Conditioned Water Does Make a Difference

Many water supplies contain hardness minerals. These minerals form a scale and create problems in water heaters, washing machines, dishwashers, coffee makers, humidifiers and plumbing systems. Our water softeners remove these minerals from the water by filtering it through a resin softening medium. Take a look at all of the advantages shown here and you'll find that conditioned water makes a refreshing difference in your life and will save you money now and in the years ahead.

SOAP SAVER

Conditioned water not only delivers greater washing power, it reduces soap consumption up to 70%. Protects your washing machine at the same time.

HAIR PAMPERER

A conditioned water shampoo revives hair color and makes it more radiant and manageable.

CLOTHES BRIGHTENER

Clothes last longer, come out fresher, cleaner and softer when washed in conditioned water. Colors stay brighter, too.

STAIN ELIMINATOR

All bathroom fixtures benefit from conditioned water. There will be no more unsightly rings, stains or mineral build up to darken your porcelain or faucets.

FACE SAVER

Say good-bye to razor burn as your razor glides smoothly over your soft water conditioned face. Both your skin and blades will last longer.

DISH SPARKLER

Tired of streaks and spots on glassware and dishes? Conditioned water eliminates the problem, and helps your dishwasher last longer, too.

BODY REFRESHER

Bring conditioned water to your bath or shower and you'll feel a refreshing difference. You'll wash "really clean" faster and without soap build up on your skin.
