

SpaceRace2 Domain Portfolio

A.K.A. The Space Dominance 1000

A.K.A. The Silver Platter of “Online Real Estate” for The Space Industry

WHY INVEST IN THIS PORTFOLIO?

This domain portfolio (1000 total domains) is valuable because the second space race has just begun, there is tons of money pouring into this new high-tech industry, and valuations are set to soar with each passing year of progress. Not only do you have dozens and dozens of companies competing in the USA, but you also have dozens of countries competing to outperform each other (#SpaceRace2) - All these players, companies, and countries will want to acquire/control/use these website domain names for their multibillion-dollar ventures and will want to prohibit all their competitors from utilizing them. You can use these website domain names yourself, or resell this one of a kind portfolio/asset in the near future for potentially enormous profits (the longer you hold it, the more valuable it will become as the industry progresses) - Space tourism/travel has just started booming in 2021, we will soon have a permanent base on the moon (Artemis Project), there will be space hotels orbiting Earth, and Elon Musk said in December of 2021 that humans will be on Mars in 5 to 10 years with his next-level Starship rockets... Can you imagine how much the space industry valuations will grow in that amount of time? Now is your chance to get in early, add this unique asset to your investment portfolio, and personally be involved with the space industry.  #SpaceRace2
