Proceeds will benefit the families served by the Victoria Ciara Foundation

Our mission is to enhance the lives of those impacted by congenital heart disease. Congenital heart disease is the presence of cardiac defects that develop prior to birth. It is the most common birth defect in the world and affects 1 of every 100 births. Every day, 110 babies are born with it. There is no cure and often requires multiple open-heart surgeries. Families struggle with high medical costs, loss of income during times of hospitalization/recuperation, and are more likely to suffer from depression, anxiety and PTSD.
