General Information For Manual Catalog Orders

Proofs

Digital proofs are provided at no charge on all online orders. Manual catalog proofs in black and white are available for \$15.00 (R) each. Add 2 days to production time.

Virtual proofs are available for \$15.00 (R). Add up to 4 additional days to production times.

Special Services

If your files require special attention to change or correct, and we are able to make the necessary changes with a quick fix, we will do so for a \$15.00 NET charge. Anything more involved than a quick fix will require additional charges. You will not be contacted unless the charge to fix your file exceeds \$15.00 NET.

Creating Your Files

Create one item sized correctly per document. (Placed graphics and text should be sized at 100%.)

Artwork

You will need to provide clean, black and white or full color artwork scaled to fit the impression area. Black and white artwork should be sent without screens or shading. Black and white bitmap images should be submitted at 600 dpi. CMYK and grayscale images should be submitted at 300 dpi. All artwork should be sized at 100%.

All placed graphics and images need to be high quality and colored according to our guidelines for the product ordered. All supporting graphic files used within your layout must be sent along with the layout file, placed at 100%.

Do not send faxed art or photocopies. Laser copies must be a minimum of 600 dpi.

Screens: We do not recommend using screened colors on any artwork for promotional products.

Fonts

Using your illustration program, convert all text "to curves" or "create outlines" in your files. Never use the stylization palette to bold, italicize, add drop shadow to or put outlines on your fonts. If you are using fonts not owned by Navitor®, outlines must be created in illustration program before submitting your artwork.

Graphic Requirements

We accept electronic art created in the following applications: Adobe® Illustrator®, Adobe® Photoshop®, Adobe® InDesign®, CorelDRAW®, and QuarkXpress®.

Whenever possible, place vector images into the layout before converting to a PDF. Be aware that when changes need to be made to placed images (coloring, mode, etc.), there is the possibility of the quality being compromised.

Compressed files can be sent in the following formats: .sit, .sea, and .zip.

Color Requirements

We now have an "Accurate Color" System. You can now send your files colored using the intended PMS color instead of having to color it using CMYK colors. Every effort will be made to print your intended color within acceptable standards.

Spot Color Printing

Please submit black and white bitmap images at 600 dpi and grayscale images at 300 dpi for standard spot printing.

Imprint Colors: Colors on paper may print differently on other substrates. The imprint colors are intended as a guide only, not an exact representation. PANTONE MATCHING SYSTEM® is not available.

Full-Color Process Printing

Every element of the file must be colored with process CMYK colors (no RGB, indexed color, etc.). If RGB or other non-CMYK colors are used in your files, the necessary conversion to CMYK will change the appearance of the colors when we print, sometimes dramatically.

Rights to Promotion

Navitor® reserves the right to use all products in our advertising and displays unless specified in writing at the time of order.
