To Whom It May Concern

I am applying for the Software Engineering Internship at Soar Technology this coming Summer 2023, that was posted on Indeed.com. With my knowledge of programming and data structures I think that I would be a great fit as a 2023 intern.

I am currently a Computer Science major at the University of Central Florida. I think that I would work well with the employees of Soar Technology in exploring different A.I. possibilities. I have already acquired education in the way of how computer software as well as hardware work together in order to make A.I. machines possible. I am also currently enrolled in a Concepts of Computer Science course here at UCF and in this class my skills of programming and algorithms have improved greatly by finishing assignments to completion during this course. Some examples of my assignments would involve sophisticated concepts like the Fibonacci code and basic data structures. I currently am in good academic standing, and I think that with this combination of academics and work ethic, I'd make a great fit.

Additionally, I have gained great communication and teamwork skills through my time in the Marine Corps. I know how valuable a person is when they are able to work effectively in teams or solo. I have served from 2016-2020. During those times I have been in multiple situations where if effective teamwork was not used, we would not have succeeded in our mission. An example of teamwork would be when I was tasked with supplying out MRE's after Hurricane Florence. Our mission was to make sure that all who came through looking for food were well supplied. Our teamwork comes in the way of us effectively making sure that each person was accounted for as well as taking counts of inventory. Making my way through the ranks I also have experience leading a team and not just following. I have led many Marines through difficult tasks and physical activities countless times. Working with teams effectively will not be an issue for me.

Thank you for taking the time to review my application and letter. I am excited for your response and hope for the best. My phone number is (555) 555 – 5555 or my email 0815msg1@gmail.com if you have any questions or concerns! I am available 24/7.

Sincerely,

Gian Marco Villani
