QUOTE(S) OF THE WEEK

“Little minds are tamed and subdued by misfortune; but great minds rise above them.” – Washington Irving

“To know that we know what we know, and to know that we do not know what we do not know, that is true knowledge.” – Nicolaus Copernicus

“To the mind that is still, the whole universe surrenders.” – Lao Tzu

“Ideas shape the course of history.” – John Maynard Keynes

“The saddest aspect of life right now is that science gathers knowledge faster than society gathers wisdom.” – Isaac Asimov

“There's two possible outcomes: if the result confirms the hypothesis, then you've made a discovery. If the result is contrary to the hypothesis, then you've made a discovery.” – Enrico Fermi

“It's really hard to design products by focus groups. A lot of times, people don't know what they want until you show it to them.” – Steve Jobs

“Using primarily outsiders, do a thorough assessment of your orientation toward the women's market. The assessors should primarily or exclusively be ... women.” – Tom Peters

“The world of reality has its limits; the world of imagination is boundless.” – Jean-Jacques Rousseau

The **National Creativity Network** believes that by fostering creativity in our society as a whole, and specifically with future generations, America can remain a leader in innovation and free enterprise. The very future of our communities and institutions depends on our ability to nurture and harness imagination to creatively solve problems. If creativity is to be nurtured, systems, institutions and networks must be transformed.

The opportunities that emerge to transform our nation are largely dependent upon the degree to which we are connected to each other. Our connection will become a catalyst:

- to enhance the flow of relevant information,
- and to improve the ease with which key nodes of creativity, be they in the domains of Education, Commerce, Culture or across disciplines, can gain access to the best thinking, best questions, and most successful practices as well as other resources their ventures may require.

Our strategy is to engage thought leaders across North America to create a powerful network for transformation.
