the children, as were the gold coins.

How much did Seeta receive in bank deposits ?

A	Rs. 30 Lakhs
B	Rs. 48 Lakhs
C	Rs. 40 Lakhs
D	Rs. 20 Lakhs

Read the information given carefully and answer the question that follows :

Eight friends : Ajit, Byomkesh, Gargi, Jayanta, Kikira, Manik, Prodosh and Tapesesh are going to Delhi from Kolkata by a flight operated by CLP Air. In the flight, seating is arranged in 30 rows, numbered 1 to 30, each consisting of 6 seats, marked by letters A to F from left to right, respectively.

Seats A to C are to the left of the aisle (the passage running from the front of the aircraft to the back), and seats D to F are to the right of the aisle. Seats A and F are by the windows and referred to as Window seats, C and D are by the aisle and are referred to as Aisle seats while B and E are referred to as Middle seats.

Seats marked by consecutive letters are called consecutive seats (or seats next to each other). A seat number is a combination of the row number, followed by the letter indicating the position in the row; e.g., 1A is the left window seat in the first row, while 12E is the right middle seat in the 12th row.

CLP Air charges Rs. 1000 extra for any seats in Rows 1, 12 and 13 as those have extra legroom. For Rows 2-10, it charges Rs. 300 extra for Window seats and Rs. 500 extra for aisle seats. For Rows 11 and 14 to 20, it charges Rs. 200 extra for Window seats and Rs. 400 extra for aisle seats. All other seats are available at no extra charge.

Additionally, the following is known :

1. The eight friends were seated in six different rows.
2. They occupied 3 Window seats, 4 Aisle seats and 1 Middle seat.
3. Seven of them had to pay extra amounts, totaling to Rs. 4600, for their choices of seat. One of them did not pay any additional amount for his/her choice of seat.
4. Jayanta, Ajit and Byomkesh were sitting in seats marked by the same letter, in consecutive rows in increasing order of row numbers; but all of them paid different amounts for their choices of seat. One of these amounts may be zero.
5. Gargi was sitting next to Kikira, and Manik was sitting next to Jayanta.
6. Prodosh and Tapesesh were sitting in seats marked by the same letter, in consecutive rows in increasing order of row numbers; but they paid different amounts for their choices of seat. One of these amounts may be zero.

Who among the following did not pay any extra amount for his/her choice of seat ?

A	Manik
B	Ajit
C	Tapesesh

D	Gargi
E	Kikira

Correct Option:

Tapesh

Candidate Response:

Ajit

Simple Happiness index (SHI) of a country is computed on the basis of three parameters :

- Social Support (S),
- Freedom to Life choices (F) and
- Corruption Perception (C).

Each of these three parameters is measured on a scale of 0 to 8 (integers only). A country is then categorized based on the total score obtained by summing the scores of all the three parameters, as shown in the following table:

Total Score	0-4	5-8	9-13	14-19	20-24
Category	Very Unhappy	Unhappy	Neutral	Happy	Very Happy

Following diagram depicts the frequency distribution of the scores in S, F and C of 10 countries - Amda, Benga, Calla, Delma, Eppa, Varsa, Wanna, Xanda, Yanga and Zooma:

Further, the following is known :

- 1.Amda and Calla jointly have the lowest total score, 7, with identical scores in all the three parameters.
- 2.Zooma has a total score of 17.
- 3.All the 3 countries, which categorised as happy, have the highest score in exactly one parameter.

What is Zooma's score in S ?

In the question below, there is a passage that consist of Six sentences.

The First and Sixth sentence (named as S_1 and S_6 respectively are given in the beginning and end.

The middle Four sentences in each have been jumbled up.

These are labelled as P, Q, R and S.

Find out the proper order for the Four jumbled sentences

S_1 :	All the land was covered by the ocean.
P :	The leading god fought the monster, killed it and chopped its body in to two halves.
Q :	A terrible monster prevented the gods from separating the land from the water.
R :	The god made the sky out of the upper part of the body and ornamented it with stars.
S :	The god created the earth from the lower part, grew plants on it and populated it with animals.
S_6 :	The god moulded the first people out of clay according to his own image and mind.

The Proper sequence should be:

A	S, Q, R, P
B	R, Q, S, P
C	Q, P, R, S
D	Q, R, P, S
E	R, S, P, Q

Correct Option:

Q, P, R, S

Candidate Response:

The four sentences (labelled 1, 2, 3, 4) below, when properly sequenced would yield a coherent paragraph. Decide on the proper sequencing of the order of the sentences and key in the sequence of the four numbers as your answer :

1. The more we are able to accept that our achievements are largely out of our control, the easier it becomes to understand that our failures, and those of others, are too.

2. But the raft of recent books about the limits of merit is an important correction to the arrogance of contemporary entitlement and an opportunity to reassert the importance of luck, or grace, in our thinking.

3. Meritocracy as an organising principle is an inevitable function of a free society, as we are designed to see our achievements as worthy of reward.

4. And that in turn should increase our humility and the respect with which we treat our fellow citizens, helping ultimately to build a more compassionate society

A	2, 4, 3, 1
B	3, 2, 1, 4
C	1, 3, 4, 2
D	4, 2, 3, 1
E	3, 1, 2, 4

Correct Option:

3, 2, 1, 4

Candidate Response:

3, 2, 1, 4

The passage given below is followed by Five alternate summaries. Choose the option that best captures the essence of the passage.

Several of the world's earliest cities were organised along egalitarian lines. In some regions, urban populations governed themselves for centuries without any indication of the temples and palaces that would later emerge; in others, temples and palaces never emerged at all, and there is simply no evidence of a class of administrators or any other sort of ruling stratum. It would seem that the mere fact of urban life does not, necessarily, imply any particular form of political organization, and never did. Far from resigning us to inequality, the picture that is now emerging of humanity's past may open our eyes to egalitarian possibilities we otherwise would have never considered.

- | | |
|---|---|
| A | Contrary to our assumption that urban settlements have always involved hierarchical political and administrative structures, ancient cities were not organised in this way. |
| B | We now have the evidence in support of the existence of an egalitarian urban life in some ancient cities, where political and civic organisation was far less hierarchical. |
| C | Egalitarian society is and has been but just a pipe dream. |
| D | The lack of hierarchical administration in ancient cities can be deduced by the absence of religious and regal structures such as temples and palaces. |
| E | The emergence of a class of administrators and ruling stratum transformed the egalitarian urban life of ancient cities to the hierarchical civic organisations of today. |

Correct Option:

We now have the evidence in support of the existence of an egalitarian urban life in some ancient cities, where political and civic organisation was far less hierarchical.

Candidate Response:

Contrary to our assumption that urban settlements have always involved hierarchical political and administrative structures, ancient cities were not organised in this way.

Five jumbled up sentences, related to a topic, are given below. Four of them can be put together to form a coherent paragraph. Identify the odd one out :

Raise / View Objection

- | | |
|---|--|
| A | Talk was the most common way for enslaved men and women to subvert the rules of their bondage, to gain more agency than they were supposed to have. |
| B | Freedom of speech and the power to silence may have been preeminent markers of white liberty in Colonies, but at the same time, slavery depended on dialogue: slaves could never be completely muted. |
| C | Slave-owners obsessed over slave talk, though they could never control it, yet feared its power to bind and inspire—for, as everyone knew, oaths, whispers, and secret conversations bred conspiracy and revolt. |
| D | Even in conditions of extreme violence and unfreedom, their words remained ubiquitous, ephemeral, irrepressible, and potentially transgressive. |
| E | Slaves came from societies in which oaths, orations, and invocations carried great potency, both between people and as a connection to the all-powerful spirit world. |

Correct Option:

Slaves came from societies in which oaths, orations, and invocations carried great potency, both between people and as a connection to the all-powerful spirit world.

Candidate Response:

Even in conditions of extreme violence and unfreedom, their words remained ubiquitous, ephemeral, irrepressible, and potentially transgressive.

comes through the interaction with social situations.

Correct Option:

comes through the interaction with social situations.

Candidate Response:

comes from the self-centred approach of the students.

31

Verbal Ability

To forgive an injury is often considered to be a sign of weakness; it is really a sign of strength. It is easy to allow oneself to be carried away by resentment and hate into an act of vengeance; but it takes a strong character to restrain those natural passions. The man who forgives an injury proves himself to be the superior of the man who wronged himself and puts the wrong-doer to shame.

The passage best supports the statement that :

A

mercy is the noblest form of revenge.

B

natural passions are difficult to suppress.

C

people tend to forgive the things happened in the past.

D

the sufferer alone knows the intensity of his sufferings.

E

a person with calm and composed nature has depth of thought and vision

Raise / View Objection

Correct Option:

Read the following statements and answer the question that follows.

1. Behavioral models in finance most often critique the efficient market hypothesis, which states that if investors behave rationally then prices should reflect all available information about the financial asset in consideration.
2. A number of behavioral models, including feedback models where investors bid up the price, have been used to explain this phenomenon.
3. But asset price bubbles and crashes belie this conclusion.
4. Finance is one of the fields where behavioral models have been used extensively, enough for behavioral finance.
5. This idea of "irrational exuberance" is now widely accepted and used in financial analysis, especially while analyzing asset price bubbles.

Arrange the above five statements in a logical sequence.

A	1, 2, 3, 4, 5
B	4, 3, 2, 1, 5
C	4, 1, 3, 2, 5
D	4, 1, 3, 5, 2
E	1, 4, 2, 3, 5

Correct Option:

4, 1, 3, 2, 5

Candidate Response:

4, 1, 3, 2, 5

33

Verbal
Ability

Read the following passage and answer the question that follows :

We can think of the history of life on earth as a vast, long-term experiment in pure competition. Every living organism is competing with all other living organisms for resources (nutrients, sunlight, water, territory, etc.). Nature, or the natural world, is a laboratory of unfettered competition. It's a dog-eat-dog, no-holds-barred, day-in and day-out struggle.

There are no governmental regulators to protect the weak or favor the strong. All organisms are given a chance, but not necessarily an equal chance. As the climate and the environment change (and change they do), some organisms are favored over others at times, but these advantages are fleeting. What nature gives, nature can take away.

Which of the following can be absolutely correctly concluded from the passage :

A	Forgiveness is alien to the natural world.
B	Without unforgiving competition, the planet will be inundated with the weak.
C	Nature gives a fair opportunity to every organism to survive.
D	Competition is critical to ensure the survival of the fittest.
E	Brutal competition is the only constant in the natural world.

Correct Option:

Brutal competition is the only constant in the natural world.

Candidate Response:

Brutal competition is the only constant in the natural world.

Read the following verse and answer the questions that follow :

Sit, drink your coffee here; your work can wait awhile. You're fifty-six, and still have some of life ahead.

No need for wit; just feel vacuities, and I'll Reciprocate in kind, or laugh at you instead.

The world is too opaque, distressing and profound. This twenty minutes' rendezvous will make my day:

To sit here in the sun, with grackles all around, Staring with beady eyes, and you two feet away.

Which of the following best conveys the essence of the lines, "...with grackles all around, Staring with beady eyes, and you two feet away." :

A	Grackles, like humans, love to bask in the Sun.
B	A small bird like grackle can give us lots of happiness.
C	Grackles love to stare at us; however, they maintain a two-foot distance.
D	We should not care about grackles, but us.
E	Over witty discussions, grackles are the pleasant birds to look at.

Correct Option:

We should not care about grackles, but us.

Candidate Response:

A small bird like grackle can give us lots of happiness.

Ability

Read the following verse and answer the questions that follow :

Sit, drink your coffee here; your work can wait awhile. You're fifty-six, and still have some of life ahead.

No need for wit; just feel vacuities, and I'll Reciprocate in kind, or laugh at you instead.

The world is too opaque, distressing and profound. This twenty minutes' rendezvous will make my day:

To sit here in the sun, with grackles all around, Staring with beady eyes, and you two feet away.

Which of the following most correctly captures the essence of the verse :

A	Let's celebrate our existence, not our work.
B	Let's eat, drink and be merry in the lap of nature.
C	Let's create our own meaning in life, no matter what.
D	Let's be gibberish, not rational about life.
E	Let's enjoy a moment of peace in this busy life.

Correct Option:

Let's enjoy a moment of peace in this busy life.

Candidate Response:

Let's enjoy a moment of peace in this busy life.

Read the following passage and answer the questions that follow :

And that has to do with the question of uncertainty and doubt. A scientist is never certain. We all know that. We know that all our statements are approximate statements with different degrees of certainty; that when a statement is made, the question is not whether it is true or false but rather how likely it is to be true or false. We must discuss each question within the uncertainties that are allowed. And as evidence grows it increases the probability perhaps that some idea is right or decreases it. But it never makes absolutely certain one way or the other. Now, we have found that this is of paramount importance in order to progress. We absolutely must leave room for doubt or there is no progress and there is no learning. There is no learning without having to pose a question. And a question requires doubt. People search for certainty. But there is no certainty. People are terrified-how can you live and not know? It is not odd at all. You only think you know as a matter of fact. And most of your actions are based on incomplete knowledge and you really don't know what it is all about or what the purpose of the world is or know a great deal of other things. It is possible to live and not know.

Which of the following most correctly describes the essence of the given passage :

A	Reasonable discomfort with certainty is the path for progress.
B	Doubting the established world order is the purpose of science.
C	Science can never give a conclusive answer to a question.
D	Reasonable scepticism is the characteristic of a scientific mind.
E	Progress involves questioning accepted truths.

Correct Option:

Reasonable scepticism is the characteristic of a scientific mind.

Candidate Response:

Reasonable discomfort with certainty is the path for progress.

Read the passage given below and answer the questions that follow :

Multitasking has been found to increase the production of the stress hormone cortisol as well as the fight-or-flight hormone adrenaline, which can overstimulate your brain and cause mental fog or scrambled thinking. Multitasking creates a dopamine addiction feedback loop, effectively rewarding the brain for losing focus and for constantly searching for external stimulation. To make matters worse, the prefrontal cortex has a novelty bias, meaning that its attention can be easily hijacked by something new—the proverbial shiny objects we use to entice infants, puppies, and kittens. The irony here for those of us who are trying to focus amid competing activities is clear: The very brain region we need to rely on for staying on task is easily distracted. We answer the phone, look up something on the Internet, check our email, send an SMS, and each of these things tweaks the novelty-seeking, reward-seeking centers of the brain, causing a burst of endogenous opioids (no wonder it feels so good!), all to the detriment of our staying on task. It is the ultimate empty-caloried brain candy. Instead of reaping the big rewards that come from sustained, focused effort, we instead reap empty rewards from completing a thousand little sugarcoated tasks.

In the old days, if the phone rang and we were busy, we either didn't answer or we turned the ringer off. When all phones were wired to a wall, there was no expectation of being able to reach us at all times—one might have gone out for a walk or be between places, and so if someone couldn't reach you (or you didn't feel like being reached), that was considered normal. Now more people have cell phones than have toilets. This has created an implicit expectation that you should be able to reach someone when it is convenient for you, regardless of whether it is convenient for them. This expectation is so ingrained that people in meetings routinely answer their cell phones to say, "I'm sorry, I can't talk now, I'm in a meeting." Just a decade or two ago, those same people would have let a landline on their desk go unanswered during a meeting, so different were the expectations for reachability.

In the context of the given passage, which of the following best conveys the meaning of, "Now more people have cell phones than have toilets". ?

A	Cell phones have become a bigger necessity.
B	The need to be connected is more pronounced now.
C	Everybody wants to stay connected, using cell phones.
D	The usage of toilets is limited, while cell phones are used all the time.
E	The number of cell phone users has increased over time.

Correct Option:

Everybody wants to stay connected, using cell phones.

Candidate Response:

The need to be connected is more pronounced now.

Multitasking has been found to increase the production of the stress hormone cortisol as well as the fight-or-flight hormone adrenaline, which can overstimulate your brain and cause mental fog or scrambled thinking. Multitasking creates a dopamine addiction feedback loop, effectively rewarding the brain for losing focus and for constantly searching for external stimulation. To make matters worse, the prefrontal cortex has a novelty bias, meaning that its attention can be easily hijacked by something new—the proverbial shiny objects we use to entice infants, puppies, and kittens. The irony here for those of us who are trying to focus amid competing activities is clear: The very brain region we need to rely on for staying on task is easily distracted. We answer the phone, look up something on the Internet, check our email, send an SMS, and each of these things tweaks the novelty-seeking, reward-seeking centers of the brain, causing a burst of endogenous opioids (no wonder it feels so good!), all to the detriment of our staying on task. It is the ultimate empty-caloried brain candy. Instead of reaping the big rewards that come from sustained, focused effort, we instead reap empty rewards from completing a thousand little sugarcoated tasks.

In the old days, if the phone rang and we were busy, we either didn't answer or we turned the ringer off. When all phones were wired to a wall, there was no expectation of being able to reach us at all times—one might have gone out for a walk or be between places, and so if someone couldn't reach you (or you didn't feel like being reached), that was considered normal. Now more people have cell phones than have toilets. This has created an implicit expectation that you should be able to reach someone when it is convenient for you, regardless of whether it is convenient for them. This expectation is so ingrained that people in meetings routinely answer their cell phones to say, "I'm sorry, I can't talk now, I'm in a meeting." Just a decade or two ago, those same people would have let a landline on their desk go unanswered during a meeting, so different were the expectations for reachability.

As per the passage, why do people routinely say, "I am sorry, I can't talk now, I'm in a meeting". ?

- A Because, multi-tasking in a meeting is not good.
- B Becasue it best conveys that the speaker is a busy person.
- C Because, it is easier to send messages while in a meeting than to speak on a cell phone.
- D Because, people in a meeting should not feel less important.
- E

Because if you carry a cell phone, you have to reply.

Correct Option:

Because if you carry a cell phone, you have to reply.

Candidate Response:

Becasue it best conveys that the speaker is a busy person.

Read the passage given below carefully and answer the questions that follow :

Most of recorded human history is one big data gap. Starting with the theory of Man the Hunter, the chroniclers of the past have left little space for women's role in the evolution of humanity, whether cultural or biological. Instead, the lives of men have been taken to represent those of humans overall. When it comes to the lives of the other half of humanity, there is often nothing but silence.

And these silences are everywhere. Our entire culture is riddled with them. Films, news, literature, science, city planning, economics. The stories we tell ourselves about our past, present and future. They are all marked—disfigured—by a female-shaped 'absent presence'. This is the gender data gap.

The gender data gap isn't just about silence. These silences, these gaps, have consequences. They impact on women's lives every day. The impact can be relatively minor. Shivering in offices set to a male temperature norm, for example, or struggling to reach a top shelf set at a male height norm. Irritating, certainly. Unjust, undoubtedly.

But not life-threatening. Not like crashing in a car whose safety measures don't account for women's measurements. Not like having your heart attack go undiagnosed because your symptoms are deemed 'atypical'. For these women, the consequences of living in a world built around male data can be deadly.

One of the most important things to say about the gender data gap is that it is not generally malicious, or even deliberate. Quite the opposite. It is simply the product of a way of thinking that has been around for millennia and is therefore a kind of not thinking. A double not thinking, even: men go without saying, and women don't get said at all. Because when we say human, on the whole, we mean man.

This is not a new observation. Simone de Beauvoir made it most famously when in 1949 she wrote, 'humanity is male and man defines woman not in herself, but as relative to him; she is not regarded as an autonomous being. He is the Subject, he is the Absolute—she is the Other.' What is new is the context in which women continue to be 'the Other'. And that context is a world increasingly reliant on and in thrall to data. Big Data. Which in turn is panned for Big Truths by Big Algorithms, using Big Computers. But when your big data is corrupted by big silences, the truths you get are half-truths, at best. And often, for women, they aren't true at all. As computer scientists themselves say: 'Garbage in, garbage out.'

Which of the following statements can be best concluded from the passage :

- | | |
|---|---|
| A | Over millennia, men ignored women, which resulted in the gender data gap and deadly consequences. |
| B | Emphasis on data-based decision making, can be devastating to women, given the gender data gap. |
| C | |

	Women have never been treated as distinct identities which causes the gender data gap.
D	The need of the hour is to revisit the past, and reduce the gender data gap at the earliest.
E	The gender data gap is amplified by data-based decision making.

Correct Option:

Emphasis on data-based decision making, can be devastating to women, given the gender data gap.

Candidate Response:

Over millennia, men ignored women, which resulted in the gender data gap and deadly consequences.

Read the passage given below carefully and answer the questions that follow :

Most of recorded human history is one big data gap. Starting with the theory of Man the Hunter, the chroniclers of the past have left little space for women's role in the evolution of humanity, whether cultural or biological. Instead, the lives of men have been taken to represent those of humans overall. When it comes to the lives of the other half of humanity, there is often nothing but silence.

And these silences are everywhere. Our entire culture is riddled with them. Films, news, literature, science, city planning, economics. The stories we tell ourselves about our past, present and future. They are all marked—disfigured—by a female-shaped 'absent presence'. This is the gender data gap.

The gender data gap isn't just about silence. These silences, these gaps, have consequences. They impact on women's lives every day. The impact can be relatively minor. Shivering in offices set to a male temperature norm, for example, or struggling to reach a top shelf set at a male height norm. Irritating, certainly. Unjust, undoubtedly.

But not life-threatening. Not like crashing in a car whose safety measures don't account for women's measurements. Not like having your heart attack go undiagnosed because your symptoms are deemed 'atypical'. For these women, the consequences of living in a world built around male data can be deadly.

One of the most important things to say about the gender data gap is that it is not generally malicious, or even deliberate. Quite the opposite. It is simply the product of a way of thinking that has been around for millennia and is therefore a kind of not thinking. A double not thinking, even: men go without saying, and women don't get said at all. Because when we say human, on the whole, we mean man.

This is not a new observation. Simone de Beauvoir made it most famously when in 1949 she wrote, 'humanity is male and man defines woman not in herself, but as relative to him; she is not regarded as an autonomous being. He is the Subject, he is the Absolute—she is the Other.' What is new is the context in which women continue to be 'the Other'. And that context is a world increasingly reliant on and in thrall to data. Big Data. Which in turn is panned for Big Truths by Big Algorithms, using Big Computers. But when your big data is corrupted by big silences, the truths you get are half-truths, at best. And often, for women, they aren't true at all. As computer scientists themselves say: 'Garbage in, garbage out.'

Based on the passage, which of the following statements most correctly explains the meaning of "absent presence"?

- A Because of the absence, one can recognise its presence.
- B The absence makes the case for the need for presence.
- C

	The absence is female-shaped, making it present.
D	By its sheer absence, it is present.
E	The presence is felt due to the specificity of the absence.

Correct Option:

The presence is felt due to the specificity of the absence.

Candidate Response:

Because of the absence, one can recognise its presence.

Read the passage given below carefully and answer the questions that follow :

Most of recorded human history is one big data gap. Starting with the theory of Man the Hunter, the chroniclers of the past have left little space for women's role in the evolution of humanity, whether cultural or biological. Instead, the lives of men have been taken to represent those of humans overall. When it comes to the lives of the other half of humanity, there is often nothing but silence.

And these silences are everywhere. Our entire culture is riddled with them. Films, news, literature, science, city planning, economics. The stories we tell ourselves about our past, present and future. They are all marked—disfigured—by a female-shaped 'absent presence'. This is the gender data gap.

The gender data gap isn't just about silence. These silences, these gaps, have consequences. They impact on women's lives every day. The impact can be relatively minor. Shivering in offices set to a male temperature norm, for example, or struggling to reach a top shelf set at a male height norm. Irritating, certainly. Unjust, undoubtedly.

But not life-threatening. Not like crashing in a car whose safety measures don't account for women's measurements. Not like having your heart attack go undiagnosed because your symptoms are deemed 'atypical'. For these women, the consequences of living in a world built around male data can be deadly.

One of the most important things to say about the gender data gap is that it is not generally malicious, or even deliberate. Quite the opposite. It is simply the product of a way of thinking that has been around for millennia and is therefore a kind of not thinking. A double not thinking, even: men go without saying, and women don't get said at all. Because when we say human, on the whole, we mean man.

This is not a new observation. Simone de Beauvoir made it most famously when in 1949 she wrote, 'humanity is male and man defines woman not in herself, but as relative to him; she is not regarded as an autonomous being. He is the Subject, he is the Absolute—she is the Other.' What is new is the context in which women continue to be 'the Other'. And that context is a world increasingly reliant on and in thrall to data. Big Data. Which in turn is panned for Big Truths by Big Algorithms, using Big Computers. But when your big data is corrupted by big silences, the truths you get are half-truths, at best. And often, for women, they aren't true at all. As computer scientists themselves say: 'Garbage in, garbage out.'

Based on the passage, which of the following options most correctly describes "double not thinking" :

A	Men not thinking and women not being allowed to think is due to double not thinking.
B	Men's rejection of women as humans and women's acceptance of it is the double not thinking.

C	Whenever humans are mentioned, it is men; further, women are not mentioned.
D	Men, over millennia, always confused human with being only male.
E	Over millennia, men and women have been conditioned to treat women as unequal.

Correct Option:

Whenever humans are mentioned, it is men; further, women are not mentioned.

Candidate Response:

Men not thinking and women not being allowed to think is due to double not thinking.

Read the given passage carefully and answer the questions that follow :

Nature has all along yielded her flesh to humans. First, we took nature's materials as food, fibers, and shelter. Then we learned to extract raw materials from her biosphere to create our own new synthetic materials. Now Bios is yielding us her mind—we are taking her logic.

Clockwork logic—the logic of the machines—will only build simple contraptions. Truly complex systems such as a cell, a meadow, an economy, or a brain (natural or artificial) require a rigorous nontechnological logic. We now see that no logic except bio-logic can assemble a thinking device, or even a workable system of any magnitude.

It is an astounding discovery that one can extract the logic of Bios out of biology and have something useful. Although many philosophers in the past have suspected one could abstract the laws of life and apply them elsewhere, it wasn't until the complexity of computers and human-made systems became as complicated as living things, that it was possible to prove this. It's eerie how much of life can be transferred. So far, some of the traits of the living that have successfully been transported to mechanical systems are: self-replication, self-governance, limited self-repair, mild evolution, and partial learning.

We have reason to believe yet more can be synthesized and made into something new. Yet at the same time that the logic of Bios is being imported into machines, the logic of Technos is being imported into life. The root of bioengineering is the desire to control the organic long enough to improve it. Domesticated plants and animals are examples of technos-logic applied to life. The wild aromatic root of the Queen Anne's lace weed has been fine-tuned over generations by selective herb gatherers until it has evolved into a sweet carrot of the garden; the udders of wild bovines have been selectively enlarged in a "unnatural" way to satisfy humans rather than calves. Milk cows and carrots, therefore, are human inventions as much as steam engines and gunpowder are. But milk cows and carrots are more indicative of the kind of inventions humans will make in the future: products that are grown rather than manufactured.

Genetic engineering is precisely what cattle breeders do when they select better strains of Holsteins, only bioengineers employ more precise and powerful control. While carrot and milk cow breeders had to rely on diffuse organic evolution, modern genetic engineers can use directed artificial evolution—purposeful design—which greatly accelerates improvements.

The overlap of the mechanical and the lifelike increases year by year. Part of this bionic convergence is a matter of words. The meanings of "mechanical" and "life" are both stretching until all complicated things can be perceived as machines, and all self-sustaining machines can be perceived as alive.

Yet beyond semantics, two concrete trends are happening: (1) Human-made things are behaving more lifelike, and (2) Life is becoming more engineered. The apparent veil between the organic and the manufactured has crumpled to reveal that the two really are, and have always been, of one being.

None of the following statements is implied by the arguments of the passage, except :

A

	Genetic engineers and bioengineers are the same insofar as they both seek to force evolution in an artificial way.
B	Purposeful design represents the pinnacle of scientific expertise in the service of human betterment and civilisational progress.
C	The biological realm is as complex as the mechanical one; which is why the logic of Bios is being imported into machines.
D	Laws of life need to be understood by the youth of today if the humanity is to survive for long.
E	Historically, philosophers have known that the laws of life can be abstracted and applied elsewhere.

Correct Option:

Genetic engineers and bioengineers are the same insofar as they both seek to force evolution in an artificial way.

Candidate Response:

Genetic engineers and bioengineers are the same insofar as they both seek to force evolution in an artificial way.

<p>Read the following passage carefully and answer the question that follows :</p> <p>"People who work in law, hotel and food services, and technology were found the most likely to skip breakfast daily, according to a recent study. As for people who do eat breakfast and prefer a savoury type (sliced buttered toast for instance), the study found they tend to make more money, be night owls and prefer cats over dogs. If you prefer a sweet breakfast like a donut you tend to be a morning person, like romcoms and are a dog person".</p> <p>Which of the following can be best inferred from the given passage ?</p>	
A	Lawyers, who eat savory breakfast daily, make more money than those lawyers who have early breakfast daily.
B	Hoteliers who eat regular breakfast are more likely to make more money than those who watch romcoms regularly.
C	A preference for cats as pets over dogs, usually, is a result of eating eggs for breakfast daily.
D	Among regular breakfast eaters, early risers have more sugar in their breakfast than late risers.
E	IT professionals, who eat eggs for breakfast, are more likely to make more money than their counterparts who eat donuts for breakfast.

Correct Option:

Verbal Ability

Read the contents of the passage carefully and answer the questions that follow :

There is nothing spectacularly new in the situation. Most old-societies-turned-young-nation states learn to live in a world dominated by the psychology and culture of exile. For some, the twentieth century has been a century of refugees. Others like Hannah Arendt have identified refugees as virtually a new species of human being who have come to symbolize the distinctive violence of our time. Refugees as contemporary symbols, however, proclaim something more than a pathology of a global nation-state system. They also represent a state of mind, a form of psychological displacement that has become endemic to modernizing societies. One does not even have to cross national frontiers to become a refugee; one can choose to be seduced by the 'pull' of self-induced displacement rather than be 'pushed' by an oppressive or violent system at home. It is this changed status of territoriality in human life that explains why, in immigrant societies, the metaphor of exile is now jaded. Some have already begun to argue that human beings need not have a 'home' as it has been traditionally understood in large parts of the world, that the idea itself is a red herring. While the idea of exile begins to appear trite in intellectual circles, an increasingly large proportion of the world is getting reconciled to living with the labile sense of self. Exile no longer seems a pathology or an affliction. Displacement and the psychology of exile are in; cultural continuities and settled communities are out; there is a touch of ennui about them.

Which of the following describes the meaning of the term "labile sense of self" most correctly as given in the passage ?

A	The self does not belong to a particular geography.
B	History does not confine the self.
C	The self adapts to a new geography.
D	Geography does not imprison the self.
E	Humans are not meant to be shunted around.

Correct Option:

Raise / View Objection

The self adapts to a new geography.

Candidate Response:

The self does not belong to a particular geography.

Exile no longer seems a pathology or an affliction. Displacement and the psychology of exile are in; cultural continuities and settled communities are out; there is a touch of ennui about them.

Based on the contents of the passage, which of the following is the author likely to disagree the most with :

A	Refugees symbolize exploitation and abuse of our times.
B	A feeling of alienation in modernizing societies is a common phenomenon.
C	Being a refugee is a state of mind.
D	Intellectuals find the notion of exile irrelevant.
E	One does not have to cross frontiers to become a refugee.

Correct Option:

Refugees symbolize exploitation and abuse of our times.

Candidate Response:

Refugees symbolize exploitation and abuse of our times.
