

# Replenish

From the earth, for the soil.

## Nutritional Phosphate & Sulphur

For Sustainable and Organic Use

### 0-17-0-12 + Proprietary Active Compost

**REPLENISH** contains the purest, most natural form of phosphate a soil can get, turning back the clock on years of nutritional crop depletion.

### No Chemical or Salt Risk to Seeds

**REPLENISH** is a ground-breaking “nutritional” phos product, meaning it feeds the microbes in the soil, and is not a direct-to-plant fertilizer. Designed to be broadcast or seed-placed, **REPLENISH** uses only biological processes, so it does not have a high salt risk, unlike chemical fertilizers.

### How it Works

In addition to its natural source, **REPLENISH** contains 11 other nutrients:

1. Nutritional sulphur, which helps break down the phosphorus so the microbes in the soil can quickly convert it.
2. Proprietary live compost that contains millions of microbes.
3. Bonus micronutrients including calcium, iron, copper and magnesium to give added nutrition to soil microbes and balance soil pH.

SALT INDEX: COMPARISON	
<b>REPLENISH</b>	3.4
<b>Phosphate Fertilizer</b>	28 - 90
REPLENISH ANALYSIS	
<b>P205</b>	17%
<b>Sulphur</b>	12%
<b>K20</b>	0.2%
<b>Boron</b>	0.5%
<b>Calcium</b>	19.5%
<b>Copper</b>	0.2%
<b>Iron</b>	8.0%
<b>Mn</b>	2.0%
<b>Moly</b>	0.5%
<b>Zinc</b>	0.3%
<b>Mg</b>	0.3%

- ▶ **Correct amounts depend on soil analysis, plant tissue or irrigation requirements.**
- ▶ **We recommend 200 -300 lb/acre**
- ▶ **Packaging : Bulk, 1000 Kg**
- ▶ **SGN : 200-350**
- ▶ **Crushing Strength: 3.0 - 3.5 Kg/Granule**
- ▶ **Fines: 1.2-1.5 %**

**We'll apply it for you!**

The Agri-Spread Spin Spreader is more consistent and efficient than seed-drill fertilizing, and can be done at any time of year.
