QUOTE(S) OF THE WEEK

"Whatever we believe about how we got to be the extraordinary creatures we are today is far less important than bringing our intellect to bear on how do we get together now around the world and get out of the mess that we've made. That's the key thing now. Never mind how we got to be who we are." – Jane Goodall

"There's not the least thing can be said or done, but people will talk and find fault." – Miguel de Cervantes

"Nothing is impossible, the word itself says 'I'm possible!'" – Audrey Hepburn

"Science is a cemetery of dead ideas." – Miguel de Unamuno

"Innovation is the whim of an elite before it becomes a need of the public." – Ludwig von Mises

"If you want to succeed, you should strike out on new paths, rather than travel the worn paths of accepted success." – John D. Rockefeller

"The truth seems to be that we live in concepts of the imagination before the reason has established them. If this is true, then reason is simply the methodizer of the imagination." – Wallace Stevens

The **National Creativity Network** believes that by fostering creativity in our society as a whole, and specifically with future generations, America can remain a leader in innovation and free enterprise. The very future of our communities and institutions depends on our ability to nurture and harness imagination to creatively solve problems. If creativity is to be nurtured, systems, institutions and networks must be transformed.

The opportunities that emerge to transform our nation are largely dependent upon the degree to which we are connected to each other. Our connection will become a catalyst:

- to enhance the flow of relevant information,

- and to improve the ease with which key nodes of creativity, be they in the domains of Education, Commerce, Culture or across disciplines, can gain access to the best thinking, best questions, and most successful practices as well as other resources their ventures may require.

Our strategy is to engage thought leaders across North America to create a powerful network for transformation.

Join Us!
