Augmented Reality for Events

What is augmented reality?

Answer: Technology that superimposes a computer-generated image on a user's view of the real world, thus providing a composite view. Augmented reality is the integration of digital information with the user's environment in real time. Unlike virtual reality, which creates a totally artificial environment, augmented reality uses the existing environment and overlays new information on top of it.

With AR, the world is your backdrop for product and logo placement. Imagine attendees walk into a hotel or conference center, download your app and see all the

products and sponsors immediately while walking to the registration desk!!! Attendee, potential clients and business owners will see virtual products, company information or company logos. No need to spend money on shipping in equipment and teams of people to display one product when you can showcase multiple at one time walking thru the halls of your next event. For some creative ideas, call us today at 1.877.893.4062.

REPAV is more than just equipment rentals, we are your audiovisual resource partner. REPAV is a **ONE-STOP** production house. Backed by AR Technology Partner, REP AV is offering this cutting edge technology to our partners. We want to be your production resource, not just another audiovisual company. We design and utilize multiple technology services to create a one-of-a-kind package for our partners. ***The right equipment, the right services for the right price.***
