Global Media and Information Literacy Week
UNESCO
October 24 - 31

October 24, 2025

QUOTE(S) OF THE WEEK

"Traditionalists are pessimists about the future and optimists about the past." – Lewis Mumford

"A society which is mobile, which is full of channels for the distribution of a change occurring anywhere, must see to it that its members are educated to personal initiative and adaptability. Otherwise, they will be overwhelmed by the changes in which they are caught and whose significance or connections they do not perceive." – John Dewey

"Implementing best practice is copying yesterday. Innovation is inventing tomorrow." – Paul Sloane

"It is of the nature of idea to be communicated: written, spoken, done. The idea is like grass, It craves light, likes crowds, thrives on crossbreeding, grows better for being stepped on." – Ursula K. Le Guin

"In the end, science offers us the only way out of politics. And if we allow science to become politicized, then we are lost. We will enter the Internet version of the dark ages, an era of shifting fears and wild prejudices, transmitted to people who don't know any better." – Michael Crichton

"Discovery is the ability to be puzzled by simple things." – Noam Chomsky

"Every human has four endowments - self awareness, conscience, independent will and creative imagination. These give us the ultimate human freedom... The power to choose, to respond, to change." – Stephen Covey

"The reward for work well done is the opportunity to do more." – Jonas Salk

Despite our best efforts, links may fail without warning since each news source posts and archives its articles differently. We apologize for any inconvenience.

Have you found an article you'd like to share? Email the link to george.tzougros@wisconsin.gov.

#

The **National Creativity Network** believes that by fostering creativity in our society as a whole, and specifically with future generations, America can remain a leader in innovation and free enterprise. The very future of our communities and institutions depends on our ability to nurture and harness imagination to creatively solve problems. If creativity is to be nurtured, systems, institutions and networks must be transformed.

The opportunities that emerge to transform our nation are largely dependent upon the degree to which we are connected to each other. Our connection will become a catalyst:

- to enhance the flow of relevant information,

- and to improve the ease with which key nodes of creativity, be they in the domains of Education, Commerce, Culture or across disciplines, can gain access to the best thinking, best questions, and most successful practices as well as other resources their ventures may require.

Our strategy is to engage thought leaders across North America to create a powerful network for transformation.

Join Us!
