Replenish™ 0-17-0-12 Organic Dryland PAC

Building soil health for optimum crop yield

Phosphate (P) is one of the three macronutrients essential for plant growth. It provides a key role in stimulating early plant growth and development. Sulphur (S) is an essential mineral nutrient integral to protein enzymes that regulate photosynthesis and nitrogen fixation.

Replenish™ 0-17-0-12 Organic Dryland PAC is a nutritional soil amendment derived from rock phosphate, elemental sulphur and organic compost. It is designed to build soil health and increase crop vigor for optimum yield. The total P₂O₅ is 17% and total S is 12%. The P and S are combined with organic compost in a unique formulation to liberate P availability while countering S deficiencies with no alkaline impacts. Together this combination ensures continued plant development and optimum maturity.

Guaranteed Minimum Analysis

Total P ₂ O ₅	17%
Sulphur (S)	12%

Replenish™ 0-17-0-12 Organic Dryland PAC augments and enhances soil health. Applications include major broad acre crops (cereals, oilseeds, legumes, forages), vegetables (corn, potato, cabbage, carrot, cauliflower, broccoli, sugar beet) and fruits (blueberry, raspberry, strawberry, cherry, apples, pears, grapes).

Packaging Sizes

1000 kg, bulk

Product Characteristics:

Appearance Granular
Bulk Density 90 lbs/ft³

Storage and Cautions

Store in cool, dry place.
Keep product out of reach of children.
Avoid contact with skin, eyes and lungs.
Consult qualified agronomist prior to use.

WARRANTY AND CONDITIONS OF SALE:

Manufacturer warrants that this material conforms to the chemical description hereon and is reasonably fit for the use directed. No other warranty is made, either expressed or implied. Buyer and user assumes all risk and liability resulting from handling, storage and use of this material, and the manufacturer should not be liable whatsoever for any indirect or consequential damages to buyer or user (including any lost revenues or profits).
