We know APRIL is the fourth month of the year, but that's only by the Gregorian calendar that we adhere to now. It was previously the fifth month in the earlier Julian calendar.

April also only had 29 days, but a 30th day was added when Julius Caesar established the Julian calendar.

No one is sure how the month ended up with its name, but we do know the Romans named it "Aprillis."

The etymology behind the word "April" comes from the verb "aperire," which means "to open." It's commonly believed that the word refers to the season of trees and flowers begin to "open" or bloom.

Those who were born in April have a diamond as their birthstone, which represents innocence.

Their birth flower is either a Daisy or a Sweet Pea.

There are two zodiac signs in April. Aries, which is until April 19th, and Taurus, which is April 20th and onwards.

April Fool's Day is the 1st day in April. It is celebrated in the United States, England, France, Scotland, Italy, Spain, Portugal, Sweden, Germany and Norway. Because the day evolves around whimsy and tomfoolery, the origin of this day varies also.

The custom of shouting "April Fool!" was brought to the United States by English settlers in the early 1600's.

One theory to it's origin goes back to Noah, who is said to have mistakenly sent the dove out to find dry land after the flood began to recede on April 1st. Another has to do with the change in the Gregorian calendar, in which under the old calendar New Year's Day was celebrated around time of the Vernal Equinox in late March. But, because this occasionally coincided with (or came close to) Easter, church officials back then moved New Year's day to April 1st. But, when the Gregorian calendar was officially adopted in 1582, New Years Day changed from April 1 to January 1. Some people forgot about the change, and continued to make their New Year visits on April 1. Others paid mock visits to friends and neighbors shouting "April Fool!" to those who took them seriously.
