

## **FEDERAL CYBER DEFENSE SOLUTIONS, INC.**

### **PAST PERFORMANCE SUMMARY**

Federal Cyber Defense Solutions leadership brings more than two decades of cybersecurity leadership experience supporting federal agencies, SaaS providers, financial institutions, and regulated organizations.

### **HEWLETT-PACKARD FORTIFY ON DEMAND – FEDRAMP AUTHORIZATION LEADERSHIP**

Served as the overall FedRAMP Program Lead, Security Architect, and Authorization Package Lead responsible for building the federal government deployment of Fortify on Demand (now OpenText).

#### **Responsibilities included:**

- Security architecture design
- FedRAMP gap assessment and remediation planning
- SSP development and supporting documentation
- Coordination with the 3PAO assessment team
- Audit response and remediation management
- Development of operational security processes
- Training personnel supporting incident response and change management functions

Successfully led the program through authorization activities and established one of the earliest FedRAMP-authorized cybersecurity SaaS offerings supporting federal customers.

### **IBM FEDRAMP AND CLOUD SECURITY SUPPORT**

Supported federal Watson AI cloud security initiatives focused on compliance automation, security control implementation, cloud security governance, and FedRAMP program maturation.

#### **Provided expertise in:**

- NIST 800-53 control implementation
- Security assessments
- Compliance automation
- Continuous monitoring
- Federal cloud security architectures

## **FEDRAMP 20X PARTICIPATION**

Active participant in FedRAMP modernization initiatives focused on improving authorization efficiency, automation, continuous compliance, machine-readable evidence, and modern security validation approaches.

## **CISO LEADERSHIP EXPERIENCE**

Served as Chief Information Security Officer for multiple SaaS and fintech organizations including cloud-native and highly regulated environments.

### **Responsibilities included:**

- Enterprise cybersecurity strategy
- Security operations oversight
- Vulnerability management
- Regulatory compliance
- Third-party risk management
- Cloud security governance
- Board and executive reporting

## **FEDRAMP HIGH EXPERIENCE**

Leadership experience supporting FedRAMP High security requirements, including implementation of NIST 800-53 controls, vulnerability management programs, continuous monitoring, audit readiness, SSP development, POA&M management, and cloud security architecture reviews.

This experience provides Federal Cyber Defense Solutions with a practical understanding of the operational, technical, and governance requirements necessary to support federal agencies and FedRAMP-authorized cloud service providers.
