

You cannot carry this with you always & everywhere so for those with risk we implant an intra cardiac defibrillator. Making you LIVE FREE & FEARLESSLY is our aim.

SEEK HELP / JOIN US

Arrhythmia Support Network & Rhythm clinic is first of its initiative in India to educate masses about their curable heart rhythm problems & help them choose & get appropriate treatment to BEAT their disease & LIVE FEARLESSLY

Fellowship-Advanced Cardiac Electrophysiology Taiwan, USA, Germany

INTRACARDIAC DEFIBRILLATOR

We discipline the most indisciplined rhythms

ARRHYTHMIA SUPPORT NETWORK LAUNCHES

VENTRICULAR ARRHYTHMIA & SUDDEN CARDIAC ARREST PREVENTION & MANAGEMENT CLINIC & STATE OF ART SERVICES

All these rhythms are treatable but fatal if untreated in few minutes

FIRST & UNIQUE CLINIC & SUPPORT NETWORK TO TACKLE MOST COMMON CAUSE OF DEATH WORLDWIDE

- Management of sudden cardiac arrest survivors
- State of art critical care facilities for medical therapy & stabilization
- Post resuscitation device therapy for treatment of VT /VF /asystole
- Catheter ablation of Ventricular arrhythmia
- Conventional and subcutaneous ICD implantation
- Treatment of all types Brady and Tachyarrhythmia

MISSION: LET THE BEAT GO ON

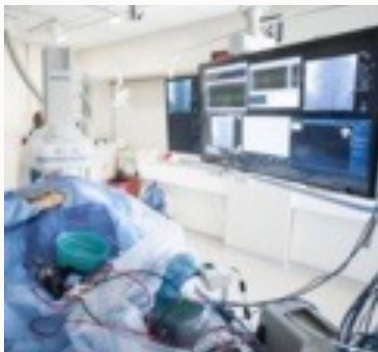

Dr Rohit Walia
Chairman & Founder Arrhythmia Support Network
MD,DNB,DM (Cardiology)
Post Doctoral Fellowship - Electrophysiology & Device
Post Doctoral Fellowship - Advanced Electrophysiology Department of Cardiac Electrophysiology

LETS KILL YOUR VT BEFORE IT KILLS YOU

Sudden cardiac arrest is the leading cause of death worldwide. Reviving a sudden cardiac arrest victim is like snatching life from jaws of death. The window period of revival is just few minutes. Presently owing to lack of cardio pulmonary resuscitation skills & public automatic external defibrillators > 99% patients face certain death. For high risk patients intra cardiac defibrillator is implanted.

INTRA CARDIAC DEFIBRILLATOR :

For patients with increased risk of sudden cardiac arrest an intracardiac defibrillator is placed to shock ventricular fibrillation to normal rhythm.

ICD Implantation

Subcutaneous ICD

REMOTE MONITORING :

Remote *monitoring* involves automatic unscheduled transmission of alert events. Patient initiated interrogations are non-scheduled follow-ups initiated manually by the patient as a result of a real or perceived clinical event

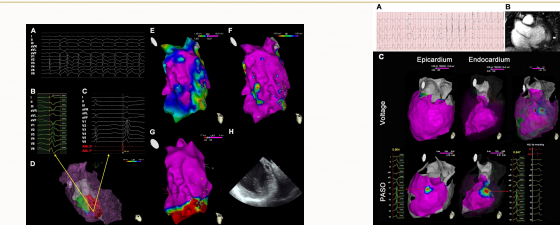

Remote Monitoring

Programmer

VENTRICULAR ARRHYTHMIA ABLATION :

Ventricular arrhythmias generally arises from a fast beating focus or electric implies repeatedly circulating in a circuit & can be killed by radio frequency ablation.

Ventricular Tachycardia Ablation

Epicardial Ventricular Tachycardia Ablation
