

LONDON COLLECTIVE

Female BHRT Patients at London Collective

Choosing the right provider for Bioidentical Hormone Replacement Therapy (BHRT) is an important step toward optimizing your health. At London Collective, we believe in offering personalized care tailored to each woman's wellness journey. Our team's experience in hormone restoration, combined with a patient-centered approach, ensures that your treatment plan is customized specifically for your individual needs and goals.

Variety of treatment options:

Whether it's creams, pills, Pellets or other methods, we'll work with you to find the best BHRT option for your lifestyle and health goals.

What Makes London Collective Different?

Personalized treatment plans.

We go beyond basic lab work to offer comprehensive tests that give us a complete picture of your hormone health. This ensures that we're addressing the root causes of your symptoms, not just treating surface-level issues.

Extended consultations.

Our 1-hour consultations give you the time you need to discuss your health concerns, whether it's testosterone therapy, libido, body composition, or additional treatments like IV therapy, weight loss.

Expertise you can trust.

With years of experience helping women optimize their hormone levels, we specialize in treating those who haven't found success elsewhere, backed by advanced training from WorldLink Medical and Evexias.

Payment options.

We offer flexible payment options, including 0% APR financing through Cherry, to make hormone replacement therapy accessible and affordable for everyone.

Simple medication ordering.

We partner with trusted compounding pharmacies that are fully licensed, FDA-registered, and hold recognized accreditations (such as PCAB). This ensures your medications meet the highest standards for safety, quality, and effectiveness. Plus, you can enjoy quick and convenient delivery straight to your door—making your personalized treatment both reliable and hassle-free.

1. Initial Lab Panel:

Includes tests like a CBC, CMP, Estradiol, FSH, T3 free, T4 free, SHBG, Testosterone free/total, TPO, TSH, CRP, DHEA, HgA1c, Iodine, Vitamin D3, Vitamin B12 and others. Additional tests may be recommended based on your health history.

2. Pricing Overview:

Medications typically prescribed include Bioidentical creams and/or oral prescriptions and necessary supplies, though your specific protocol may vary. Additional medications and supplements may be added based on your needs.

3. Follow-up Labs:

Regular monitoring may include tests such as SHBG, Testosterone Free/Total, FSH, SHBG and others.
