QUOTE(S) OF THE WEEK

"When one must, one can." – Charlotte Whitton

"Education, for most people, means trying to lead the child to resemble the typical adult of his society... But for me, education means making creators... You have to make inventors, innovators, not conformists." – Jean Piaget

"Novelists talk about their characters starting to do things they didn't expect them to. Well, I imagine every writer of biography or history, as well as fiction, has the experience of suddenly seeing a few pieces of the puzzle fit together. The chances of finding a new piece are fairly remote — though I've never written a book where I didn't find something new — but it's more likely you see something that's been around a long time that others haven't seen. Sometimes it derives from your own nature, your own interests. More often, it's just that nobody bothered to look closely enough." – David McCullough

"Make visible what, without you, might perhaps never have been seen." – Robert Bresson

"He who only knows his own side of the case, knows little of that." – John Stuart Mill

"In nature there are neither rewards nor punishments — there are consequences." – Robert G. Ingersoll

"The task is, not so much to see what no one has yet seen; but to think what nobody has yet thought, about that which everybody sees." – Erwin Schrödinger

"If I had to live my life again, I'd make the same mistakes, only sooner." – Tallulah Bankhead

The **National Creativity Network** believes that by fostering creativity in our society as a whole, and specifically with future generations, America can remain a leader in innovation and free enterprise. The very future of our communities and institutions depends on our ability to nurture and harness imagination to creatively solve problems. If creativity is to be nurtured, systems, institutions and networks must be transformed.

The opportunities that emerge to transform our nation are largely dependent upon the degree to which we are connected to each other. Our connection will become a catalyst:

- to enhance the flow of relevant information,
- and to improve the ease with which key nodes of creativity, be they in the domains of Education, Commerce, Culture or across disciplines, can gain access to the best thinking, best questions, and most successful practices as well as other resources their ventures may require.

Our strategy is to engage thought leaders across North America to create a powerful network for transformation.

Join Us!
