## ARTICLES OF INTEREST

**March 19, 2021**

### QUOTE(S) OF THE WEEK

“Beware the March of Ideas?” – Neil Gaiman

“The most incomprehensible thing about the world is that it is comprehensible.” – Albert Einstein

“Some people will never learn anything because they understand everything too soon.” – Alexander Pope

“Art has a double face, of expression and illusion, just like science has a double face: the reality of error and the phantom of truth.” – René Daumal

“Without art, science would be as useless as a pair of high forceps in the hands of a plumber. Without science, art would become a crude mess of folklore and emotional quackery.” – Raymond Chandler

“As the first scientist in my family, I didn't have a scientist role model I could relate to when I was little. Somebody that looked and spoke like me. So I'm thrilled that voices are getting amplified. Because representation drives change, and diversity inspires innovation.” – [Rosa Vasquez](#)

“Science has its being in a perpetual mental restlessness.” – William Temple

The **National Creativity Network** believes that by fostering creativity in our society as a whole, and specifically with future generations, America can remain a leader in innovation and free enterprise. The very future of our communities and institutions depends on our ability to nurture and harness imagination to creatively solve problems. If creativity is to be nurtured, systems, institutions and networks must be transformed.

The opportunities that emerge to transform our nation are largely dependent upon the degree to which we are connected to each other. Our connection will become a catalyst:

- to enhance the flow of relevant information,
- and to improve the ease with which key nodes of creativity, be they in the domains of Education, Commerce, Culture or across disciplines, can gain access to the best thinking, best questions, and most successful practices as well as other resources their ventures may require.

Our strategy is to engage thought leaders across North America to create a powerful network for transformation.

Join Us!
