YOUR LEADER FOR
INDUSTRIAL AUTOMATION REPAIRS

WHO WE ARE

Since 1991, Industrial Repair Service has been servicing industrial electronics and automation equipment for manufacturing plants nationwide. Our mission is to help manufacturing lines run smoothly and keep our customers downtime to a minimum.

WHAT WE DO

Our capabilities extend to various industries such as food processing, plastics, steel, textiles, paper, printing, automotive, glass, furniture, wood, tobacco, metal, wind power, rubber, leather, chemicals, refineries, and water treatment facilities.

OUR EXPERTISE

Our team services an extensive range of equipment. We specialize in repairing old and obsolete equipment and have the ability to service most manufacturers and models. For a complete listing of manufacturers, please visit our website at www.industrialrepair.net

WARRANTY

We stand by the commitment to provide value to our customers. We offer two industry leading warranties. All Mechanical, Robotics, and Servo Motor repairs are covered by an 18 Month In-Service Warranty. All Electronic repairs are covered by a 24 Month In-Service Warranty.

Our In-Service Warranty starts when the part is installed in your machine and not when it is shipped back to you like other repair companies. By offering an In-Service Warranty, we are providing our customers with the peace of mind that the part or unit will work, as intended, when needed. In addition, our warranty covers the entire unit and not just the parts we replaced.

MOTORS, MECHANICAL
AND ROBOTICS

ELECTRONICS

SERVICES

At Industrial Repair Service, we offer free flat-rate quotes, pick-ups, and no evaluation fees. Our warranty, knowledgeable staff, bench technicians, and excellent customer service are just a few reasons why you should choose us for your repair needs. We hire competent and seasoned technicians to service your equipment. Call us today to schedule an appointment with an Account Manager in your area.

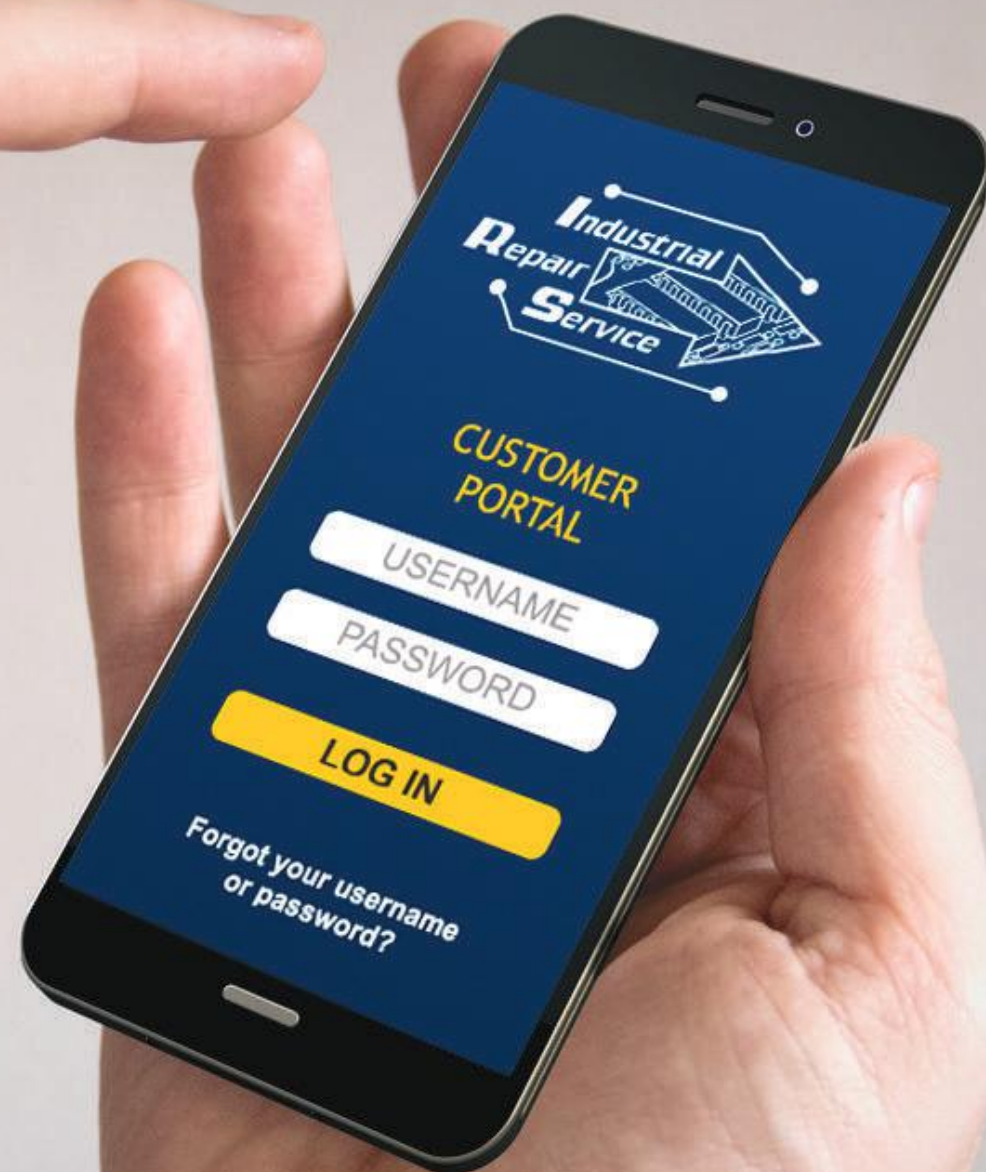

FREE FLAT-RATE QUOTES & PICK-UPS
AVERAGE TURNAROUND 7-10 WORKING DAYS
24-48 HOUR RUSH AVAILABLE
EXCEPTIONAL CUSTOMER SERVICE
ACCOUNT MANAGERS NATIONWIDE
CUSTOMER PORTAL JOB TRACKING
EMERGENCY SERVICES AVAILABLE
(WHERE APPLICABLE)

CUSTOMER PORTAL

With the development of our new Customer Portal we've given our clients the access to track their job through the entire repair process.

- View repair history, test reports and completed repairs
- Receive automatic status update notifications
- View tracking numbers for items that have shipped
- Contact your Account Manager or our Customer Service department
- Approve jobs

BRANDS WE SERVICE

We have the ability to service and repair most manufacturers and models including but not limited to the following. For a complete list of brands, please visit our website at www.industrialrepair.net

Yaskawa

ELECTRONICS LAB

Our experienced technicians can repair circuit boards, counters, displays, HMIs, industrial computers, monitors, input and output cards, power supplies, soft starts, teach pendants, temperature controls, timers, touchscreens, and much more. We repair down to component level and have built a number of relationships to source parts from all over the world for many manufactures, OEMs, and distributors.

ROBOTICS LAB

We have expertise in all areas to provide a comprehensive repair service aimed to inspect, disassemble, and correct all faulty, worn, or age sensitive parts. We can repair or rebuild the complete robot, it's components, or any subassembly. Our technicians can repair cylinders, harmonic drives, hydraulics, power supplies, printed circuit boards, pneumatics, servo motors, resolvers, servo drives, teach pendants and wiring harnesses.

www.industrialrepair.net

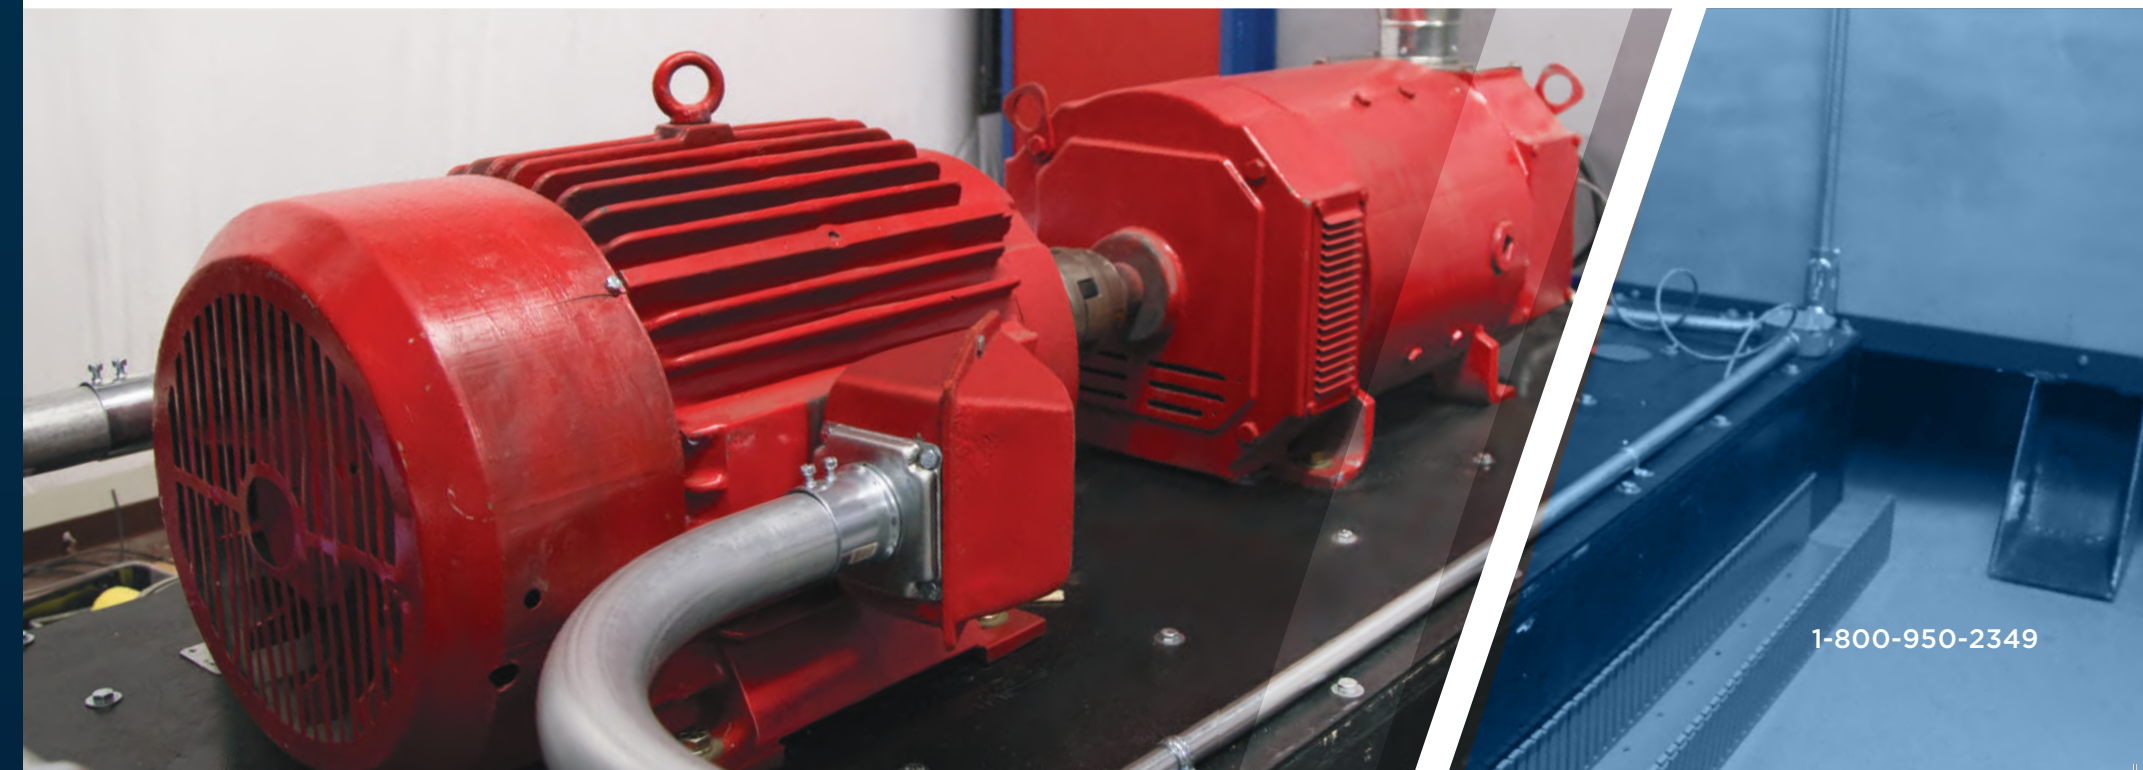

AC & DC DRIVE LAB

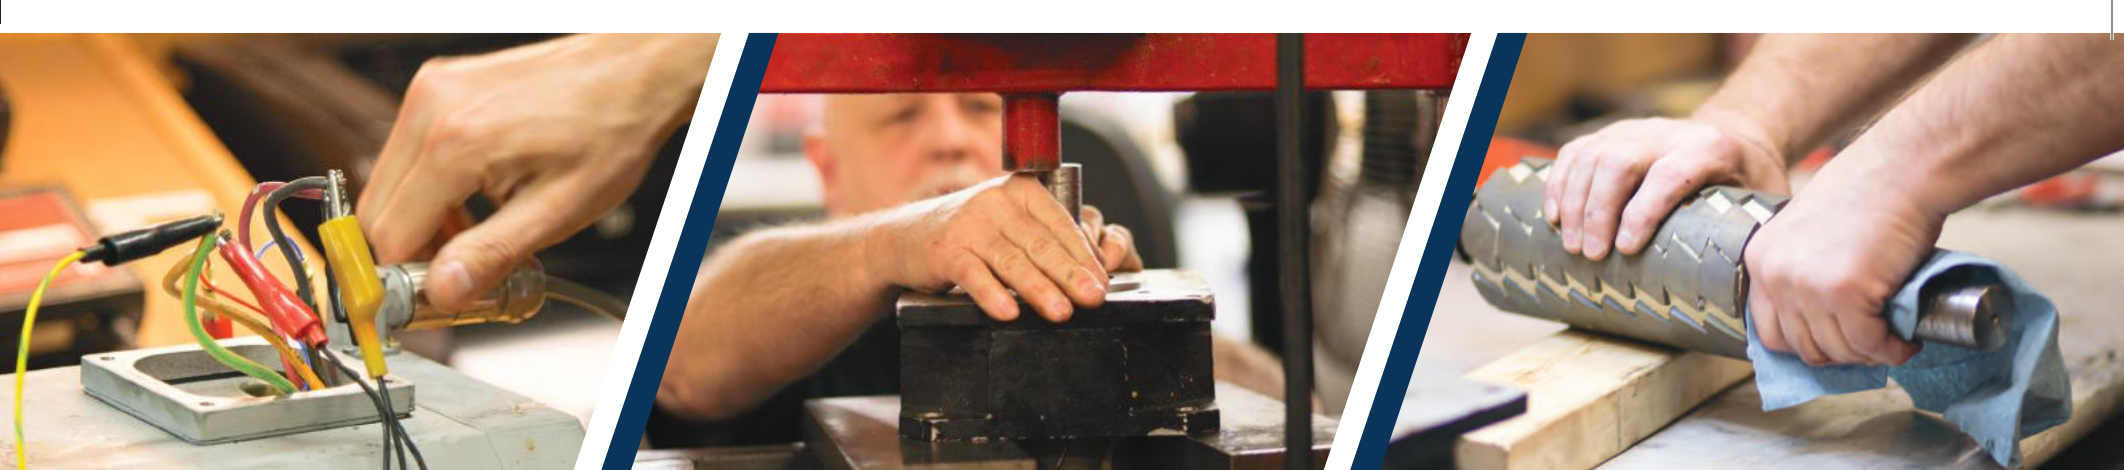

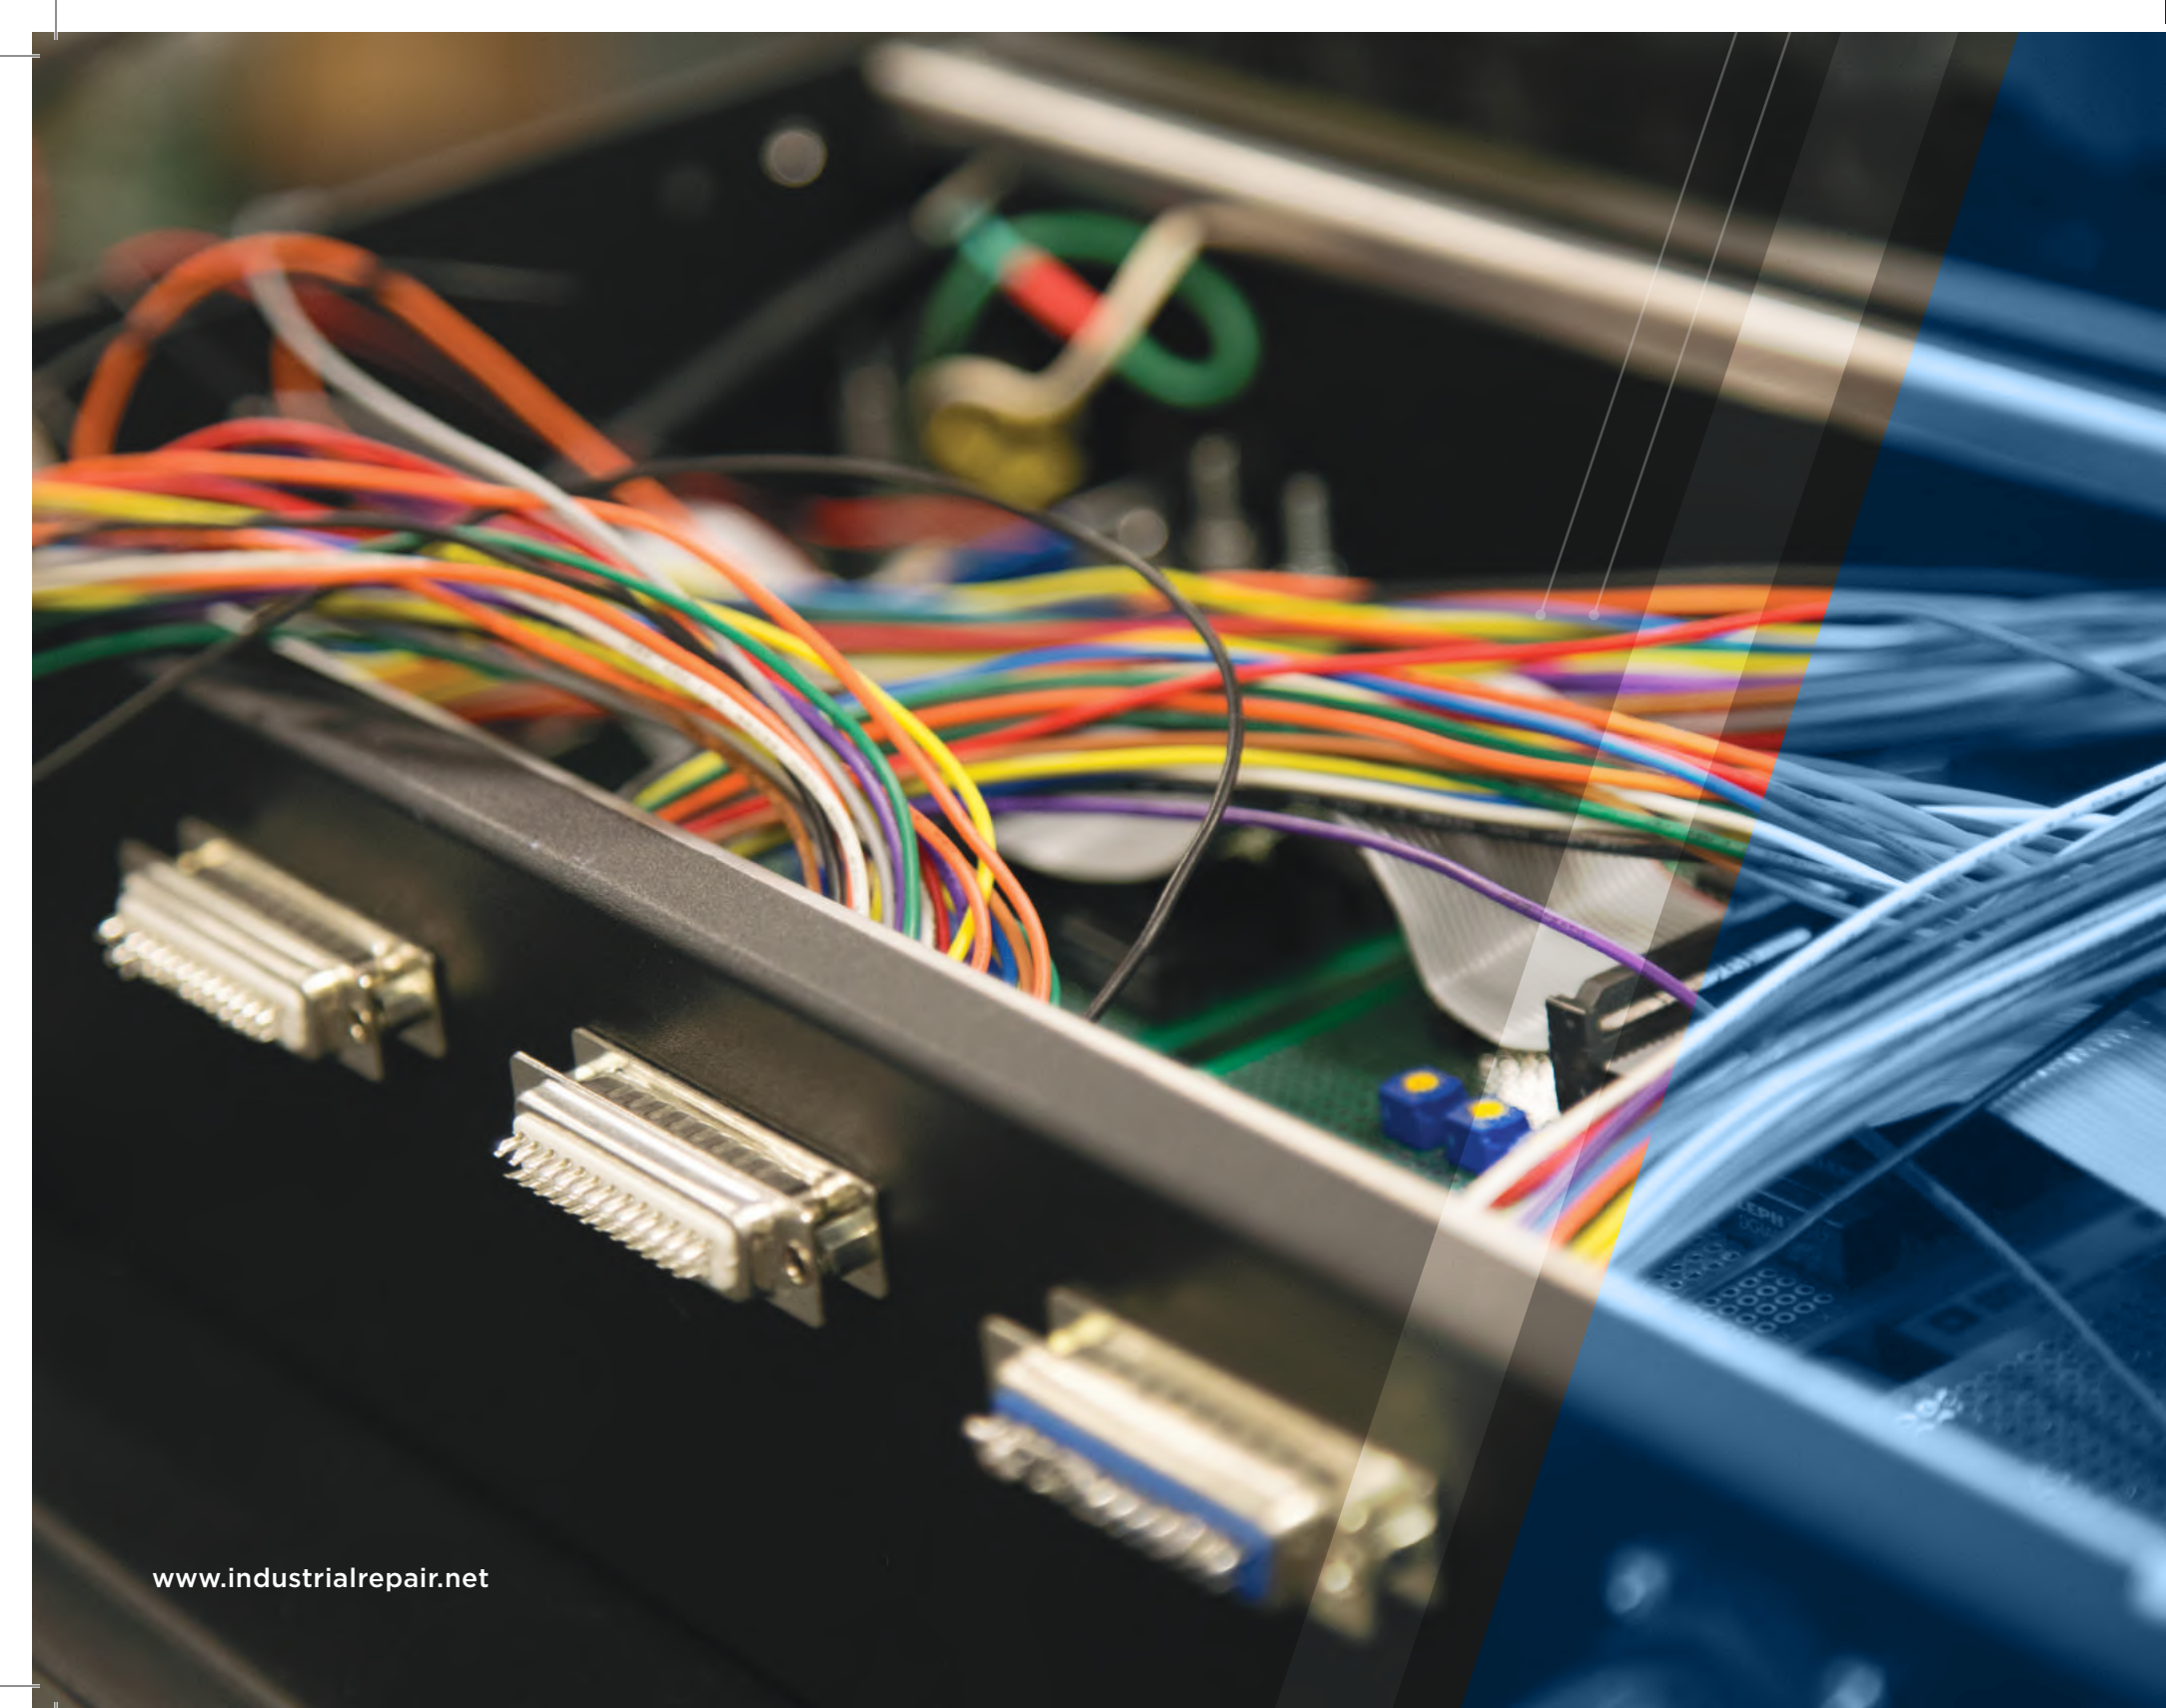

We designed and custom built a load center that gives our company the capability to fully test AC and DC drives up to 400 horsepower.

Full-load testing gives us the ability to:

- Measure AC ripple on DC supplies
- Locate hot spots and internal loose connections
- Verify that current read-out is within tolerance
- Check for full resistance testing to identify weak or faulty components on motors or drives

1-800-950-2349

SERVO MOTOR LAB

Our technicians can repair and fully refurbish servo motors and spindle motors. We maintain an extensive array of test equipment and offer complete run-testing and alignment of feedback devices to OEM specifications. By maintaining a high level of internal quality control, our technician's work must pass an assurance and performance standard before any repaired motor can leave our facility. Having this pride in workmanship, allows us to ease the mind of our clients, knowing their unit will work, as intended.

METAL DETECTOR LAB

We provide a comprehensive repair service aimed at keeping product inspection equipment operating with maximum efficiency. Our technicians repair control modules, power supplies, circuit boards, apertures, and all industrial metal detector electronics.

Our services include complete aperture rebuild, water damage restoration, and the repair and rebuild of conveyor systems. We can calibrate and test to your product specifications to ensure parts and systems are overhauled to pass internal and external inspections. Knowing compliance obligations are being met, ensures that inspection equipment performs accurately with today's regulatory standards.

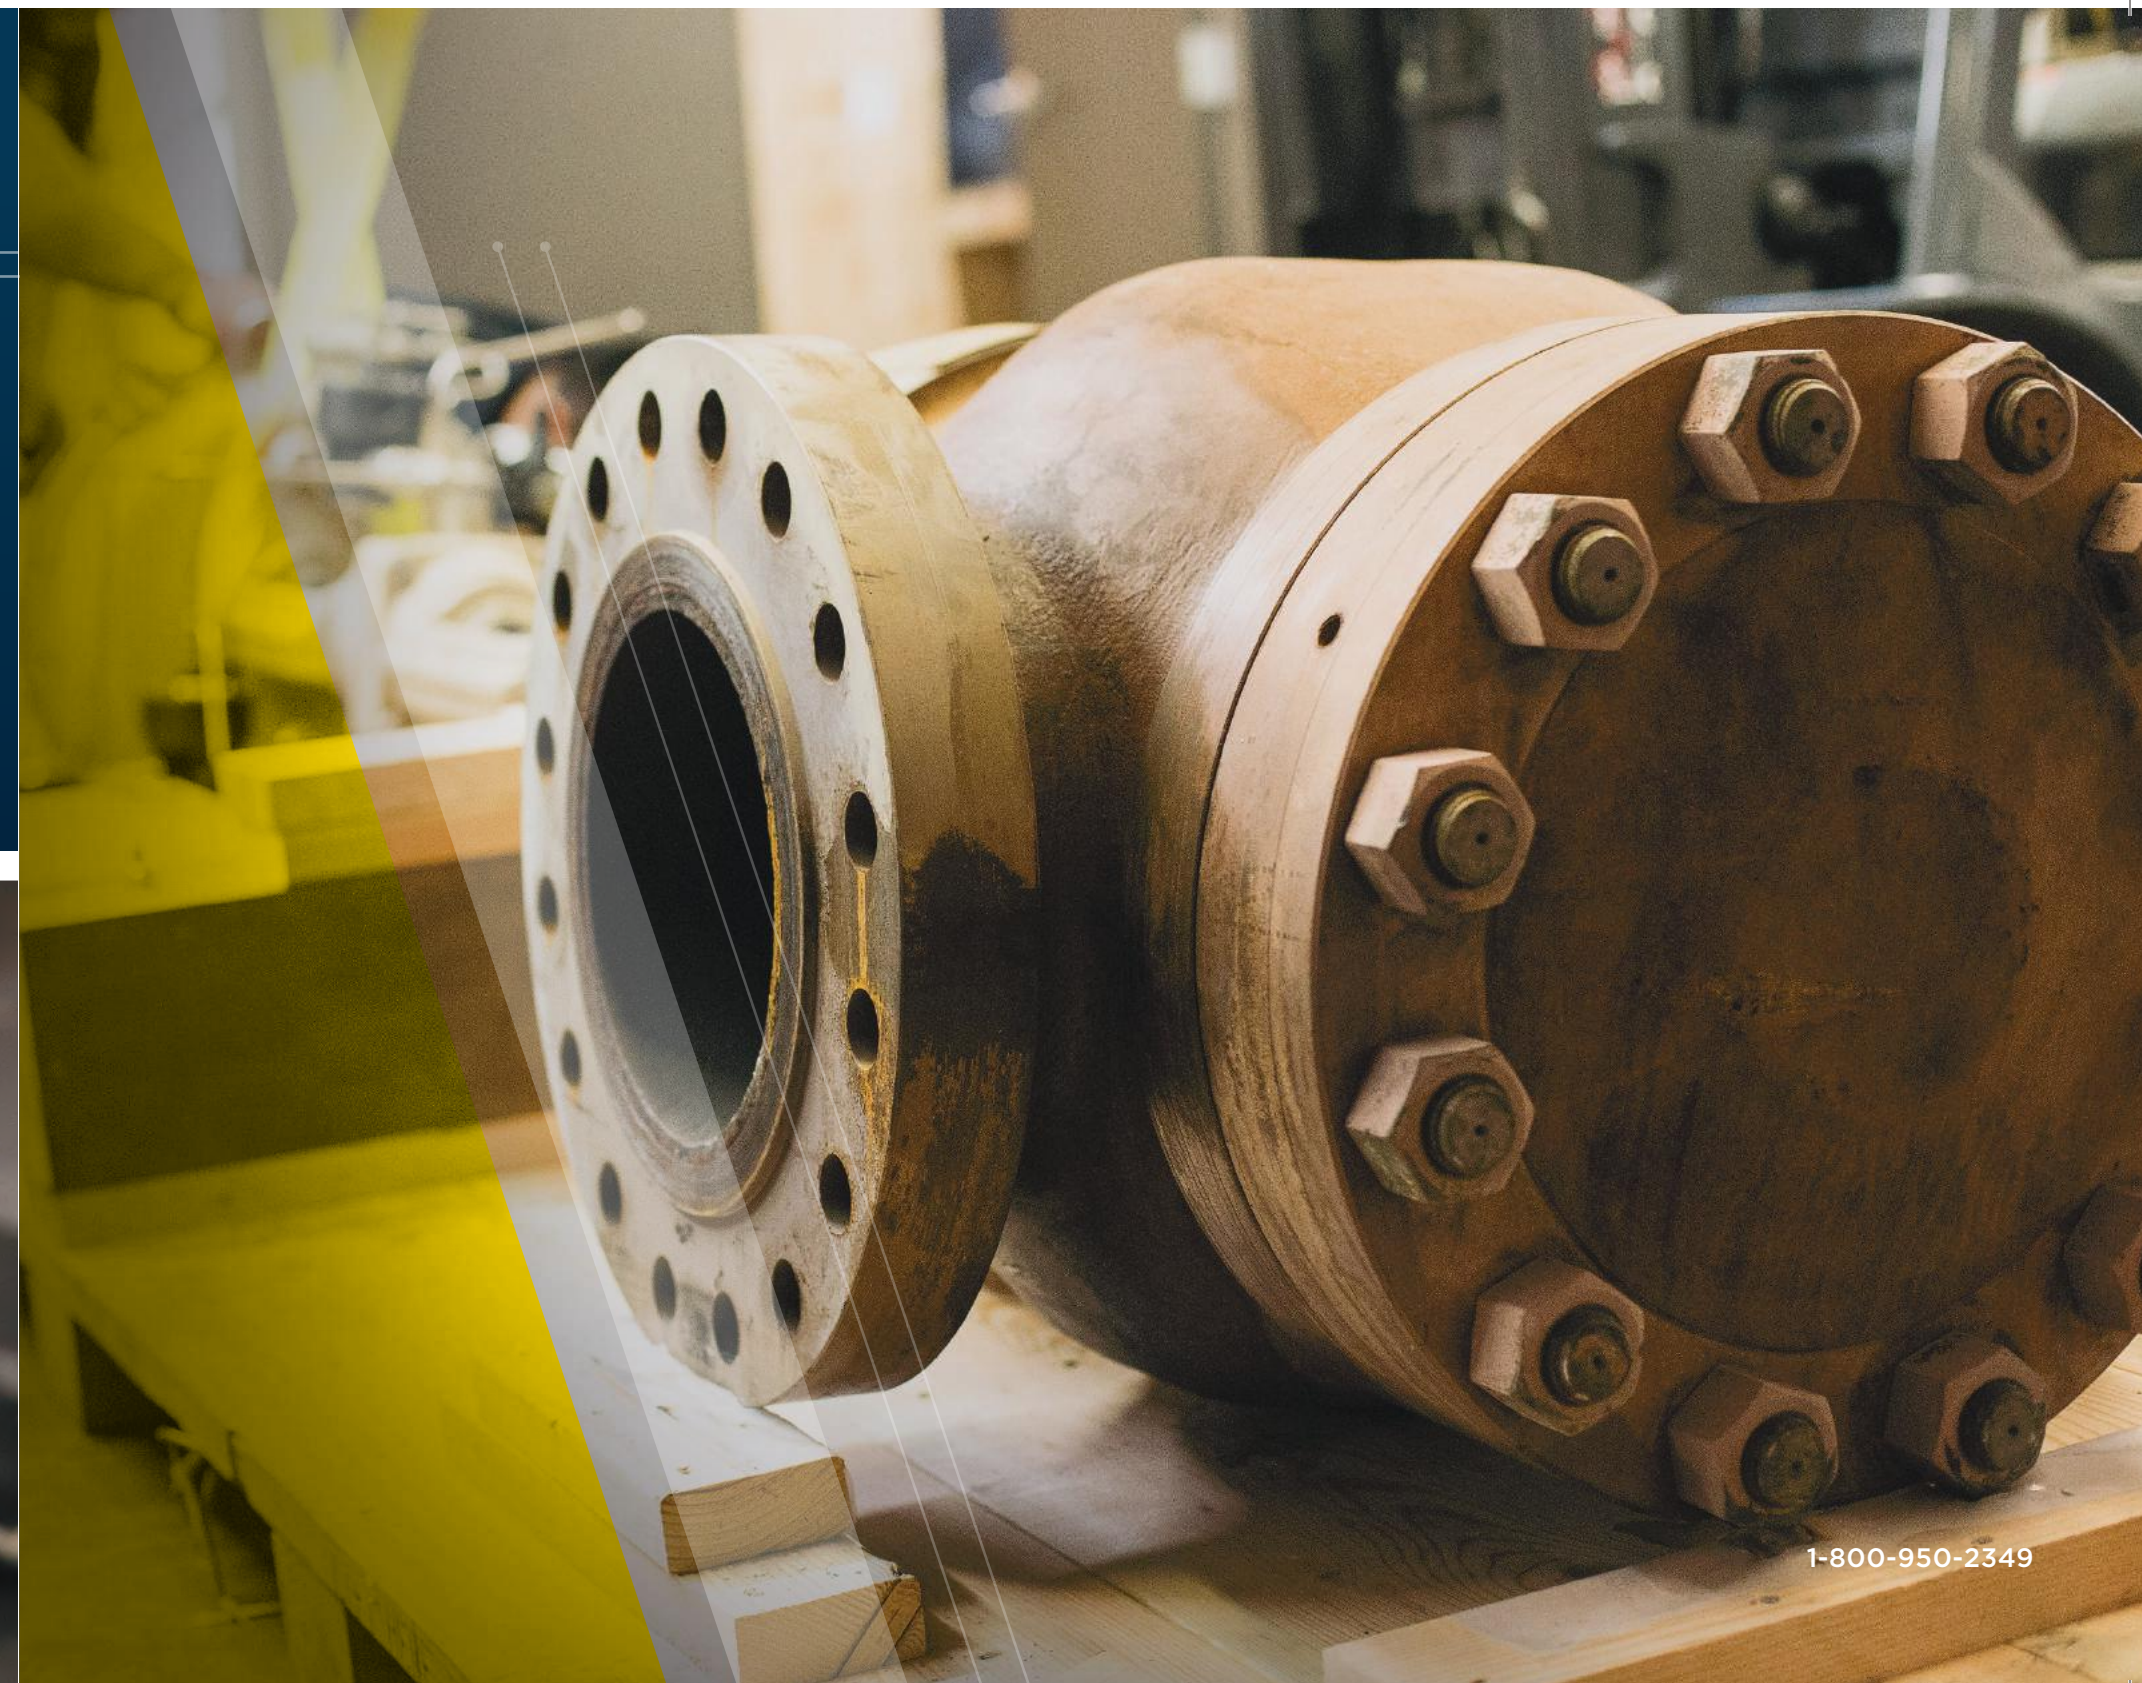

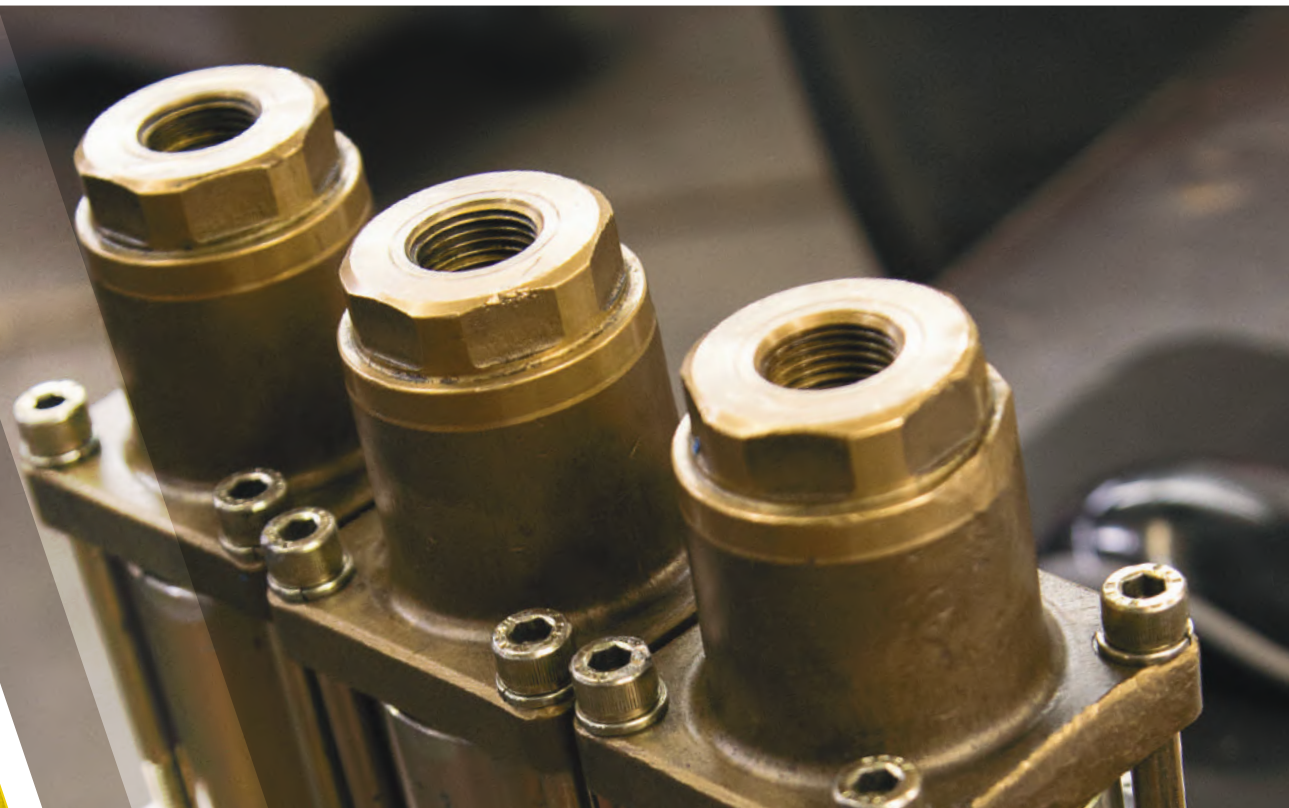

SERVO SYSTEM TESTING

With our expanded servo system testing capabilities we can fully simulate plant running conditions to allow for precise testing of servo drives, servo amplifiers, bus power supplies and related servo components to analyze and repair problem areas. Having this ability allows our team to test and troubleshoot all of the components in your system at once, giving you the peace of mind that everything will work when re-installing your unit.

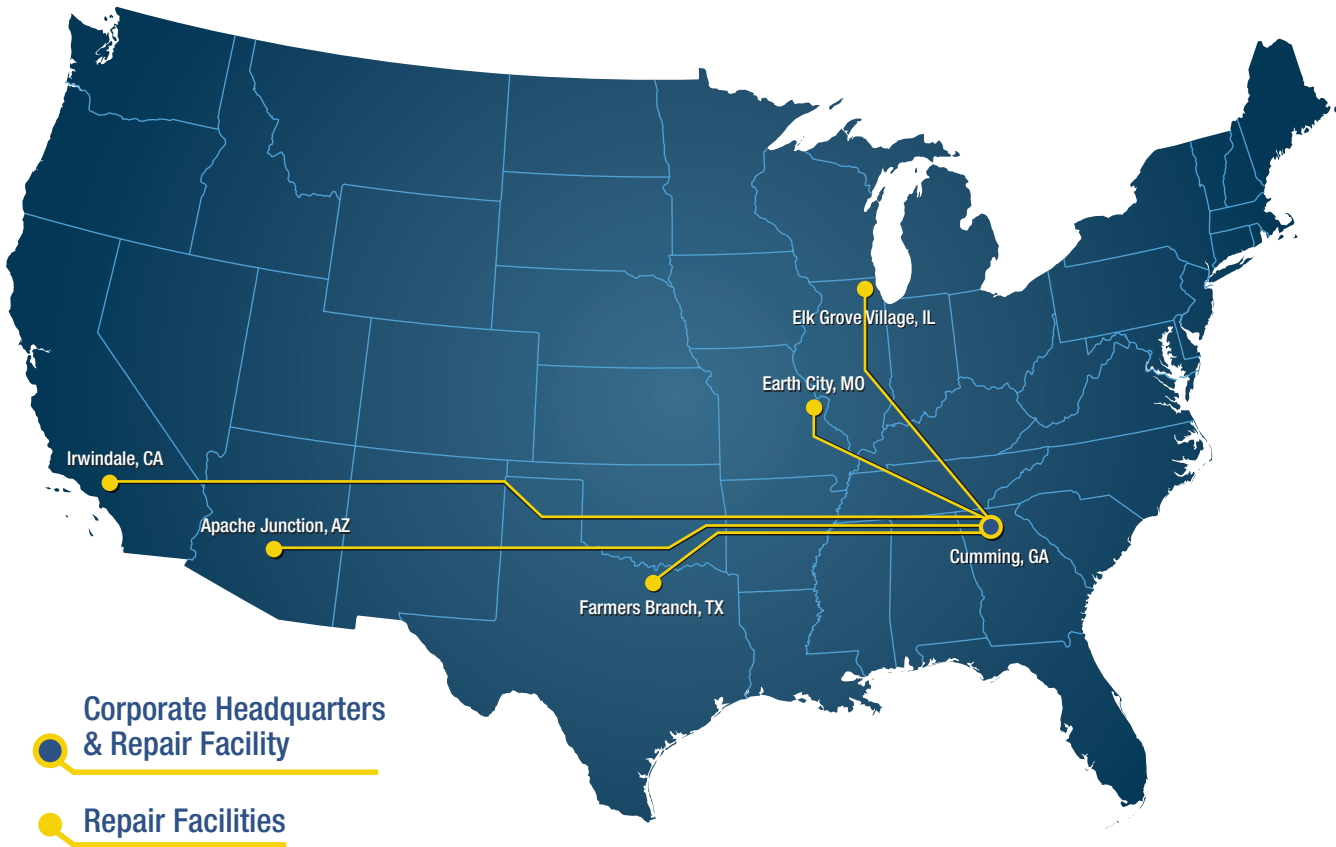

MECHANICAL LAB

We serve manufacturing industries, large or small, regardless of what equipment you operate. When it comes to your mechanical needs, our technicians have extensive expertise and capabilities to troubleshoot, repair, or rebuild your equipment. We can repair actuators, blowers, chillers, cylinders, gearboxes, heat exchangers, hoists, hydraulics, hydraulic motors, pneumatics, power units, pumps, radial piston motors, speed reducers, valves, and much more.
