April 9, 2021

### QUOTE(S) OF THE WEEK

“The walls between art and engineering exist only in our minds.” – Theo Jansen

“Art that means anything in the life of a community must bear some relation to current interpretations of the mystery of the universe. Our rigid separation of the humanities and the sciences has temporarily left our art stranded or stammering and incoherent. Both art and science ought to be blended in our early education of our children's emotions and powers of observation, and that harmony carried forward in later education.” – Dora Russell

“I have never looked for dream in reality or reality in dream. I have allowed my imagination free play, and I have not been led astray by it.” – Gustave Moreau

“I think it's better to be overly ambitious and fail than to be underambitious and succeed in a mundane way. I have been very fortunate. I failed upward in my life!” – Francis Ford Coppola

“We have been taught to believe that negative equals realistic and positive equals unrealistic.” – Susan Jeffers

“Imagination is the queen of truth, and possibility is one of the regions of truth. She is positively akin to infinity.” – Charles Baudelaire

The **National Creativity Network** believes that by fostering creativity in our society as a whole, and specifically with future generations, America can remain a leader in innovation and free enterprise. The very future of our communities and institutions depends on our ability to nurture and harness imagination to creatively solve problems. If creativity is to be nurtured, systems, institutions and networks must be transformed.

The opportunities that emerge to transform our nation are largely dependent upon the degree to which we are connected to each other. Our connection will become a catalyst:

- to enhance the flow of relevant information,
- and to improve the ease with which key nodes of creativity, be they in the domains of Education, Commerce, Culture or across disciplines, can gain access to the best thinking, best questions, and most successful practices as well as other resources their ventures may require.

Our strategy is to engage thought leaders across North America to create a powerful network for transformation.

Join Us!
