QUOTE(S) OF THE WEEK

“You can't depend on your eyes when your imagination is out of focus.” – Mark Twain

“It is better to ask some of the questions than to know all the answers.” – James Thurber

“A ship in port is safe; but that is not what ships are built for. Sail out to sea and do new things.” – Grace Hopper

“Humor is perhaps a sense of intellectual perspective: an awareness that some things are really important, others not; and that the two kinds are most oddly jumbled in everyday affairs.” – Christopher Morley

“I have never been especially impressed by the heroics of people convinced that they are about to change the world. I am more awed by those who struggle to make one small difference after another.” – Ellen Goodman

“The most glorious moments in your life are not the so-called days of success, but rather those days when out of dejection and despair you feel rise in you a challenge to life, and the promise of future accomplishments.” – Gustave Flaubert

“The best of ideas is hurt by uncritical acceptance and thrives on critical examination.” – George Pólya

“Failure is unimportant. It takes courage to make a fool of yourself.” – Charlie Chaplin

NEW IDEA JAM | A Grounded Theoretical Process for Revealing an Imaginative Leadership Style | Moderated by Paul Syme

Canadian Network for Imagination and Creativity

December 19

In this Jam, Paul shares his research findings from his thesis investigation into the imaginative capabilities of educational leaders and the processes underpinning their development. The research uses a grounded theory methodology to analyze interviews with educational leaders recognized for

driving innovation and social change. Emergent themes, derived through open, axial, and selective coding, conceptualize two core behavioral patterns, Sense–Think–Act and Ponder–Enact–Play, encompassing six imaginative capabilities. These findings address the gap in leadership theories by providing novel insights into imagination as malleable holistic behavior extending beyond the mind to include the body and context. Moreover, the findings reveal imaginative leadership as a distinct leadership style. The study underscores the need for imaginative leadership to address complex challenges in educational contexts, contributing new theory to the underexplored domain of imaginative practice in leadership. Join us for an eye-opening conversation about creativity.

The **National Creativity Network** believes that by fostering creativity in our society as a whole, and specifically with future generations, America can remain a leader in innovation and free enterprise. The very future of our communities and institutions depends on our ability to nurture and harness imagination to creatively solve problems. If creativity is to be nurtured, systems, institutions and networks must be transformed.

The opportunities that emerge to transform our nation are largely dependent upon the degree to which we are connected to each other. Our connection will become a catalyst:

- to enhance the flow of relevant information,
- and to improve the ease with which key nodes of creativity, be they in the domains of Education, Commerce, Culture or across disciplines, can gain access

to the best thinking, best questions, and most successful practices as well as other resources their ventures may require.

Our strategy is to engage thought leaders across North America to create a powerful network for transformation.
