

BP-64 • Bigger Picture • One Question One Weekend

AI in Your Neighbourhood in 10 Years

Imagine your area in the future. What is one thing you would want AI to help with — and one thing you would not want AI used for?

Start the brief

Write 100–150 words

YOUR CURRENT LEVEL

0 XP

Level 1: Future Noticer

Imagine your area

Ask AI for ideas

Name one hope

Name one worry

Write reflection

The future-neighbourhood question

This is not a science-fiction story about flying cars. It is a values question: if AI becomes common in your neighbourhood, what should it help with, and what should stay human?

Your final output is a short reflection of **100–150 words** with one hope and one worry.

1 Start with your actual neighbourhood

Think about daily life where you live, not a random futuristic city.

Daily problems

Traffic, public transport, waste, water, streetlights, safety, healthcare access, learning support.

Human things

Friendship, care, trust, judgement, privacy, community decisions, responsibility.

Future values

Convenience is useful, but fairness, safety, privacy, and human choice also matter.

My neighbourhood / area

Example: Andheri, Mumbai / Indiranagar, Bengaluru / my school area

One daily problem AI could help with

Example: traffic near school, garbage pickup, water leaks, study support

THOUGHT BULB

If stuck, name one daily problem here AI could help, and one thing that should stay human.

☐

I imagined AI in my actual neighbourhood, not just a fantasy city.

2 Ask AI to help you explore ideas

Open ChatGPT, Claude, or Gemini. Paste this prompt.

YOUR FILLED PROMPT

Imagine my neighbourhood in 10 years. What's one thing you'd want AI to help with here, and why? What would you NOT want it used for? Use this daily problem as a starting point: one daily problem here. Help me explore ideas, but do not write my final reflection. Give: 1. Three possible hopes 2. Three possible worries 3. One thing that should stay human 4. A simple writing frame for 100–150 words

COPY-PASTE PROMPT

Imagine my neighbourhood in 10 years. What's one thing you'd want AI to help with here, and why? What would you NOT want it used for?

Use this daily problem as a starting point: one daily problem here.

Help me explore ideas, but do not write my final reflection. Give:

1. Three possible hopes
2. Three possible worries
3. One thing that should stay human
4. A simple writing frame for 100–150 words

Copy my filled prompt

CAUTION BOARD

Do not let AI write the final reflection for you. Use it to explore possibilities. Your final answer should sound like your values.

☐

I used AI to explore hopes and worries, not to write my final answer.

3

Choose one hope

A hope is something AI could help improve in your area.

Good hope

AI helps detect water leaks faster so less water is wasted.

Too vague

AI makes everything better.

Good hope

AI helps buses arrive more predictably so students do not wait as long.

Too extreme

AI controls the whole neighbourhood.

One thing I would want AI to help with

Example: I would want AI to help manage traffic near my school because...

☐ I chose one specific hope for AI in my area.

4 Choose one worry

A worry is where AI should have limits.

Good worry

I would not want AI to watch everyone all the time in the name of safety.

Too vague

AI is scary.

Good worry

I would not want AI to decide which students deserve help without a human teacher checking.

Too simple

AI should never be used anywhere.

One thing I would NOT want AI used for

Example: I would not want AI used to make important decisions about people without human review because...

THOUGHT BULB

A strong answer can say: "I want AI to help with this, but I want humans to stay responsible for that."

☐ I chose one clear worry or boundary for AI in my area.

5 Write your 100–150 word reflection

Use this frame if you need structure.

1

Future scene

2

Hope

3

Why

4

Boundary

In 10 years, my
neighbourhood
could...

I would want AI to
help with...

This matters
because...

I would not want AI
used for...

My 100–150 word reflection

Write your own reflection here. Aim for 100–150 words.

Target: 100–150 words. Own thinking matters more than perfect length.

0 words

WRITING RULE

Do not write like a tech advertisement. Write like a person who cares about their area and has one hope plus one worry.

☐

I wrote my own 100–150 word reflection.

6 Self-check before you finish

Make sure your reflection has both imagination and judgement.

☐ I named one specific thing AI could help with in my neighbourhood.

☐ I explained why that help would matter.

☐ I named one thing AI should not be used for, or should only do with human review.

☐ The final answer sounds like my own view, not AI's view.

PRIVACY BOARD

Do not include your full address, personal family details, school ID, phone number, or private stories. Keep the reflection about the neighbourhood, not your private life.

☐

I completed the self-check.

7 **Optional: make your weekend brief card**

A small reminder of the future-neighbourhood brief.

CARD COPY

Title: One Question One Weekend

Question: What would I want AI used for in my neighbourhood in 10 years?

Prompt: “Imagine your neighbourhood in 10 years. What's one thing you'd want AI to help with here, and why? What would you NOT want it used for?”

Output: 100–150 words: one hope and one worry.

If stuck: Name one daily problem AI could help, and one thing that should stay human.

☐

I made, sketched, or saved the weekend brief card.

Final 5-minute move

Complete this sentence: “In my neighbourhood, AI should help with _____, but it should not replace humans in _____.”

My future-neighbourhood sentence

In my neighbourhood, AI should help with _____, but it should not replace humans in _____.

NOTEBOOK LINE

Write this down: “**The future is not just what technology can do. It is what people decide it should do.**”
