

Content Disclaimer

Please read this before you rely on anything you find here.

AI makes mistakes. So might we.

Every lesson, tool recommendation, and piece of content on this site involves AI somewhere in the process — and AI can be confidently wrong. We build in checks wherever we can, but nothing here should be treated as guaranteed accurate. If something matters — a fact for an exam, a date, a citation — verify it yourself before relying on it.

We are not a substitute for your teacher or your parent.

This site can help you think, practice, and understand — but it cannot replace a real teacher explaining a concept, or a parent guiding a decision. If something on this site conflicts with what your teacher has taught you, trust your teacher and your syllabus first.

Tool links are not endorsements — and not partnerships.

When we point you to a free AI tool (ChatGPT, Gemini, Claude, or anything on Find a Tool), that's a recommendation based on what's useful and free — not a paid partnership, not an ad, and not a guarantee that the tool is perfect or error-free. We don't receive money from any tool we list. Each tool has its own limitations, and its own separate terms and privacy policy that we don't control.

Content changes.

Free tools change their features, pricing, and availability over time. We do our best to keep listings current, but a tool that's free today may not stay free forever. If you find something outdated, we'd genuinely like to know — parents and teachers can write to us at info@vanguard-scholar.org.
