Female BHRT Patients at London Collective

Choosing the right provider for Bioidentical Hormone Replacement Therapy (BHRT) is an important step toward optimizing your health. At London Collective, we believe in offering personalized care tailored to each woman’s wellness journey. Our team’s experience in hormone restoration, combined with a patient-centered approach, ensures that your treatment plan is customized specifically for your individual needs and goals.

Variety of treatment options:

Whether it’s creams, pills, Pellets or other methods, we’ll work with you to find the best BHRT option for your lifestyle and health goals.

What Makes London Collective Different?

Personalized treatment plans.

We go beyond basic lab work to offer comprehensive tests that give us a complete picture of your hormone health. This ensures that we’re addressing the root causes of your symptoms, not just treating surface-level issues.

Extended consultations.

Our 1-hour consultations give you the time you need to discuss your health concerns.

Expertise you can trust.

With years of experience helping women optimize their hormone levels, we specialize in treating those who haven’t found success elsewhere, backed by advanced training from WorldLink Medical and Evexias.

Payment options.

We offer flexible payment options, including 0% APR financing through Cherry or PatientFi, to make hormone replacement therapy accessible and affordable for everyone.

Simple medication ordering.

We partner with trusted compounding pharmacies that are fully licensed, FDA-registered, and hold recognized accreditations (such as PCAB). This ensures your medications meet the highest standards for safety, quality, and effectiveness. Plus, you can enjoy quick and convenient delivery straight to your door, making your personalized treatment both reliable and hassle-free.

Initial Consultation

Initial 1-Hour Consultation: 199

Initial lab if Self-Pay Option: 185

Option 1: Membership Tiers

**All memberships include quarterly consultation, provider access, medications, supplies, labs every 6 months, lab review*

Bonus: NAD+, Glutathione or B12 injections every 6 weeks

☒ **Basic Collective Membership (One Hormone): 179/month**
Covers one hormone (e.g., Testosterone).

☒ **Standard Collective Membership (Two Hormones): 229/month**
Covers two hormones (e.g., Testosterone and Progesterone).

☒ **Complete Collective Membership (Three - Four Hormones): 279/month**
Covers Estradiol, Progesterone, Testosterone cream, and DHEA.

☒ **Add-On:**
Thyroid Support: +70/month
*Includes labs every 8-12 weeks

Option 2: Pellet Therapy (not a membership)

☒ **Pellet insertion is 389 every 3-4 months**

We require a 4-weeks lab draw after the first post pellet insertion and follow up 5 weeks after (this is all included in the initial fee).

**Progesterone is ordered for an additional cost if needed*

**Pellets provide stable, long-term hormone levels and require fewer interventions than other forms.*

1. Initial Lab Panel:

Includes tests like a CBC, CMP, Estradiol, FSH, T3 free, T4 free, SHBG, Testosterone free/total, TPO, TSH, CRP, DHEA, HgA1c, Iron panel, Vitamin D3, Vitamin B12, Insulin. Additional tests may be recommended based on your health history.

2. Pricing Overview:

Medications typically prescribed include Bioidentical creams and or oral prescriptions and necessary supplies, though your specific protocol may vary. Additional medications and supplements may be added based on your needs.

3. Follow-up Labs:

Regular monitoring every 6 months may include tests such as SHBG, Testosterone Free/Total, FSH, SHGB and others.

4. Lab Scheduling Policy:

Labs are performed according to the monitoring schedule included in your membership and are not available on-demand outside these intervals. Additional or off-schedule labs requested outside this calendar are not included in your membership and may incur an additional fee.

5. Not Included in Your Membership:

Primary care services, annual physicals, mammograms, and pelvic/gynecological exams are not included in your membership and are unrelated to hormone therapy monitoring. Please continue routine preventive care with your primary care provider or OB/GYN.
