## ARTICLES OF INTEREST

### HAPPY NEW YEAR!

January 9, 2026

### QUOTE(S) OF THE WEEK

"I do not seek. I find." – Pablo Picasso

"We must not say every mistake is a foolish one." – Cicero

"I don't suffer fools, and I like to see fools suffer." – Florence King

"Reality leaves a lot to the imagination." – John Lennon

"The important thing is not to stop questioning. Curiosity has its own reason for existing. One cannot help but be in awe when he contemplates the mysteries of eternity, of life, of the marvelous structure of reality. It is enough if one tries merely to comprehend a little of this mystery every day. Never lose a holy curiosity." – Albert Einstein

"There is a cult of ignorance in the United States, and there always has been. The strain of anti-intellectualism has been a constant thread winding its way through our political and cultural life, nurtured by the false notion that democracy means that "my ignorance is just as good as your knowledge."" – Isaac Asimov

"I do not know what I may appear to the world, but to myself I seem to have been only like a boy playing on the sea-shore, and diverting myself in now and then finding a smoother pebble or a prettier shell than ordinary, whilst the great ocean of truth lay all undiscovered before me." – Isaac Newton

"One of the basic rules of the universe is that nothing is perfect. Perfection simply doesn't exist ... Without imperfection, neither you nor I would exist." – Stephen Hawking

"Ever tried. Ever failed. No matter. Try Again. Fail again. Fail better." – Samuel Beckett

The **National Creativity Network** believes that by fostering creativity in our society as a whole, and specifically with future generations, America can remain a leader in innovation and free enterprise. The very future of our communities and institutions depends on our ability to nurture and harness imagination to creatively solve problems. If creativity is to be nurtured, systems, institutions and networks must be transformed.

The opportunities that emerge to transform our nation are largely dependent upon the degree to which we are connected to each other. Our connection will become a catalyst:

- to enhance the flow of relevant information,
- and to improve the ease with which key nodes of creativity, be they in the domains of Education, Commerce, Culture or across disciplines, can gain access to the best thinking, best questions, and most successful practices as well as other resources their ventures may require.

Our strategy is to engage thought leaders across North America to create a powerful network for transformation.
