

# SECURE COMPUTING TIPS

## YOU ARE A TARGET TO HACKER

We are all at risk and the stakes are high - both for your personal and financial well-being.

## KEEP SOFTWARE UP TO DATE

Installing software updates for your operating system and programs is critical.

## AVOID PHISHING SCAM

Phishing scams are a constant threat. They can be carried out by phone, text, or through social networking sites or emails.

## PRACTICE GOOD PASSWORD MANAGEMENT

A password manager can help you to maintain strong unique passwords for all of your accounts.

## BE CAREFUL WHAT YOU CLICK

Avoid visiting unknown websites or downloading software from untrusted sources.

## NEVER LEAVE DEVICES UNATTENDED

The physical security of your devices is just as important as their technical security.

## USE MOBILE DEVICES SAFELY

Considering how much we rely on our mobile devices and how susceptible they are to attack.

## SAFEGUARD PROTECTED DATA

Be aware of Protected Data that you come into contact with and its associated restrictions.

## INSTALL ANTIVIRUS/ANTI-MALWARE

Only install these programs from a known and trusted source.

## BACK UP YOUR DATA

The only guaranteed way to repair your computer after security incident is to erase and re-install the system. Make sure system is backed up regularly.
