

What In The World Is Going On In The World?

Tennessee Neighbors for Liberty 1/21/25

Mankind has an enemy, Satan who long ago guarded the throne of God but was rejected by God & ejected from heaven because he desired to be in God's place (Is 14, Eze 28).

Then God creates the universe, earth & man & gives him dominion over everything.

The jealous enemy seduces Eve to distrust God & exercise her free will & man loses his acceptability before God but God has a plan to redeem man which does not include Satan.

Gen 3:15 - God's judgment - Satan will be destroyed by the seed of the woman.

Gen 6 - Satan corrupts the human gene pool with fallen angels to try to prevent that seed from coming but God judges those efforts with a flood. "...the *Nephilim* were on the earth in those days (flood) **and ALSO after that.**"

When that seed, Jesus, finally comes, Satan tries 3x to seduce him into disobedience.

Mk 4:6 - "*I will give you all this domain & its glory...it has been handed over to me*"

Jesus supports Satan's claim-Jn 14:30 - Jesus acknowledges Satan as "...the ruler of the world..."

This world is not our home. We are pilgrims in a foreign land under hostile occupation and we're looking for the city whose architect & builder is God (Heb 11).

Satan - failed in trying to replacing God on the throne because God judged his sin

" " in trying to destroy mankind because God already had a plan for redemption

" " in trying to prevent the arrival of the seed that would crush him

" " in trying to kill the seed because God raised him from the dead

" will fail in trying to prevent his demise & knows his time is short (Rev 12:12)

His only remaining option is to pursue revenge against God & His people (Rev 12-13).

During the tribulation he blasphemes God "*and...those who dwell in heaven*" (Rev 13:6).

Satan hates God & hates His people & will do anything to deny God the pleasure of their presence in eternity.

Whistleblower - "*If we can't control the world, we'll destroy it.*" This is the heart of Satan.

Current orchestrated efforts to kill & destroy include:

Earthquakes (Haiti Jan 2010) caused by HAARP

Wars (always engineered for monetary purposes)

Famines (from poisoned food supply)

Covid (to seduce people into making themselves magnetically responsive to 5G)

Fog (using carcinogenic chemicals to enrich the medical industry while killing people)

Fires (ignited by DEWs & Lasers to build 15 min cities to bring mankind under control)

Cloud Seeding (infusing toxins into the air by plane/drone to control weather)

Earthquakes - Created by one of Nikola Tesla's discoveries that excites vibrational frequencies & triggers movement of earth's tectonic plates. This created massive chaos in Haiti in 2010 which offered an opportunity for government control & facilitated the kidnapping of thousands of children for child trafficking, organ harvesting & adrenochrome collection.

Wars - Operation Desert Storm was an excuse to seize control of ancient remains of buried Nephilim for DNA harvesting.

Famines - Poisoned food supply creates disease proliferation & enriches the medical industry as it drains the resources of people who try to stay alive but will eventually die.

Covid - A well-orchestrated campaign to again corrupt the human genome, create worldwide disease & collect DNA info through PCR tests to identify how to eliminate specific populations.

Fog - The latest effort to infuse barium, strontium, aluminum oxide, carbon monoxide, graphene oxide, ferric oxide & hydrogen chloride which becomes hydrochloric acid when mixed with water in the process of fighting fires into the atmosphere in order to enrich the medical industry while facilitating the deaths of millions. Some of this occurs by planes that spray toxins into the air, some by drones & some in the process of fighting the fires as the water added to the burning PVC releases CO (carbon monoxide), CO₂ (carbon dioxide), NH₃ (ammonia), HCL (hydrochloric acid) & dioxins (most toxic synthetic chemicals in existence)

Fires - 10,000+ homes & 145,000+ acres. PVC (Polyvinyl Chloride) is ubiquitous in our world. Burning PVC requires 734 degrees to melt causing mold to develop in surface layers which then produces an aerosol that causes the fire to spread more rapidly. The chloride in PVC (polyvinyl chloride) causes the release of dioxins, the most toxic synthetic chemicals in existence due to the presence of chlorine atoms at specific places in the compounds.

Dioxins - Invisible to the eye and contain chlorine, carbon & oxygen. They are highly toxic compounds emitted from the bleaching & chlorinating process & released into the air when burned. They damage the immune system, cause developmental problems (such as spina bifida), reproductive problems, ischemic heart disease, cancer, diabetes, endocrine dysfunction (thyroid) and cardiovascular, neurological, hormonal & GI system issues.

Toxic Shock Syndrome - Occurred in 1978 due to chlorine bleach in cotton tampons

E Palestine, OH train derailment - Dioxins saturated the eastern US & Canada

LA Fires - Burned over 145,000 acres releasing massive amounts of dioxins & hydrogen Cyanide (HCN).

Dioxins' half-life - 50-100 yrs & it takes 10 half-lives to disappear from the soil. So, in 500-1000 yrs it will be undetectable unless more is deposited.

EPA - Maximum lifetime tolerable amount of dioxins for humans - 1/32,000th of a grain of salt.

Dioxin Sources - Fires, volcanoes, cigarette smoke, recycling of electronic products like computers & incineration processes like burning municipal waste & trash

Toxic particles are covering California's Central Valley (which supplies much of the US fruits & vegetables) contaminating crops, orchards, water & grass which serves as feed for cattle and thereby meat and dairy products.

Mike Adams: *"Every person breathing the smoke from these structure fires is inhaling cancer-causing chemicals at femtograms of exposure which is a millionth of a billionth of a gram"* ("Operation Meltdown" by Mike Adams & Steve Quayle)

Dioxins are coating the leaves & killing the trees, vegetation, animals & people who either inhaled, ingested or absorbed the dioxins through the skin.

Agent Orange - TCDD was a dioxin used in Vietnam to defoliate trees & bind to specific human proteins which alter the function of other genes.

But the fallout from these fires is not limited to the air.

Dioxins that are deposited in water do not dissolve (dioxins are hydrophobic) but bind to surface areas & sediment, which is consumed by birds, animals, fish & shellfish. In vertebrates, dioxins bind to fat cells & have a half-life of 7-11 yrs. So, it is very difficult to detox from dioxins in fat cells and takes at least 2 decades.

Over 90% of our exposure to dioxins comes from our food supply.

Meat, dairy, fish & shellfish are all high in dioxins

Since 71% of earth's surface is water...

Dioxin concentration in fish is 100,000 times higher than that in the surrounding environment.

International Journal of Environmental Research and Public Health

This attests to the fact that humans, land masses & oceans are being saturated with deadly dioxins which are eaten by small fish which are eaten by bigger fish which are eaten by bigger fish...

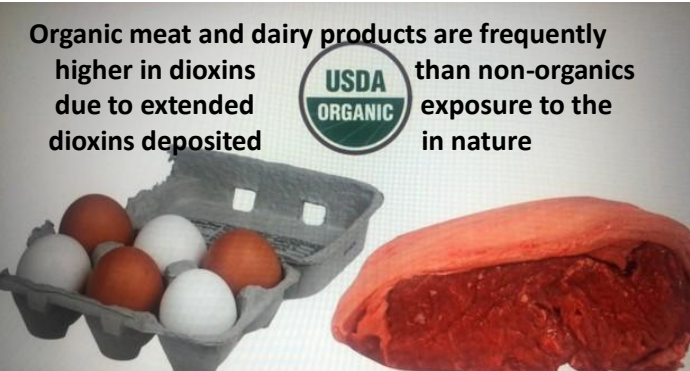

Grazing animals and pets ingest huge amounts of dioxins from grass and soil which they store in their fat tissue.

"The category with the lowest (dioxin) level was a simulated vegan diet...."

"Blood dioxin levels in pure vegans have also been found to be very low in comparison with the general population..."

However, a vegan diet will not completely avoid dioxins because they are inherent in the food supply due to our industrialized environmental hazards.

Organic meat and dairy products are frequently higher in dioxins due to extended dioxins deposited

 than non-organics exposure to the in nature

Dioxins in organic eggs: a review

M. De Vries^{1,2}, R.P. Kwakkel¹ and A. Kijlstra^{1,*}

¹ Animal Sciences Group, Wageningen University and Research Centre, P.O. Box 65, NL-8200 AB Lelystad, The Netherlands

Received 15 July 2006; accepted 9 August 2006

Abstract

Eggs contribute for about 4% to the daily dioxin intake of humans. Research among layer farms in the Netherlands and other EU countries has shown that organic eggs contain more dioxins than conventional ones and that a significant number of organic farms produce eggs with a dioxin content that exceeds the EU standard. The lower levels of dioxins found in organic eggs may be due to the fact that organic farms may decrease the dioxin levels in organic eggs but at the same time may interfere with the image of the organic production system.

Organic eggs, cheese, cream & milk are all Higher in dioxins than non-organic due to outdoor exposure

Since organic meats, dairy products
 and fish contain more dioxins, it
 might be wise to ...
Change Your Diet

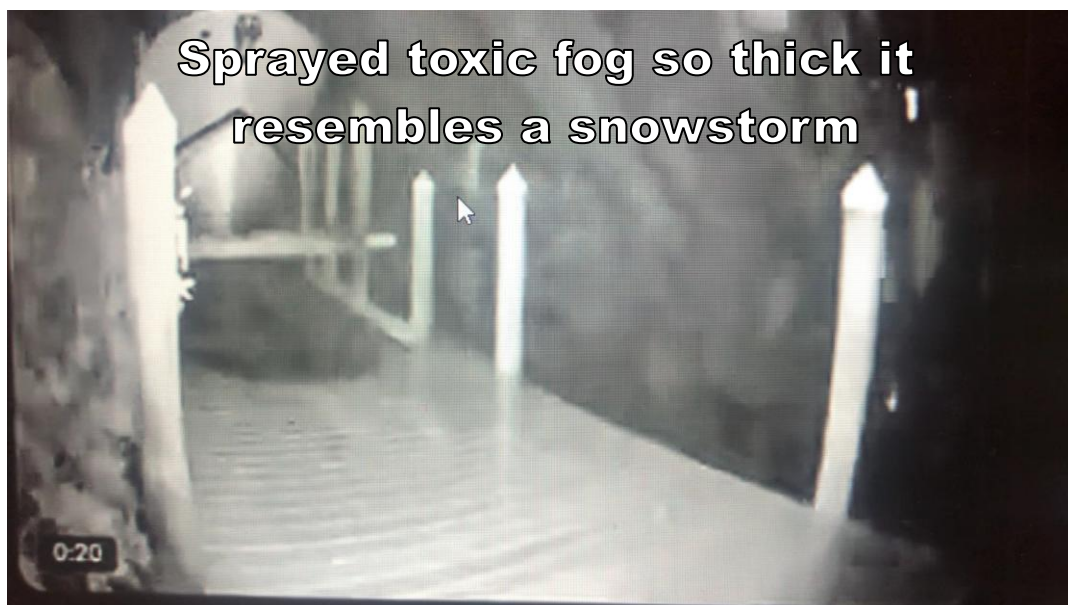

Cloud Seeding

Liquid propane (dry ice), salt vapor & silver iodide are used to create moisture in clouds either by updraft from a plane underneath the cloud or by overflying the cloud & releasing Ag_2O (silver oxide) into the top of the cloud.

Interestingly enough, Ag_2O is an addictive explosive bleach when mixed with other compounds which increases dopamine production causing temporary euphoria. But there is an inevitable crash that occurs involving delusions & even paranoia.

Nevertheless, spraying is on the rise as the US gov has increased the amount of Ag_2O being sprayed by 800% over the past decade, which is quietly increasing the risk of mental problems, seizures, cardiac arrest & lung damage. Every commercial airline has a spraying contract with the US government.

What we can do about it:

Chlorella - a green algae, ultimate green food which has incredible detoxifying, micro-nutrient, immune boosting & healing qualities.

“The greatest healer & detoxifier of all foods on the planet.” (The Detox Specialist)

Toxins, heavy metals & environmental poisons like dioxins affect DNA & block the uptake of micronutrients, create disease & speed up the aging process.

Chlorella should be started initially in small doses for the first three days. Sun Chlorella brand starts off with 5 tablets a day and after 3 days increases to 10 tablets, then after another 3 days 15 tablets and so on depending on the reasons for taking it.

If you are taking chlorella for maintenance, 15 tablets a day is ideal however, if you are trying to detoxify from heavy metals then you need to take substantially higher doses for a short period of time and then drop back to the 15 a day maintenance when it has done its job. It is best to see a nutritionist who can help determine the doses needed for individuals who need guidance on high doses, however being a food, it is extremely safe in large doses.

Therapeutic dosing length is 3 - 6 months.

Spirulina - superfood of the sea, powerhouse of nutrients, complete protein containing every essential amino acid the body needs; most nutrient dense food on the planet. It boosts the immune system, detoxifies the body by binding to toxins, balances gut bacteria, balances blood sugar levels, lowers blood pressure, increases energy, supports weight management, builds muscle tissue & reduces inflammation

Best supplement for weight loss, immune support and brain fog, while being a top source of complete protein and iron

Contains antioxidants, B-vitamins including B1, B2 and B3, chlorophyll, enzymes, iodine, iron, magnesium, phytonutrients & potassium

Dosage - 2 - 10 grams/day (1 tsp = 1 gram)

Best taken in conjunction with Chlorella

Chlorella Smoothie Recipes

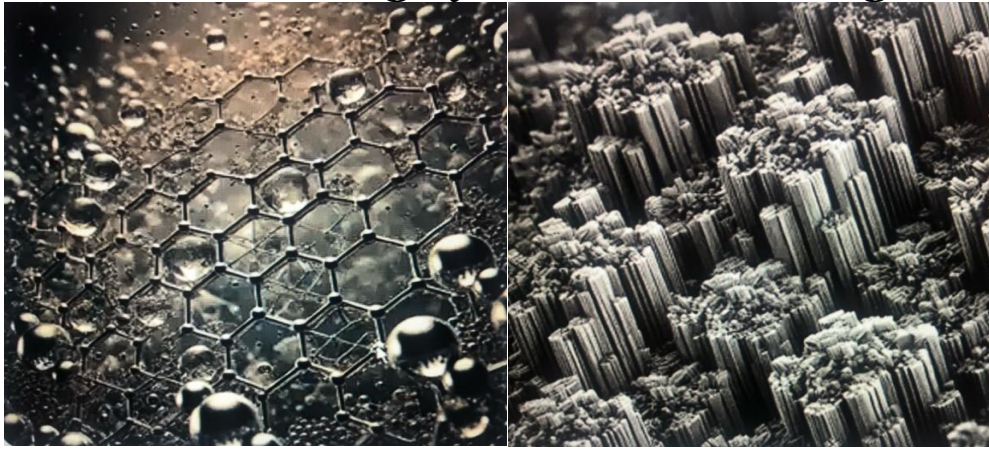

1-2 cups of spring water
½ Chopped cucumber (with skin)
¼ to ½ Avocado (without skin!)
1 clove of garlic (optional)
8 fresh basil leaves
2 sprigs of parsley
Juice from ½ lemon or lime
¼ teaspoon Himalayan salt
Fresh ground black pepper
15 tablets of Sun Chlorella “A”
Serves 1 – 2

15 tablets of Sun Chlorella “A”
½ cup of spring water
½ banana peeled
½ avocado peeled
½ apple with skin
1 kiwi peeled
A touch of raspberry or strawberry
Serves 1-2

Spirulina in powder, tablet or liquid form can easily be added to Chlorella smoothies.

Additionally, broccoli sprouts, activated charcoal & chlorine dioxide are all reported to be effective in detoxing dioxins.

Graphene Oxide & Aluminum Particulates Found In Unnatural Fog By Dr Robert O. Young

Graphene oxide exists in a hexagonal shaped bond of carbon to carbon atoms which is one atom thick which allows it to easily cross the blood/brain barrier & pass directly into the brain whereby the brain becomes magnetically responsive to 5G access & input allowing for mind control. Graphene oxide (to ensure the magnetism) and aluminum (to hold heat during electromagnetic excitation) are also contained in the covid shots.

Aluminum (a neurotoxin) has sharp, tubular metal edges that risk shredding blood vessels and kidney tissue during the detox process unless it is first coated.

Methods to combat these toxins:

Install high efficiency HEPA filters indoors

Drink alkaline water to facilitate the detox process & maintain pH balance

Eat a diet rich in alkalizing foods - leafy greens, sprouts & cucumbers which provide minerals like K (potassium) & Mg (magnesium) to buffer acidity & support detox

Include antioxidants like Vit D & E

Directed Energy Weapon Damage

In the picture above, the “wildfire” is not starting outside and sweeping up the house as normal wildfires do. Rather, it is igniting simultaneously in 4 different rooms inside the houses. This is not a typical wildfire. Could this be smart meter surges? Also, notice that the car which was apparently driven to this location has all the windows melted but the body and gas tank have not exploded in spite of the 2700^o heat required to melt glass. Very strange fire!

DEW Melts Glass But Leaves Gas Tank & Metal Body Intact

DEW Melts Glass Leaving Blue Wires & Metal Body Intact

**Metal Nails Don't Burn But Conduct Enough Heat
To Burn Wood In Close Proximity**

**Wooden Fencing Burns Only Around Metal Nails
Which Do Not Burn**

**Metal nails and bolts all still in place after
burning the wood to a crisp**

This is an example of how the metals from the covid shot hold heat in the body to facilitate the damage to tissues when energized by 5G.

DEWS Kill Trees By Burning Them From The Inside Out

Inside completely burned out leaving the outside still standing

DEWS Petrify Animals By Burning Them From The Inside Out

Dog Left Charred Not Burnt
