QUOTE(S) OF THE WEEK

“The culture as a whole is losing its individual notes, its diversity. And this is... it's not only sad. It's devastating. It's devastating because routine language means routine thought. And it means unquestioning thought.” – John Leonard

“Such is the privilege of genius; it perceives, it seizes relations where vulgar eyes see only isolated facts.” – François Arago

“If you want to have good ideas you must have many ideas. Most of them will be wrong, and what you have to learn is which ones to throw away.” – Linus Pauling

“In the middle of difficulty, lies opportunity.” – Albert Einstein

The whole secret of life is to be interested in one thing profoundly and in a thousand things well.” – Horace Walpole

“Nonsense wakes up the brain cells. And it helps develop a sense of humor, which is awfully important in this day and age. Humor has a tremendous place in this sordid world. It's more than just a matter of laughing. If you can see things out of whack, then you can see how things can be in whack.” – Dr. Seuss

“People attempt to adapt the world to themselves. All progress, therefore, depends on unreasonable people.” – George Bernard Shaw

Nothing is more dangerous than an idea, when it's the only one we have.” – Émile Chartier

“In mathematics the art of asking questions is more valuable than solving problems.” – Georg Cantor

The **National Creativity Network** believes that by fostering creativity in our society as a whole, and specifically with future generations, America can remain a leader in innovation and free enterprise. The very future of our communities and institutions depends on our ability to nurture and harness imagination to creatively solve problems. If creativity is to be nurtured, systems, institutions and networks must be transformed.

The opportunities that emerge to transform our nation are largely dependent upon the degree to which we are connected to each other. Our connection will become a catalyst:

- to enhance the flow of relevant information,
- and to improve the ease with which key nodes of creativity, be they in the domains of Education, Commerce, Culture or across disciplines, can gain access to the best thinking, best questions, and most successful practices as well as other resources their ventures may require.

Our strategy is to engage thought leaders across North America to create a powerful network for transformation.

Join Us!
