

THE UNITED MONARCHY OF GIEZWASM

PUBLIC LEGAL GUIDES

Understanding UMG Public Filings, Governing Records, Royal Framework & Institutional Development

2026 PUBLIC INFORMATION EDITION

PURPOSE

A plain-language public guide to help visitors understand what UMG's filings and governing materials are, what they do and do not establish, how The UMG Monarch Dynasty functions within UMG's own institutional framework, and where to find the larger public record.

Public Legal Notice

These Public Legal Guides provide general legal and institutional information concerning The United Monarchy of Giezwa (UMG), its public filings, governing materials, internal Royal House framework, succession publications, and institutional development.

UMG is not a law firm and this publication does not provide individualized legal advice, legal representation, or personalized legal-document preparation. Nothing in this guide creates an attorney-client relationship.

UMG's governing documents, Royal titles, succession classifications, ceremonies, councils, dynastic surnames, and related terminology describe UMG's own internal institutional, dynastic, cultural, ceremonial, and organizational framework. Publication alone does not establish internationally recognized sovereign-state status, territorial jurisdiction, diplomatic recognition, public governmental authority, immigration authority, police powers, or judicial authority over third parties.

DOCUMENT STATUS

External public filings should be distinguished from UMG-created governing records. A state or federal filing may verify that a filing occurred or an entity/application exists; it does not automatically validate every internal institutional or aspirational statement found in UMG-created documents.

Guidebook Contents

Guide 1 - Where 10+ Years Meets Action

Guide 2 - What Public Filings Are

Guide 3 - Why UMG's Filings Matter

Guide 4 - Governing Documents, Royal Decrees & Public Editions

Guide 5 - What Makes The UMG Monarch Dynasty Royal Within UMG

Guide 6 - Crown Continuity & Royal Succession

Guide 7 - From Internal Royal Framework to a Permanent Home

Guide 8 - How Filings Can Support Broader Institutional Success

Guide 9 - Citizens in Waiting & Public Participation

Guide 10 - Privacy, Redactions & Restricted Records

Guide 11 - How to Verify UMG Records

Guide 12 - Governing Overview: Where Most Public Records Are Available

Guide 1 - Where 10+ Years Meets Action

For more than a decade, UMG's project has developed through planning, written concepts, family legacy, Royal House structure, governing documents, cultural identity, succession design, institutional standards, and long-term development objectives.

The phrase "Where 10+ Years Meets Action" describes the transition from long-term internal planning into documented organizational steps that can be reviewed outside of UMG's own archives.

Public filings are especially important at this stage because they create dated, externally traceable milestones. They do not create the Crown or sovereign recognition; rather, they help establish a verifiable record showing that specific organizational and intellectual-property actions were actually taken.

Guide 2 - What Public Filings Are

Public filings are records submitted to, accepted by, recorded by, or issued through outside governmental or regulatory filing systems. They are different from UMG's own Constitution, Royal Decrees, succession records, ceremonial records, policies, and internal standards.

Examples in UMG's Current Public Record

- Minnesota formation record: The United Monarchy of Giezwa (Government-In-Exile), Minnesota nonprofit corporation, Chapter 317A, File No. 1569958100027, certificate issued July 22, 2025.
- Federal trademark record: THE UNITED MONARCHY OF GIEZWA, Serial No. 99295546, involving International Class 045 legal information services.

WHY THE DISTINCTION MATTERS

An external filing can verify that a legal or administrative event occurred. An internal governing document explains how UMG chooses to organize itself. Both are important, but they serve different evidentiary purposes.

Guide 3 - Why UMG's Filings Matter

UMG's filings matter because they provide an externally traceable timeline around an organization that also maintains its own internal Royal, dynastic, cultural, and governing framework.

- They establish dates and filing identifiers that can be independently reviewed.
- They document legal formation and intellectual-property activity.
- They help separate internal institutional claims from externally recorded events.
- They create archival milestones for future generations, researchers, media, legal professionals, prospective partners, and the public.
- They support continuity by preserving a record of how UMG moved from planning into formal institutional action.

The filings are therefore not the Crown and are not proof of sovereignty. They are part of the documented foundation beneath UMG's larger institutional project.

Guide 4 - Governing Documents, Royal Decrees & Public Editions

UMG's Governing Documents explain the organization's internal institutional framework. These may include a Constitution, Bylaws, Royal Decrees, succession materials, participation policies, institutional standards, and approved public summaries.

How to Read Status Labels

- Public Edition - an approved public-facing version of an internal governing record.
- Public Institutional Summary - a public explanation of a restricted source document without publishing sensitive operational or private content.
- Redacted Public Version - a public filing or record from which unnecessary personal or security-sensitive information has been removed.
- Founding Era Record - a historical source preserved as part of UMG's institutional history.
- Under Legal Review / In Planning / Proposed - a status indicating that a concept is not yet a completed or externally approved legal result.

KEY RULE

UMG governing documents describe UMG's internal framework and do not supersede applicable federal, state, local, foreign, or international law.

Guide 5 - What Makes The UMG Monarch Dynasty Royal Within UMG

Within UMG's own governing framework, The UMG Monarch Dynasty functions as the founding Royal House. Its royal character is created by the internal institutional system built around the Crown: the founding Monarch, Royal House titles, succession law, coronation traditions, regency, dynastic continuity, the Monarch surname, the Ruling Tree, Royal archives, and the preservation of each generation.

The succession framework is designed to continue through the founding Monarch's descendant line while allowing readiness, merit, character, continuity, training, and formal designation to be considered. It is not framed solely as automatic eldest-child inheritance.

The Founding Monarch

King Giezwa Monarch Jr. is identified within UMG as the founding Monarch and the origin point of the current public Crown and dynastic continuity framework.

The Queen participates in the continuity structure through ceremonial, advisory, and regency functions described in UMG's public succession materials.

IMPORTANT DISTINCTION

The UMG Monarch Dynasty's Royal status is an internal dynastic and institutional classification within UMG. It should not be represented as proof that another government or the international community has already recognized UMG as a sovereign state or the family as state-recognized nobility.

Guide 6 - Crown Continuity & Royal Succession

UMG's public succession materials explain Crown continuity, Royal titles, dynastic surname standards, heir designation, coronation traditions, regency, the Ruling Tree, and the public succession register.

- Succession is not required to follow strict primogeniture.
- Public succession standing can be clarified by an authorized succession instrument or formal Royal House announcement.
- Royal titles are internal dynastic and ceremonial classifications.
- A succession position does not automatically transfer private property, trusts, businesses, estates, intellectual property, or financial assets.
- Public editions can withhold full civil names and sensitive lineage records to protect minors and family privacy.

The standalone Royal Succession Master Volume is the principal public reference for this material.

Guide 7 - From Internal Royal Framework to a Permanent Home

UMG's long-term objective is broader than maintaining an internal Royal House on paper. The institutional vision includes pursuing lawful relationships and a potential permanent physical home through agreements, licenses, approvals, or other arrangements permitted by the laws of a host country.

A successful host-country partnership could give UMG a lawful physical base from which its cultural institutions, Royal traditions, archives, ceremonies, development initiatives, humanitarian work, education programs, and long-term organizational presence could operate.

Such a partnership would be a major institutional milestone, but it would not automatically create sovereign statehood, diplomatic recognition, or governmental authority. The legal effect would depend on the actual agreement, host-country law, powers granted, and any later international recognition.

MODERN-DYNASTY VISION

UMG seeks to preserve a record of a modern Royal institution being built from its early planning and Founding Era documents through later organizational development, public filings, physical institutions, and future generations.

Guide 8 - How Filings Can Support Broader Institutional Success

UMG's filings should be understood as building blocks rather than a final legal destination. Their value increases when they are combined with consistent governance, credible public records, lawful operations, professional legal review, real development activity, institutional continuity, and successful partnerships.

How the Pieces Fit Together

- Governing records establish the internal framework.
- Public filings establish externally traceable organizational milestones.
- Succession records establish dynastic continuity.
- Trademark and intellectual-property records help protect institutional identity.
- Public legal guides help outsiders understand the record without confusing internal status with external legal recognition.
- Development plans can demonstrate practical economic and institutional objectives.
- Future host-country agreements could establish the lawful basis for a permanent international presence.

Together, these elements can strengthen the long-term credibility, continuity, public understanding, and historical record of The UMG Monarch Dynasty. They do not guarantee sovereign recognition, but they can help demonstrate that the institution has been built deliberately, documented consistently, and developed through lawful steps.

FROM DOCUMENTS TO DYNASTY. FROM VISION TO INSTITUTION.

Guide 9 - Citizens in Waiting & Public Participation

Citizens in Waiting is UMG's internal participation and membership framework. It should be understood as an organizational status within UMG rather than recognized nationality, immigration status, diplomatic status, or a state-issued citizenship.

Public participation policies can explain eligibility, internal responsibilities, cultural participation, registry procedures, and other UMG membership concepts while clearly distinguishing them from nationality or citizenship granted by a recognized sovereign government.

Guide 10 - Privacy, Redactions & Restricted Records

Transparency does not require publication of every underlying record. UMG's public editions may redact or withhold personal, family-sensitive, security-sensitive, biometric, financial, inheritance, operational, or other restricted information.

- Personal mailing and contact information may be removed from website copies.
- Minor descendants may be identified by approved public dynasty names rather than full civil names.
- DNA, biometric, medical, school, address, custody, and private inheritance records should remain non-public.
- Security-sensitive operational documents may be summarized rather than reproduced in full.
- Historical originals can remain preserved in restricted archives even when a revised public edition is published.

PUBLIC ACCESS

Public access to UMG-created material does not transfer ownership or waive applicable intellectual-property rights. Government-originated records remain subject to the rights applicable to their original sources.

Guide 11 - How to Verify UMG Records

Visitors should verify records by identifying the type of document, its status label, date, filing number or serial number where applicable, and whether it comes from an external authority or from UMG's internal archive.

- For Minnesota formation records, use the entity name, Chapter 317A reference, File No. 1569958100027, and July 22, 2025 filing date.
- For the federal trademark record, use the mark THE UNITED MONARCHY OF GIEZWA and Serial No. 99295546.
- For UMG public editions, check the document title, edition year, status label, and whether the record is a full public edition or a public institutional summary.
- Do not treat a modified, incomplete, or unlabeled copy as the controlling UMG public edition.

When a current external status matters, visitors should review the relevant official government filing system because application, registration, compliance, and legal-status information can change over time.

Guide 12 - Governing Overview

The Public Legal Guides are intended to help visitors understand the record. The Governing Overview is the primary gateway to the larger body of UMG materials.

Most publicly available UMG records should be organized through the Governing Overview, including governing documents, Royal Decrees, public filings, Crown and succession materials, policies, public editions, institutional summaries, cultural standards, historical records, and related legal information.

NEXT STEP

After reviewing these guides, continue to the Governing Overview to explore the underlying public records and approved public editions.

Closing Public Record Statement

UMG's public record is intended to show the development of an institution over time: planning, internal governance, Royal continuity, public filings, intellectual-property activity, public education, and long-term development objectives.

The strongest way to understand that record is to distinguish carefully between what UMG has internally established, what has been externally filed or documented, what remains under development or legal review, and what represents a future aspiration.

That distinction protects the integrity of the record while allowing the history of The United Monarchy of Giezwa and The UMG Monarch Dynasty to be preserved as the institution develops.
