

## Men's League Update (July 2022 Edition)

As we say goodbye to the Snowbirds and roll towards the steamy summer months, I reflect back onto my first complete year as a Lake Fairways resident. What I come away with is how lucky I was to stumble into this unique retirement community. An ideal combination of golf, location, weather, cost of living, available activities, and an eclectic cast of characters to share it all with. One can be as involved or as private as you care to be with no questions asked. The transition to make Lake Fairways my home was very easy.

With regards to the monthly Men's League updates, I need to apologize for going MIA. I was in the middle of a season ending update with a collection of photos from the Club Championships and Shootouts when my computer crashed, and the recovery has been slow. Another battle lost to technology.

Enough with the formalities. Golf continues through the summer months. Monday Marauders and Green Saturdays will continue as weather permits. Tuesday Travel Day started in May and is a great way to explore other courses in the area along with organized pairings and tee times making for a hassle-free and enjoyable experience.

Summer Shootouts will continue in July leading up to the Grand Shootout all of which provide a plethora of good and bad golf play with photos and stories to write about in this space.

No reported Holes-In-One to analyze at the moment. If you have the fortune to make a Hole-In-One or know of someone in the community who did, we'd like to share the news so contact me with the details or witness' contact details. It's news worth reporting.

The new sprinkler system project in Pine Lakes is complete and under way in Lake Fairways. We all hope the upgrades will help to improve the golf course conditions as we progress into the season. Our Superintendent, Scotty Helmig seems to have things well in hand, and we look forward to the fruits of his hard work. Stay tuned for further updates in this regard.
