

Replenish

From the earth, for the soil.

SUSTAIN PKS

0-12-10-10 + Proprietary Active Compost

SUSTAIN PKS contains the purest, most natural form of Phosphate, Potassium and Sulphur, a soil can get, turning back the clock on years of nutritional crop depletion.

No Chemical or Salt Risk to Seeds

SUSTAIN PKS is a ground-breaking “nutrimental” product, meaning it feeds the microbes in the soil, and is not a direct-to-plant fertilizer. Designed to be broadcast or seed-placed, **SUSTAIN PKS** uses only biological processes, so it does not have a high salt risk, unlike chemical fertilizers.

SALT INDEX: COMPARISON

SUSTAIN PKS	8
Phosphate Fertilizer	28 - 90

REPLENISH ANALYSIS

P205	12%
Sulphur	10%
K20	10%
Boron	0.4%
Calcium	15%
Copper	0.2%
Iron	6.0%
Mn	1.5%
Moly	0.4%
Zinc	0.2%
Mg	0.2%

How it Works

In addition to its natural source, **SUSTAIN PKS** contains 11 other nutrients:

1. Nutrimental sulphur, which helps break down the phosphorus so the microbes in the soil can quickly convert it.
2. Proprietary live compost that contains millions of microbes.
3. Bonus micronutrients including calcium, iron, copper and magnesium to give added nutrition to soil microbes and balance soil pH.

- ▶ **Correct amounts depend on soil analysis, plant tissue or irrigation requirements.**
- ▶ **Packaging sizes: Bulk, 1000 kg**
- ▶ **Balanced Nutrimental Blend for all crops or forage**

Particle Size Distribution

- ▶ **<2 mm: 33%**
- ▶ **2.0-3.3mm: 61%**
- ▶ **3.3-<4.75mm: 7%**
- ▶ **Crushing Strength: 3.0-3.5 Kg**

We'll apply it for you!

The Agri-Spread Spin Spreader is more consistent and efficient than seed-drill fertilizing, and can be done at any time of year.
