COVID-19 CARE PLAN Antimicrobial Surface and Air Protection

It's Chemistry, Not Chemicals

CLEAN Disinfectant

8 BENEFITS in One Product:

1. Hospital Grade Disinfectant
2. NSF Registered (D-2) "No Rinse required on Food Contact Surfaces"
3. Eliminates Odors
4. Eliminates Allergens
5. Kills Mold & Mildew
6. Kills and Prevents Biofilm
7. Carpet Sanitizer
8. Used in HVAC Systems

SHIELD Protection

Patented, EPA Registered Long-Term Antimicrobial Surface

The Xmicrobe DP System

Xmicrobe DP System is comprised of two distinct, yet equally remarkable patented and EPA registered products.

Fresh Start **CLEAN** and Xmicrobe **SHIELD**.

- EPA Registered #93819-OR-001
- Approved for use on hard and soft surfaces
- Approved for effective use against emergent pathogens, like SARS-CoV-2, the virus that causes the disease COVID-19.

HOW IS THE SYSTEM APPLIED?

A complete Xmicrobe DP System is achieved by fogging both **CLEAN** and **SHIELD**, one product right after the other, throughout a facility, a process that typically takes a few hours if not minutes to complete.

Healthcare

Athletics

Hospitality

How Does the 2-Step System Work?

Xmicrobe DP System Best Used Once Per Quarter to Boost Continual Sanitation

A fogged-on application of **CLEAN™** kills 99.999% of bacteria and viruses on hard surfaces and 99.9% on carpets, while also eliminating odors, allergens, molds, mildew and other fungi.

The application of **CLEAN™** also “primes” surfaces to ensure a bond with the subsequent application of **SHIELD™**

Upon application, **SHIELD™** forms a Covalent Bond with the surface to which it is applied. Once dry it will not wash off and can last and remain antimicrobially effective almost indefinitely.

Unlike common antimicrobials, **SHIELD™** doesn't kill microbes by poisoning them with chemicals. Instead, it eliminates them through a patented “Electro-Mechanical” process, without the use of harmful chemicals

Can last & remain antimicrobially effective for months and more

...and it does it all without the use of harmful chemicals
